THE PHARMACOPOEIA

OF THE

UNITED STATES OF AMERICA.

1820.

BY THE

AUTHORITY OF THE MEDICAL SOCIETIES AND COLLEGES.

BOSTON:

PRINTED BY WELLS AND LILLY.
FOR CHARLES EWER, NO. 51, CORNHILL.

Dec. 1820.
DISTRICT OF MASSACHUSETTS, TO WIT:

District Clerk's Office.

BE it remembered, that on the fifteenth day of December, A.D. 1820, in the Forty-fifth year of the Independence of the United States of America, Charles Ewer and Timothy Bedlington of the said District, have deposited in this Office the Title of a Book the Right whereof they claim as Proprietors in the Words following, to wit: "The Pharmacopœia of the United States of America. 1820. By the Authority of the Medical Societies and Colleges.

In Conformity to the Act of the Congress of the United States, entitled, "An Act for the Encouragement of Learning, by securing the Copies of Maps, Charts and Books, to the Authors and Proprietors of such Copies, during the Times therein mentioned:" and also to an Act entitled, "An Act supplementary to an Act, entitled, An Act for the Encouragement of Learning, by securing the Copies of Maps, Charts and Books, to the Authors and Proprietors of such Copies during the times therein mentioned; and extending the Benefits thereof to the Arts of Designing, Engraving and Etching Historical, and other Prints."

JNO. W. DAVIS,
Clerk of the District of Massachusetts.

The Proprietors of "The Pharmacopœia of the United States" give notice, that having purchased for a large sum, the copy right of the said work, they shall be under the necessity of promptly instituting a suit against any person or persons who may attempt an infraction of the rights conferred on them by law. All persons whom it may concern are cautioned to govern themselves accordingly.

1820
In the General Medical Convention, held, in the Capitol at Washington, January, 1820—

Resolved that

Lyman Spalding,
Thomas T. Hewson,
Eli Ives,
Elisha De Butts,
Jacob Bigelow,

Be constituted a Committee whose duty it shall be to prepare for the Press the National Pharmacopœia agreed on in this Convention.

SAMUEL L. MITCHELL, President.

THOS. T. HEWSON, Secretary.

The Pharmacopœia of the United States of America, is now published agreeably to the vote of the General Convention.

L. Spalding,
Chairman of the Committee of Publication.
As the authority and future usefulness of the American Pharmacopoeia is connected with the manner in which this work has been formed; and as the extent of its adoption will probably be commensurate with that of the sources, from which it has emanated; it is proper to lay before the public an historical account of its origin, growth, and completion.

In January, 1817, Dr. Lyman Spalding submitted to the New York County Medical Society, a project for the formation of a National Pharmacopoeia, by the authority of all the medical societies and medical schools in the United States. The plan proposed was, 1. That a convention should be called in each of the four grand divisions of the United States, to be composed of delegates from all the medical societies and schools. 2. That each district convention should form a Pharmacopoeia, and elect delegates to meet in general convention in the city of Washington, on the first of January, 1820. 3. That the general convention should, from the district Pharmacopoeias, form the national work. In the county medical society it was referred to a committee, who, after
having corresponded with several of the leading medical men in each state, reported a set of resolutions, which were submitted to the medical society of the state of New York in February, 1818, and by them adopted and ordered to be carried into execution by a committee appointed for the purpose. The purport of these resolutions was as follows,

That it is expedient that a Pharmacopœia should be formed for the use of the United States.

That the several incorporated state medical societies, the several incorporated colleges of physicians and surgeons, or medical schools; and such medical bodies as constitute a faculty in any incorporated university or college in the United States, should be respectfully invited to unite in the formation of the American Pharmacopœia; and in case there should be any state or territory in the Union, in which there is no incorporated medical society, medical college, or school; that voluntary associations of physicians and surgeons, in such state or territory, be respectfully invited to unite in this undertaking.

That to form an American Pharmacopœia, it is expedient to divide the United States and territories into four districts, viz. the northern, middle, southern, and western.

That a convention be called in each of these districts.

That each state medical society, college of physicians and surgeons, medical school, faculty of medicine, and voluntary association, as before described, be invited to appoint one or more delegates to meet in a district convention.
HISTORICAL INTRODUCTION.

That each district convention form a Pharmacopœia, or select one in general use, and make therein such alterations and additions as shall adapt it to the present state of medical science.

That each district convention be requested to appoint one or more delegates, to meet in a general convention, and submit to the same their Pharmacopœias.

That it be recommended to each medical society, &c. to defray the expenses of its own delegation, and its proportion of the expenses of the district convention.

That the general convention be held in the city of Washington on the first day of January, A. D. 1820, for the purpose of compiling the American Pharmacopœia from those Pharmacopœias which may be presented by the district conventions.

That the general convention adopt a plan for revising the American Pharmacopœia at the end of every ten years, and that no alteration be made therein except at those periods, and then only by the authority aforesaid.

That it be recommended to every medical society, &c. to adopt the American Pharmacopœia, and encourage the use of it by all druggists and apothecaries.

That the general convention sell, for ten years, the copy right of the American Pharmacopœia.

That the general convention defray their expenses out of the proceeds of the sale, and divide the surplus
if any remain, equally among all the societies, &c. which were represented in the district conventions.

That the delegates appointed by this Society be a special committee to correspond with all the incorporated state medical societies, &c. in the Union, and such influential medical men as they may deem proper.

That if a majority of the incorporated state medical societies, incorporated medical colleges, medical schools, and faculties of medicine, in the United States, approve of the formation of an American Pharmacopoeia; that it be undertaken.

That when it shall be ascertained that a majority of the societies, &c. approve of the formation of a Pharmacopoeia, the special committee of correspondence of the New York State Medical Society shall give public notice, as well as notice to all incorporated state medical societies, &c. that an American Pharmacopoeia will be formed.

That in order to fix on times and places for holding the several district conventions, the special committee of correspondence be directed to request the several societies, &c. to name what time and place, in their opinion, would be most convenient for the meeting of
the convention in their district; and when the forma-
tion of a Pharmacopœia is agreed on, that the afore-
said committee transmit to each society, &c. the names
of the several places in their district, and the times
which have been mentioned, and point out what time
and place have the most votes, and submit to the se-
veral societies, &c. if such time and place would be
most convenient.

That this society would propose the first day of
June, A. D. 1819, and the city of Philadelphia, as a
convenient time and place, for the meeting of the con-
vention, in the district known by the name of the
middle states.

The committee appointed by the New York me-
dical society, on the 4th of March, 1818, issued cir-
culars to the several corporate bodies and individuals
designated in their commission. In reply to their first
circular, information was received early in November,
1818, that the design of forming a National Pharma-
ocpœia had met the approbation of a majority of the
medical associations in the United States, and that
they had appointed delegates to attend the district
conventions. This intelligence was announced in a
second circular, inviting the said associations to desig-
nate a time and place for the meeting of each of the
district conventions: and in conformity therewith, the
following places were designated, viz. Boston, Phila-

The Vermont medical society at their annual
meeting held in October, 1818, approved the forma-
tion of a National Pharmacopœia, and appointed Se-
lah Gridley, M. D. and Erastus Torrey, M. D. their delegates.

The New Hampshire medical society approved the formation of a National Pharmacopoeia on the 5th of May, 1819, and appointed the following delegates. Reuben D. Mussey, M. D.; Eben. Learned, M. D.; Matthias Spaulding, M. D.; and John P. Batchelder, M. D.

The Rhode Island Medical society at their annual meeting held on the first of September, 1818, concurred in the formation of a National Pharmacopoeia, and appointed Solomon Drowne, M. D. their delegate.

The medical faculty of Brown University approved of the formation of a National Pharmacopoeia on the 15th of March, 1819, and appointed William Ingalls, M. D. their delegate.

The Connecticut medical society approved the design of forming a National Pharmacopoeia, and on the 15th of October, 1818, appointed Eli Ives, M. D.; and William Tully, M. D. their delegates.

The faculty of the medical institution of Yale College on the 28th of October, 1818, approved the formation of an American Pharmacopoeia, and appointed Nathan Smith, M. D.; and Eli Ives, M. D. their delegates.
The college of physicians and surgeons of the western district of the state of New York, in January, 1819, approved the formation of an American Pharmacopoeia, and appointed Lyman Spalding, M. D. their delegate.

The college of physicians and surgeons in the city of New York on the 25th of June, 1818, approved the formation of the American Pharmacopoeia, and appointed William James Mac Neven, M. D.; John W. Francis, M. D.; and Valentine Mott, M. D. their delegates.

The medical society of New Jersey on the 11th of May, 1819, approved the formation of an American Pharmacopoeia and appointed Charles Smith, M. D. and John Vancleve, M. D. their delegates.

The college of physicians of Philadelphia, on the 2d day of February, 1819, approved the proposal for the formation of a National Pharmacopoeia, and appointed Thomas Parke, M. D.; Samuel P. Griffiths, M. D.; Thomas C. James, M. D.; Thomas T. Hewson, M. D.; Edwin A. Atlee, M. D.; Samuel Stewart, M. D.; and Joseph Parrish, M. D. their delegates.

The medical society of the state of Delaware, in May, 1819, approved the formation of the national work, and appointed Joseph B. Harris, M. D., Allan M’Lane, jun. M. D., and William Baldwin, M. D. their delegates.

At the annual convention of the medical and chirurgical faculty of Maryland, in June, 1818. That body approved the formation of an American Phar-

The medical society of the district of Columbia, on the 5th of October, 1818, concurred in the plan for a National Pharmacopœia, and appointed J. T. Sheaffe, M. D.; Thomas Sim, M. D.; Henry Huntt, M. D.; and Thomas Henderson, M. D. their delegates.

The medical school at Lexington, Ky. approved the formation of a National Pharmacopœia, in April, 1819, and appointed B. W. Dudley, M. D.; and W. H. Richardson, M. D. their delegates.

The medical college of Ohio approved the formation of the American Pharmacopœia, in July, 1819, but on account of the infancy of their institution, which had not then gone into complete operation, they did not think proper to appoint delegates.

The board of physicians and surgeons of the first medical district of the state of Indiana on the 3d of November, 1818, concurred in the formation of an American Pharmacopœia, and appointed Elias M’Narnee, M. D.; L. S. Shaler, M. D.; D. M. Hale, M. D.; W. C. Whittesley, M. D.; and Philip Barton, M. D. a committee to appoint delegates, &c.

The medical society of South Carolina, in September, 1818, approved the design of the American Pharmacopœia, and appointed Joseph Johnson, M. D.; John S. Trescott, M. D.; and James Moultrie, Jun. M. D. their delegates.
The medical society of Georgia approved the formation of the National Pharmacopoeia in May, 1819, and appointed Joel Abbot, M. D.; William Terrill, M. D.; J. B. Read, M. D.; and Jonas Cutter, M. D. their delegates.

The medical society of New Orleans approved in September, 1819, of the formation of the American Pharmacopoeia, but their extreme distance from the place of meeting of either of the counties prevented them from sending delegates.

The delegates appointed to the district convention for the eastern states assembled in the Massachusetts Medical College at Boston, on the first day of June, 1819. At this meeting were present delegates from the medical societies of New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, and from Brown University. The meeting was organized by the choice of John C. Warren, M. D. as chairman; and Jacob Bigelow, M. D. as secretary. A plan for a Pharmacopoeia submitted by the delegates from Massachusetts, was taken up, and after being duly revised and amended, was adopted by this convention as their Pharmacopoeia. Eli Ives, M. D.; and Jacob Bigelow, M. D. were appointed delegates to represent this convention in the general convention at Washington.

The district convention for the middle states met in the chamber of the College of Physicians in Philadelphia, on the first day of June, 1819. At this meeting were present delegates from the college of physicians of Philadelphia, the medical society of the
state of New York, the college of physicians and surgeons of the city of New York; the college of physicians and surgeons of the western district of New York; the New Jersey medical society; the medical and chirurgical faculty of Maryland; the medical society of Delaware; and the medical society of the District of Columbia. Thomas Parke, M. D. was chosen president; Samuel L. Mitchell, M. D. vice president; Lyman Spalding, M. D., and Samuel Baker, M. D. secretaries. Two outlines of Pharmacopoeias were submitted by the delegates from New York and Philadelphia, out of which the committee proceeded to form one, which was adopted as their Pharmacopoeia. The following gentlemen, viz. Samuel L. Mitchell, M. D.; Lyman Spalding, M. D.; Alex. H. Stevens, M. D.; John Watts, M. D.; Thomas T. Hewson, M. D.; Thomas Parke, M. D.; Allan M’Lane, M. D.; Elisha De Butts, M. D.; Samuel Baker, M. D.; and Henry Huntt, M. D. were appointed delegates to the General Convention at Washington.

A quorum not being formed at the time and place designated for the meeting of the southern district convention, subsequent measures were taken by those concerned, to secure effectually the representation of that district in the General Convention at Washington.

The General Convention for the formation of the American Pharmacopoeia assembled in the Capitol at Washington, on the first day of January, 1820, and elected Samuel L. Mitchell, M. D. as their presi-
dent; and Thomas T. Hewson, M. D. as secretary. At this meeting, the northern, middle and southern districts were represented. Two Pharmacopœias, being those prepared in the northern and middle districts were submitted to examination by the respective delegates from those sections of the country. These works were duly examined and compared in detail, and their contents, with such additions as were thought necessary, consolidated into one work, which after full revision, was adopted by the General Convention as the American Pharmacopœia, and ordered to be published by a committee appointed for that purpose.

With a view to the future revision and republication of the Pharmacopœia, the following resolutions were adopted previously to the adjournment of the Convention.

Resolved, That in case of the death, resignation or inability to act, of the president of this Convention, that the secretary shall forthwith issue writs of election to the several delegates of this convention, who by written ballots addressed to him may elect another president.

Resolved, That in case of the death, &c. of the secretary, the president shall cause another to be elected as above described.

Resolved, That the president of this Convention shall, on the first of January, 1828, issue writs of election to the several incorporated state medical societies, &c. in the northern district, requiring them to ballot for three delegates to a General Convention to
be held at Washington on the first of January, 1830, for the purpose of revising the American Pharmacopoeia; and that these several institutions be requested to forward to the president, on or before the first day of April, 1829, the names of three persons thus designated by ballot; and the president of the Convention is hereby requested, on the said day, to assort and count the said votes, and to notify the three persons who shall have the greatest number of votes of their election; and in case there should not be three persons who have a greater number of votes than others, then the said president is desired to put a ballot into the box for each of those persons who have an equal number of votes, and draw therefrom such number of ballots as shall make the number of delegates three, and notify as before.

This resolution to apply in like manner to the middle, southern and western districts.

In case neither of the delegates from a district can attend, it shall be the duty of such delegates to appoint a substitute who can attend.

Whereas the progressive improvements in medicine, as well as other causes, may render it expedient to revise the Pharmacopoeia at an earlier period than is expressed above; it shall be the duty of the president to call the attention of the medical societies and colleges to the subject, whenever in his opinion the public good may require it.
PREFACE.

It is the object of a Pharmacopœia to select from among substances which possess medicinal power, those, the utility of which is most fully established and best understood; and to form from them preparations and compositions, in which their powers may be exerted to the greatest advantage. It should likewise distinguish those articles by convenient and definite names, such as may prevent trouble or uncertainty in the intercourse of physicians and apothecaries.

The value of a Pharmacopœia depends upon the fidelity with which it conforms to the best state of medical knowledge of the day. Its usefulness depends upon the sanction it receives from the medical community and the public; and the extent to which it governs the language and practice of those for whose use it is intended.

In most European countries works of this kind have appeared under the authority of medical colleges and corporations. Their usefulness has generally been co-extensive with the influence of the bodies of men from whom they have originated. If they have been less useful than might have been hoped from their
character and objects; it is because different works of this kind proceeding from different sources, and disagreeing with each other in their details, have been permitted to circulate in the same community; thus interfering with each other, and frequently introducing confusion into the practice they were intended to regulate.

In the United States the evil of irregularity and uncertainty in the preparation of medicines has been felt with peculiar weight. Besides a number of Pharmacopoeias, and of Dispensatories founded upon them, which have been produced in different parts of the Union; we import various foreign works of the kind, some of which have become naturalized by republication in the country. The druggist and the medical practitioner are supplied, as their convenience may direct, with any one or more of these books; and of course the character of medicinal preparations is liable to vary in every state and city of the Union. And the physician is exposed, unconsciously, to administer to his patient medicines, essentially different from those which his judgment has prescribed.

That this evil has not earlier been remedied, is to be attributed not so much to a want of conviction, on the part of the medical faculty, of the importance of the subject; as to the difficulty of obtaining in such a work the general co-operation of physicians throughout a country so extensive as ours. In several of the states, measures had been taken by the faculty to regulate the preparation of medicines, and with success as far as it respected the circle of their respective
practice.* But a National Pharmacopœia, which should be established and adopted by the consent of all the medical corporate bodies throughout the United States, still remained a great desideratum; being evidently the only mode by which a uniform system could be introduced at once into all parts of the American territory. In the present volume a work of this kind has for the first time been undertaken; and after being gradually matured by the advice, consent and co-operation of bodies of physicians in all parts of the Union, it is at length committed to the press, as the result of their deliberations and decisions.

In the formation of the American Pharmacopoeia, the General Convention and their publishing committee have had to encounter those difficulties which must always attend the first publication of works of this kind. The selection of a Materia Medica; the formation or adoption of preparations and compounds, and the establishment of a pharmaceutical nomenclature, have constituted their chief labour. On each of these departments of the work they have endeavoured to bestow that degree of careful inquiry and mature deliberation which the importance of the occasion demanded; and have pursued the course, which appeared to them best suited to supply the wants, and promote the interests of the medical community in all sections of the country.

* The Pharmacopoeia of the Massachusetts Medical Society was published in 1808, and afterwards adopted by the Medical Society of New Hampshire. The Pharmacopoeia of the New York Hospital was published in 1816.
The fault of the lists of the Materia Medica which have been adopted in different countries, has always been their redundancy, rather than their deficiency. The number of articles necessary for the management of diseases, and especially of those which any individual physician actually employs; is always very far short of the catalogue afforded by most Pharmacopoeias. Besides, as the progress of medical discovery continually tends to the introduction of new articles into use, the Materia Medica must soon grow to an unmanageable size, if its enlargement be not followed by a corresponding retrenchment of superfluities. In consequence of reasons of this sort, many articles contained in European books have been omitted in the American Pharmacopoeia. These omissions have been made only where the articles in question were considered inert, or where they were abundantly superseded by substitutes more powerful and more accessible.

The system of retrenchment might no doubt have been more rigorously exercised without ultimate disadvantage to the interests of medicine. But it was thought to be at present more conducive to the public good, to retain on the list all those medicines which were believed to be so much in use in any part of the United States, that their omission would occasion inconvenience to physicians and apothecaries, and render the book less applicable to their wants.

In regard to indigenous vegetables, a considerable number, no doubt, possess important and useful properties; others have pretensions not yet fully settled.
But, as it happens in most countries, the number of simples occasionally employed in practice is much greater than it suits the proper compass of a Pharmacopoeia to contain. In the present work, those native articles have been introduced which were considered to possess qualities sufficiently important, or which were found to be so much employed by practitioners, as to give them any claim to the character of standard medicines. In several instances native plants have been substituted for European ones of the same genus, where their qualities were esteemed the same.

With a view of discriminating between articles of decided reputation or general use, and those, the claims of which are of a more uncertain kind; the Convention determined to refer to a secondary list such substances as were deemed of secondary or doubtful efficacy, retaining only on the principal list articles which might be considered of standard character. In the execution of this measure, particularly in the case of new medicines, they have possibly consigned to the secondary list some articles of more efficacy than others which they have retained on the primary one. In doubtful cases they have preferred to swell the subordinate rather than the primary catalogue, especially as this arrangement will be most likely to prompt farther investigations into the character of the substances in question.

In that part of the work which contains the formule for the preparations and compositions, the Convention have preserved those only which have received the sanction of the faculty in this country or in
Europe. They have thought it their duty to insert all which were reported to them by the District conventions, except in cases where the near similarity of two preparations has rendered one of them superfluous. Alterations of established formulae have been avoided, unless it be where the convenience and simplicity of medicines could be promoted without changing their operation or activity.

Those compound substances which are prepared in the large way at manufactories, and which are to be kept by the apothecary, though not necessarily prepared by him, are inserted on the Materia Medica list. Those which are to be made by the apothecary alone, are placed among the preparations and compositions.

It has been endeavoured that the nomenclature adopted in this work should be conformable to the present language of science, divested of as much of its prolixity as can be done consistently with clearness and distinctness. It is conceded that the essential properties of names ought to be expressiveness, brevity and dissimilarity. Where these qualities can be preserved without too great a departure from language previously in use, they afford the best grounds of a convenient and intelligible nomenclature.

In the designation of articles derived from the vegetable or animal kingdom, the Edinburgh college has of late adopted the whole systematic name of the plant or animal which affords the medicine. The Loudon college has made use in most instances of a shorter officinal name, in the genitive case, adding to
it the name of the part which is employed. In the American Pharmacopoeia a single word is always used for the officinal name of the medicine wherever such a word is expressive, and without ambiguity. For example the name Jalapa is used instead of Convolvulus Jalapa of the Edinburgh Pharmacopoeia, and Jalapae Radix of the London; Colocynthis, instead of Cucumis Colocynthis and Colocynthidis Pulpa; &c. The advantages of this mode are, that the name stands in the nominative case; that it expresses the medicine, and nothing else; that it is short and explicit, and does not require to be mutilated in practical use, as long names will inevitably be. The omission, in the Pharmaceutical name, of the word which expresses the part used, is not, as has been urged,* a sacrifice of propriety to brevity; nor does it involve the alleged absurdity of transferring the name of the whole plant to one of its parts. The words Jalapa, Ipecacuanha, Colocynthis, Senna, and others of the same kind, are not, strictly speaking, the names of any plants, but the names of drugs and medicines. The substance which in English we call Jalap, is the root of a plant, the universally received scientific name of which is Convolvulus Jalapa. In strict accuracy, then, we must designate this drug by the circuitous name of Convolvuli Jalapae Radix, or by the simple name of Jalapa.

The chief advantage of the Edinburgh nomenclature is, that it points out accurately the source from which each substance is, or ought to be derived. The London college have in their last edition attained the same object by adding in a separate column the scientific term which indicates the source from which the medicine is procured. It has been thought best to pursue a similar plan in the American Pharmacopoeia, and to dispose the Materia Medica in two columns, the first of which contains the officinal name in Latin and English; while the second contains the corresponding scientific term, or the systematic name of the plant, animal or mineral, from which each substance is derived, with references for the sake of identification to authors who have described it; a designation of the part to be used, and occasional explanations.

Brevity in the officinal names has been adhered to, wherever a distinct and expressive term was afforded by the common name of the article, or the generic or specific name of the plant or animal producing it. But in a few cases, single terms of this kind could not be employed without ambiguity, and it was thought better to adopt a double name previously in use, than to incur the evil of too great innovation by inventing a new word. This has happened where two parts of the same plant are used, as Guaiaci lignum and Guaiaci resina; or where two plants occurred of the same genus, the specific names of which could not be used alone, as Mentha piperita and Mentha viridis. In some cases of this kind a single term has been applied by way of eminence to the article most used, and a
double name to one of inferior note, as Gentiana and Gentiana Catesbœi.

The rule of brevity, and likewise the authority of the latest Pharmacopoeias, has in a small number of individual cases been departed from, for sufficient reasons. The motive has generally been a desire to preserve distinctness, and a preference to restore an old name, rather than to adopt a new one which was equivocal and partially received.

In the nomenclature of chemical substances the Convention have followed the modern language of chemistry, as it is most generally received at the present day. They have pursued the example of the London Pharmacopoeia in placing the base of a compound body at the beginning of the name, this being considered the most distinct way of presenting it. A few names of inconvenient length have been superseded by shorter terms, on previous pharmaceutical authority. Under a like sanction, pharmaceutical names have in a few instances been substituted for more accurate chemical ones, when the similarity of the latter was considered to produce danger of mistake between dissimilar substances. This has been done particularly in the combinations of mercury with the muriatic acid.

In the arrangement of the preparations and compositions, the alphabetical order of the subjects has been adopted, as the most convenient method for reference.

Pharmacopoeias have most frequently been published in the Latin language. The Latin having long been the common language of scientific men, and the
medium of technical phraseology, no well educated physician or apothecary is unacquainted with it. Its conciseness and precision have brought it into common use in the prescriptions of physicians and the formule of medical writers. From the weight due to considerations of this sort, the publishing committee, while they have written out the entire work in English, have thought it proper to present not only the nomenclature, but all the essential parts of the work in Latin also. They have further felt justified in this measure by the belief that the book is thus rendered more intelligible to foreigners, and more useful in those districts of the United States where the French and German languages continue to be spoken.
MATERIA MEDICA,

OR A CATALOGUE OF SIMPLE MEDICINES, TOGETHER WITH SOME PREPARED MEDICINES, WHICH ARE KEPT IN THE SHOP OF THE APOTHECARY, BUT NOT NECESSARILY PREPARED BY HIM.

The first column contains the officinal name of each article, in Latin and English. The second contains the corresponding scientific term, or the systematic name of the animal or vegetable from which the medicine is derived; likewise the part designated to be used, with the references to authors and occasional explanations.

| **Assafetida.** | Gummi resina. *The gum resin.* |
| **AURANTII CORTEX.** | Citrus aurantium. *W.* III. 1427. |
| **Orange peel.** | Cortex fructûs. *The rind of the fruit.* |
| **AURUM.** | Aurum. |
| **Gold.** | |
| **AVENÆ FARINA.** | Avena sativa. *W.* I. 446. |
| **Oatmeal.** | Farina. *The meal.* |
| **BARYTÆ SULPHAS.** | Barytæ sulphas. |
| **Sulphate of baryta.** | |
| **BELLADONNA.** | Atropa belladonna. *W.* I. 1017. |
| **Deadly nightshade.** | Folia. *The leaves.* |
| **BENZOINUM.** | Styrax benzoin. *W.* II. 623. |
| **Benzoin.** | Balsamum. *The balsam.* |
| **BISMUTHUM.** | Bismuthum. |
| **Bismuth.** | |
| **CAJUPUTI OLEUM.** | Melaleuca cajuputi. *Lond.* 3. |
| **Cajuput oil.** | Oleum volatile. *The volatile oil.* |
| **CALX.** | Calx. |
| **Lime.** | |
Calcis carbonas.  
**Carbonate of lime.**
1. Durus, Hard, called *Marble*.
2. Mollis, Soft, called *Chalk*.

Calcis phosphas.  
**Phosphate of lime.**

Camphora.  

Canella.  
*Canella alba.* W. II. 351.
*Canella.*  
*Cortex. The bark.*

Cantharides.  
*Cantharis vesicatorius.* *Oliv.* V. 277.
*Cantharides.*  
*Meloc vesicatorius. L.*
*Lytta vesicatoria. Fabricius.*

Cantharides vittatæ.  
*Cantharis vittata.* *Oliv.* V. 279.
*Potato flies.*
*Lytta vittata. Fabricius.*

Capsicum.  
*Capsicum annuum.* W. I. 1050.
*Cayenne pepper.*  
*Fructus. The fruit.*

Carbo ligni.  
*Charcoal.*

Cardamomum.  
*Amomum repens.* W. I. 9.
*Cardamom.*  
*Elettaria cardamomum.* *Maton Tr.*
*Lin. Soc.—Semina. The seeds.*

Carum.  
*Carum carui.* W. I. 1470.
*Caraway.*  
*Semina. The seeds.*
Clove.  Gemmæ florales.  The flower buds.

Caryophyllorum oleum.  Eugenia caryophyllata.
Oil of cloves.  Oleum volatile.  The volatile oil.

Cascarilla.  Cortex.  The bark.

Cassia fistula.  Cassia fistula.  W. II. 518.
Purging cassia.  Pulpa.  The pulp of the pods.

Cassissa marilandica.  Cassia marilandica.  W. II. 524.
American senna.  Bw. II. 166.  Bn. I. 137.
Planta.  The plant.

Castor.  Castoreum.  The castor.

Catechu.  Acacia catechu.  W. IV. 1079.
Catechu.  Mimosa catechu.  L.
Extractum.  The extract.

Cera.  Apis mellifica.
Wax.  Favus fusus.  The melted comb.
1. Flava.  Yellow.

Cerevisiae fermentum.  Cerevisiae fermentum.
Yeast.

Chenopodium.  Chenopodium anthelminticum.  W.
Planta.  The plant.
Cinchona.

Peruvian bark.

   Pale bark. Cortex. The bark.
   Red bark. Cortex. The bark.
   Yellow bark. Cortex. The bark.

Cinnamomum.

Cinnamon.

Laurus cinnamomum. W. II. 477.
Cortex. The bark.

Cinnamomi oleum.

Oil of cinnamon.

Laurus cinnamomum.
Oleum volatile. The volatile oil.

Colchicum.

Meadow saffron.

Colchicum autumnale. W. II. 272.
Radix. The root.

Colocynthis.

Colocynth.

Cucumis colocynthis. W. IV. 611.
Fructus, cortice seminisibusque abjectis. The fruit deprived of its rind and seeds.

Colomba.

Columbo.

Radix. A root. The plant unknown.

Conium.

Hemlock.

Conium maculatum. W. I. 1395.
Bzv. I. 113.
Folia. The leaves.

Copaiba.

Copaiba.

Copiasera officinalis. W. II. 630.
Balsamum. The balsam.

Hydrargyrum. Hydrargyrum.

Icthyocola. Accipenser huso, and some other species.—Vesica natoria. The swimming bladder.

Bw. III. 45.

Baccae.  The berries.

Red cedar.

Bw. III. 50.

Folia.  The leaves.

Extractum.  The extract.  Also from other plants.

Lactuca sativa.  W. III. 1523.

Lactuca sativa.  W. III. 1523.

Succus concretus.  The concrete juice.

Laurus cassia.  Laurus cassia.  W. II. 477.

Cassia bark.  Cortex.  The bark.

Lavandula.  Lavandula spica.  W. III. 60.

Lavender.  Flores.  The flowers.

Lichen Islandicus.  Lichen Islandicus.

Planta.  The plant.

Citrus medica.  W. III. 1426.

Limon.  Lemon.

Fructus.  The fruit.

Citrus medica.

Limonis oleum.  Oil of lemon.

Oleum volatile corticis fructus.  The volatile oil of the rind of the fruit.

Linum usitatissimum.  W. I. 1533.

Lini semina.  Flaxseed.

Semina.  The seeds.
LINI OLEUM. Linum usitatissimum.
Flaxseed oil. Oleum fixum seminis. The fixed oil of the seeds.

Called Linseed Oil.

LIRIODENDRON. Liriodendron tulipifera. W. II.
Cortex. The bark.

Indian tobacco. 177. Bn. I. 131.
Herba. The herb.

MAGNESIÆ CARBONAS. Magnesia carbonas.
Carbonate of magnesia.

MAGNESIÆ SULPHAS. Magnesia sulphas.
Sulphate of magnesia.
Called Epsom Salt.

MENNA. Fraxinus ornus. W. IV. 1104.
Manna. Succus concretus. The concrete juice.

MEL. Apis mellifica.
Honey. Mel. The honey.

MENTHA PIPERITA. Mentha piperita. W. III. 79.
Peppermint. Herba. The herb.

MENTHA VIRIDIS. Mentha viridis. W. III. 76.
Spear mint. Herba. The herb.
Mezereon. Cortex radicis. The bark of the root.

Musk. Moschus. The musk.

Nutmeg. Nucleus. The kernel of the fruit.

Myristicæ oleum. Myristica moschata.
Oil of nutmeg. Oleum nuclei fixo-volatile. The compound oil of the kernel.
Called Oil of mace.

Balsam of Peru. Balsamum. The balsam.

Myrrh.

Vomic nut. Semina. The seeds.

Olivæ oleum. Olea Europæa. W. I. 44.
Olive oil. Oleum fructus. The oil of the fruit.

Opium. Papaver somniferum. W. II. 1147.
Opium. Succus concretus. The concrete juice.

Wild marjoram. Herba. The herb.
Phosphorus.

Phytolacca.

Pimenta.
Piper.

Pix abietis.

Pix liquida.

Plumbum.

Plumbi oxydum semivitreum.

Plumbi subcarbonas.

Potassæ nitras. Potassæ nitras.
Nitrate of potass. Called Nitre.

Potassæ subcarbonas impurus. Potassæ subcarbonas impurus.
Impure subcarbonate of potass. Called Pearl ash.

Potassæ supertartraras. Potassæ supertartraras.
Supertartrate of potass. Called Cream of Tartar.

Pine resin.  Terebinthina oleo dempto.  The residuum after the distillation of oil of turpentine.

Rhubarb.  Radix.  The root.

Ricini oleum.  Ricinus communis.  W. IV. 564.  

Castor oil.  Oleum fixum seminis.  The fixed oil of the seed.

Rose.  Petala.  The petals.

Rosemary.  Cacumina.  The tops.

L.—Planta.  The plant.

Savin.  Folia.  The leaves.

Sugar.  Saccharum purificatum.  The refined sugar.

Sago.  Cycas circinalis.  

Salep. Orchis mascula. W. IV. 18. and
Salep. Orchis morio.—Fœcula radicis.

The fœcula of the root.

Salix. Salix eriocephala. Mx. II. 225. and
Willow. some other species.

Cortex. The bark.

Elder. Baccæ. The berries.

Sanguinaria. Sanguinaria Canadensis. W. II.

Radix. The root.

Sapo. Sapo Hispanicus.
Castile soap.

Sarsaparilla. Radix. The root.

Sassafras. II. 142.

Cortex radicis. The bark of the root.

Scammony. Gummi resina. The gum resin.

Squill. Radix. The root.

Seneca snake root. Bw. II. 97. Bn. II. 111.

Radix. The root.
Senna. Cassia senna. W. II. 520.
Senna. Folia. The leaves.

Serpentaria. Aristolochia Serpentaria. W. IV.
Radix. The root.

Suet. Sevum. The suet.

Simarouba. Quassia simarouba. W. II. 568.
Simarouba. Cortex. The bark.

Mustard. Semina. The seeds.

Sodē muriās. Sodae muriās.
Muriate of soda.
Called Sea salt.

Sodē subboras. Sodae subboras.
Subborate of soda.
Called Borax.

Sodē subcarbonas. Sodae subcarbonas.
Subcarbonate of soda.

Sodē sulphas. Sodae sulphas.
Sulphate of soda.
Called Glaubers salt.

Spermaceti. The spermaceti.
Spigelia.  
*Carolina pink.*  
Spigelia marilandica.

*Sponge.*  
Spongia officinalis.  
*G.* 32820.

Stannum.  
*Tin.*  
Stannum.

Statice.  
*Marsh rosemary.*  
Statice Caroliniana.  
*Walter Flor.*  
*Car.* 118.  
*Bw.* II. 51.  
Radix.  *The root.*

Stramonium.  
*Thorn apple.*  
Datura stramonium.  
*W.* I. 1008.  
*Bw.* I. 17.  
Folia.  *The leaves.*

Stramonii semina.  
*Thorn apple seeds.*  
Datura stramonium.  
Semina.  *The seeds.*

Succinum.  
*Amber.*  
Succinum.

Sulphur.  
*Sulphur.*  
Sulphur sublimatum et lotum.

Tabacum.  
*Tobacco.*  
Nicotiana tabacum.  
*W.* I. 1014.  
*Bw.* II. 171.  
Folia.  *The leaves.*

Tamarindus.  
*Tamarind.*  
Tamarindus Indica.  
*W.* III. 577.  
Fructus conditus.  *The preserved fruit.*
Tapioca.  Fœcula radicis.  The fœcula of the root.

Terebinthina.  Terebinthina.  The turpentine.

Terebinthinae oleum.  Ejusdem oleum volatile.  The volatile oil of the preceding article.

Balsamum.  The balsam.

Canada balsam.

Tolutanum.  Toluifera balsamum.  W. II. 545.

Tolu.  Balsamum.  The balsam.

Tragacantha.  Astragalus verus.  Lond. 49.

Tragacanth.  Gummi.  The gum.

Slippery elm.  Liber.  The inner bark.

Raisins.  Fructus siccatus.  The dried fruit.

Uva ursi.  Arbutus uva ursi.  W. II. 618.

Uva ursi.  Bw. I. 66.

Folia.  The leaves.

Zincum. Zinc.

Sulphate of zinc.  Called White vitriol.

Trans.—Radix.  The root.
SECONDARY LIST.

Aletris.
Star grass.

Angelica.

Apoecynum.
Dog’s bane.

Aralia nudicaulis.
False sarsaparilla.

Aralia spinosa.
Angelica tree.

Arnica.
Leopard’s bane.

Arum.
Dragon root.

Aletris farinosa. W. II. 183. Bw. III. 94.
Radix. The root.

Angelica atropurpurea. W. I. 1430.
Planta. The plant.

Radix. The root.

Aralia nudicaulis. W. I. 1521.
Radix. The root.

Aralia spinosa. W. I. 1521.
Cortex. The bark.

Arnica montana. W. III. 2106.
Planta. The plant.

Arum triphyllum. W. IV. 480.
Bw. I. 52.
Radix. The root.
Radix. The root.

Flesh coloured asclepias. Radix. The root.

Asclepias tuberosa. Asclepias tuberosa. W. I. 1268.
Radix. The root.

Azedarach. Cortex. The bark.

Bitumen. Bitumen.

Sweet flag root. Bn. II. 63.
Radix. The root.

Carrot. Semina. The seed.

Dyer’s saffron. Flores. The flowers.

Chinquapin. Cortex. The bark.

Erythronium.  34.  Bw. III. 151.
Planta.  The plant.

Eupatorium purpureum.  Eupatorium purpureum.  W. III.
Gravel root.  1759.—Radix.  The root.

Gaultheria.  Gaultheria procumbens.  W. II.
Folia.  The leaves.

Blue gentian.  Radix.  The root.

Pomegranate.  Cortex fructus.  The rind of the fruit.

Heracleum.  Heracleum lanatum.  Mx. I. 166.
Masterwort.  Radix.  The root.

Iris Florentina.  Iris Florentina.  W. I. 236.
Florentine orris.  Radix.  The root.

Blue flag.  I. 155.—Radix.  The root.

Cortex.  The bark.  Also the bark of *Magnolia acuminata* and *M. tripetala*.

Marrubium.  Marrubium vulgare.
Horehound.  Herba.  The herb.

Monarda.  Herba.  The herb.

Marjoram.  Herba.  The herb.

Polypodium.  Polypodium filix mas.
Polypody.  Radix.  The root.

Cortex.  The bark.

Notas apposuimus quibus quamque mensuram designamus.
WEIGHTS AND MEASURES.

To express the quantity of solid bodies; we employ the kind of weight, which in common language is denominated *Troy Weight*, and divide the pound in the following manner.

The pound, $\#$ contains

- Twelve ounces, $\mathfrak{z}$
- Eight drachms, $\mathfrak{z}$
- Three scruples, $\mathfrak{z}$
- Twenty grains, $\text{gr.}$

We have added the signs by which the several weights are denoted.

To express the quantity of liquids, we employ the measures which are derived from the wine gallon, and for medical purposes we divide it in the following manner.

The gallon, cong. contains

- Eight pints, $\mathfrak{O}$
- Sixteen fluidounces, $\mathfrak{fz}$
- Eight fluidrachms, $\mathfrak{fz}$
- Sixty minimis, $\text{m}$

We have added the signs by which we denote the several measures.
ACETA MEDICATA.

ACETUM OPII.

R Opii libram dimidiam.
    Aceti octantes tres.
    Myristicæ contusæ unciam unam, cum semisse.
    Croci unciam dimidiam.

Ad spissitudinem idoneam coque; dein adde
    Sacchari uncias quatuor;
    Cerevisiae fermenti fluidunciam unam

Digere per septem hebdomadas; dein coelo aperto, donec fiat syrupus, expone. Denique effunde, cola, et vasis vitris, pauxillo sacchari unicuique vasi addito include.

ACETUM SCILLÆ.

R Scillæ siccatae uncias duas.
    Aceti purificati octantes duos cum semisse.
    Alcoholis fluidencias tres.

Macera scillam in aceto per decem dies, dein liquorem ex-prime, cui adde alcohol; et, cum faeces subsederint, purum effunde liquorem.
MEDICATED VINEGARS.

VINEGAR OF OPIUM.

COMMONLY CALLED BLACK DROP.

Take of Opium, half a pound.
Vinegar, three pints.
Nutmeg, bruised, one ounce and a half.
Saffron, half an ounce.

Boil them to a proper consistence, then add
Sugar, four ounces.
Yeast, one fluid ounce.

Digest for seven weeks, then place in the open air until it becomes a syrup; lastly, decant, filter, and bottle it up, adding a little sugar to each bottle.

VINEGAR OF SQUILL.

Take of Squill, dried, two ounces.
Purified vinegar, two pints and a half.
Alcohol, three fluid ounces.

Macerate the squill in the vinegar for ten days; then press out the liquor, to which add the alcohol; and when the dregs have subsided, pour off the clear liquor.
ACIDA.

ACETUM DISTILLATUM.

R Aceti octantes octo.

Distillent in vasis vitreis aquae balneo. Octante primo stil- lato rejecto, octantes sex proximos serva.

ACETUM PURIFICATUM.

R Aceti congium unum.

Carbonis ligni recentis, in pulverem redacti, unciam unam.

Carbonem aceto admisce, dein liquorem serefav, despuma, cola per laneum duplicem; et postea, vel per chartam cola, vel, dum subsidente facies, relinque.

ACIDUM BENZOICUM.

R Benzoini quantumvis.

Liqua in retorta cervice lata, cui aptatus est excipulus non lutulatus, et calore leni sublima: a tubo retortæ materiam subli- matam, ne nimis accumuletur, remove subinde. Si oleo sit in- quinata, inter chartæ bibulae plicas involve; dein fortiter preme, et denuo sublima.
ACIDS.

DISTILLED VINEGAR.

Take of Vinegar, eight pints.

Distil in glass vessels, on a water bath. Throw away the first pint which comes over, and preserve the next six pints.

PURIFIED VINEGAR.

Take of Vinegar, one gallon.
Charcoal, fresh burnt and pulverized, one ounce.

Mix the charcoal and vinegar; then bring the liquor to a boiling heat, skim, strain through double flannel, and afterwards filter through paper, or suffer the impurities to subside.

BENZOIC ACID.

Take of Benzoin, any quantity.

Liquify it in a wide necked retort, having a receiver fitted to it, but not luted, and sublime with a gentle heat. Remove the sublimed matter occasionally from the tube of the retort, lest it accumulate in too great quantity. If it be soiled with oil, wrap it between folds of blotting paper, then press it strongly, and repeat the sublimation.
ACIDUM CARBONICUM.

R Calcis carbonatis, in pulvere crasso quantumvis.

Huic superinfunde aquae ad tegendum sati; deinde adde paulatim acidum sulphuricum, donec non amplius elicitur aer.

ACIDUM CITRICUM.

R Limonum succi octantem unum.

Calcis carbonatis præparati unciam unam, seu, quantum ad succum saturandum sit satis.

Acidi sulphurici diluti fluiduncias novem.

Calcis carbonatem succo fervefacto paulatim adde et agitando misce; deinde liquorem effunde. Citratem calcis remanentem, aqua calida sæpius renovata, ablue; deinde sicca. Pulveri siccato adde acidum sulphuricum dilutum et per horæ partem sextam eoque: dein per linteum fortiter exprime; et postea per chartam cola. Latex purus expressus, calore leni, vaporet, ut inter frigescendum, sint crystalli.

Ad crystallos puras reddendas, in aqua iterum atque tertium solve; et toties liquorem cola, decoque, et, dum sint crystalli, sepone.

ACIDUM SULPHURICUM DILUTUM.

R Acidi sulphurici fluidunciam unam.

Aquæ fluiduncias septem.

Misce paulatim.
ACIDS.

CARBONIC ACID.

Take of Carbonate of lime, in coarse powder, any quantity.

Pour upon it so much water as shall completely cover it; then add, by small quantities at a time, sulphuric acid until the gas ceases to be extricated.

CITRIC ACID.

Take of The juice of lemons, one pint.

Carbonate of lime prepared, one ounce, or as much as may be sufficient to saturate the juice.

Diluted sulphuric acid, nine fluid ounces.

Add the carbonate of lime by small portions at a time to the juice, whilst boiling, and mix it by stirring; then pour off the liquor. Wash the citrate of lime which remains by repeated additions of fresh warm water, and then dry it. Add the diluted sulphuric acid to the dried powder, and boil it for ten minutes; then press it strongly through a linen cloth, and afterwards filter it through paper. Let the clear liquor which has passed be evaporated in a gentle heat, so that crystals may form as it gets cold.

To render these crystals pure, dissolve them a second and a third time in water, and after each solution filter the liquor, boil it down, and set it by to crystallize.

DILUTED SULPHURIC ACID.

Take of Sulphuric acid, one fluid ounce.

Water, seven fluid ounces.

Mix them gradually.
ACIDUM PRUSSICUM.

R. Ferri Prussiatis unciás quatuor.
Hydrargyri nitrico-oxidi unciás duas cum semisse.
Aquæ distillæ octantem unum.

Coque in vase vitreo, donec hydrargyri oxidum prorsus evanuerit; liquorem cola; et postea, colo superinundo fluiduncias tres aquæ calidæ distillæ. Liquorem colatum retortæ vitreæ, cui cervix longa et tubulata est, infunde: et excipulus, fluidunciam unam aquæ distillatæ continens, aptetur. Excipulo sit tubus curvatus ad cyathum aquæ pertinens, ad hydrogenum aera auferendum. In retortam per os tubulatum unciás duas cum semisse ramentorum ferri purificatorum introducas; et postea, unciás duas acidi sulphurici. Excipulum, vel glacie, vel aquæ frigidissimæ circunda; et a balneo arenæ unciæ tres, sine bulliendo distillent.

ÆTHEREA.

ÆETHER SULPHURICUS.

R. Alcholis.
Acidi sulphurici, singulorum libram cum semisse.

Alcohol retortæ vitreæ infunde, eique acidum paulatim adjice, sæpius agitans, et cavens né gradum centesimæm vigesimæm calor excedat, donec miscæuntur. Dein in arenam, ad gradum ducentesimæm prius calefactam, caute impone, ut quam celerrime ebulliat liquor, transeatque æther in excipulum tubulatum, cui
ACIDS.—ETHER.

PRUSSIC ACID.

Take of Prussiate of iron, four ounces.
Nitric oxide of mercury, two ounces and a half.
Distilled water, one pint.

Boil in a glass vessel until the oxide of mercury has wholly disappeared; filter the solution, and afterwards pour upon the strainer three fluid ounces of hot distilled water. Put the filtered solution into a long necked and tubulated glass retort, and adapt a receiver containing one fluid ounce of distilled water. The receiver should have a bent tube extending from it to a cup of water, to carry off the hydrogen gas. Introduce two ounces of purified iron filings through the tubulure into the retort, and afterwards, two ounces (by weight) of sulphuric acid. Surround the receiver with ice, or very cold water, and distil without boiling, from a sand bath, three ounces.

PREPARATIONS OF ETHER.

SULPHURIC ETHER.

Take of Alcohol.
Sulphuric acid each a pound and a half.

Pour the alcohol into a glass retort, then gradually add to it the acid, shaking it after each addition, and taking care that their temperature during the mixture do not exceed 120 Fahr. Immerse the retort very cautiously in a sand bath, previously heated to 200 so that the liquor may boil as speedily as possible,
aptatum est vas recipiens glacie vel aquâ refrigeratum. Distillet liquor, donec pars aliqua gravior transire incipiet, quae sub æthere, in fundo receptaculi conspicitur. Liquori in retorta restanti rursus alcoholis uncias duodecim affunde, ut similis modo distillet æther.

OLEUM ÆHEREUM.

Post distillationem ætheris sulphurici, lenito calore distillet iterum liquor, donec spuma nigra intumescat; tum protinus ab igne retortam remove. Liquori qui restat in retortâ, aquam adjice, ut supernatet pars oleosa. Hanc aufer, eique admisce aquæ calcis quantum sit, ad acidum, quod inest, saturandum, et simul agita. Denique oleum æthereum separatum exime.

SPIRITUS ÆHERIS SULPHURICI.

R. Ætheris sulphurici octantem dimidium.
Alcoholis octantem unum.

Misce.

SPIRITUS ÆHERIS SULPHURICI COMPOSITUS.

R. Spiritus ætheris sulphurici octantem unum.
Olei ætherei fluidrachmas duas.

Misce.
and let the ether pass over into a tubulated receiver, to the
tubulure of which another receiver is applied, which is to be
kept cold by immersion in ice or water. Distil the liquor until
the heavier part also begins to pass over and appear under the
ether in the bottom of the receiver. To the liquor which re-
 mains in the retort, pour on one pint more of alcohol, and repeat
the distillation in the same manner.

ETHEREAL OIL.

After the distillation of sulphuric ether, carry on the distilla-
tion with a less degree of heat until a black froth begins to rise:
then immediately remove the retort from the fire. Add suffi-
cient water to the liquor in the retort, that the oily parts may
float upon the surface. Separate this and add to it as much lime
water as may be necessary to neutralize the adherent acid, and
shake them together. Lastly collect the ethereal oil which separa-
ates.

SPIRIT OF SULPHURIC ETHER.

Take of Sulphuric ether half a pint.
Alcohol one pint.
Mix.

COMPOUND SPIRIT OF SULPHURIC ETHER.

FORMERLY HOFFMAN'S ANODYNE LIQUOR.

Take of Spirit of sulphuric ether one pint.
Ethereal oil two fluid drachms.
Mix.
ÆTHEREA.—ALCOHOL.—ALUMEN.

SPIRITUS ÆTHERIS NITROSI.

R. Alcoholis octantes duos.
Acidi nitrici, uncias tres.

Alcoholi acidum paulatim adjice, et misce, cavens ne gradum centesimum vigesimum calor excedat: tum leni calore, distillent fluidunciae viginti quatuor.

—

ALCOHOL.

—

ALCOHOL DILUTUM.

R. Alcoholis octantem unum.
Aquæ distillatae octantem unum.

Misce.

—

ALUMEN.

—

ALUMEN EXSICCATUM.

R. Aluminis quantumvis.

In vase vel sectili vel ferreo super igne liquefact, et cum cessaverit ebullitio, remove.
SPIRIT OF NITROUS ETHER.

Take of Alcohol two pints.
Nitric acid, three ounces.

Mix them very gradually together by pouring the acid into the alcohol, and taking care that the heat during the mixture does not exceed 120. Then, by means of a gentle heat, distil twenty-four fluid ounces.

ALCOHOL.

DILUTED ALCOHOL.

Take of Alcohol, one pint.
Distilled water, one pint.
Mix.

ALUM.

DRIED ALUM.

Take of Alum, any quantity.

Melt it in an earthen or iron vessel over the fire, and remove it when it ceases to boil.
AMMONIA.

ALCOHOL AMMONIATUM.

R. Alcoho lis octantes duos.
Calcis recentis libram unam.
Ammoniæ muriatis in pulverem redacti uncias octo.
Aquæ octantem dimidium.

Calci adjice aquam, et, dum calx macerando dilabitur, sepone; dein calcem intromitte in retortam vitream arenæ balneo superimpositam, cujus cervici aptatus est excipulus, qui frigidus servandus est; calci immitte ammoniæ muriatem et alcohol, et lento igni distillent, donec liquor in excipulo ad octantem cum semisse creverit.

AMMONIÆ ACETAS LIQUIDUS.

R. Ammoniæ carbonatis, in pulverem redacti quantumvis.

Adde paulatim et sæpe agitando, aceti purificati quantum ad saturandum accurate ammoniæ carbonatem sufficerit.

AQUA AMMONIÆ.

R. Ammoniæ muriatis in pulverem redacti libram unam.
Calcis recentis libram unam cum semisse.
Aquæ congiunm unum.

Calci adjice aquæ octantes duos et dum calx macerando dilabitur sepone: dein calcem intromitte in retortam vitream arenæ
AMMONIA.

AMMONIATED ALCOHOL.

Take of Alcohol, two pints.
  Lime, recently burnt, one pound.
  Muriate of ammonia, in powder, eight ounces.
  Water, half a pint.

Add the water to the lime, let them stand till the lime is slack(ed); then put the lime into a glass retort resting on a sand bath, to the beak of which is connected a glass receiver, which is to be kept cold: add to the lime the muriate of ammonia and the alcohol, and distil with a slow fire until the liquid in the receiver amounts to one pint and a half.

LIQUID ACETATE OF AMMONIA.

COMMONLY CALLED SPIRIT OF MINDERERUS.

Take of Carbonate of ammonia, in powder, any quantity.

Add, by small portions, with frequent agitation, so much purified vinegar, as shall be sufficient exactly to saturate the carbonate of ammonia.

WATER OF AMMONIA.

Take of Muriate of ammonia, in powder, one pound.
  Lime, fresh burnt, one pound and a half.
  Water, one gallon.

Add to the lime, two pints of the water; let them stand until the lime is slack(ed), then put the lime into a glass retort, resting
AMMONIA.

balneo superimpositam, cujus cervici aptatus est excipulus amplius qui frigidus servandus est. Calci ammoniae muriatem et aquam restantem adde, et igne leni distillent, donec liquor in excipulo ad octantes duos creverit.

AMMONIÆ CARBONAS.

R. Ammonia; muriatis libram unam.
Calcis carbonatis mollis siccati libram unam cum semisse.

In pulvere separatim redige dein assidue permisce; et ex retorta, in excipulum frigidum sublima.

AQUA AMMONIÆ CARBONATIS.

R. Ammonia; muriatis.
Potassæ carbonatis, utriusque uncias sexdecim
Aquæ octantes duos.

Salibus mistis, et retocta vitrearæ intromissis, aquam infunde, et in arenæ balneo, calore gradatim aucto, ad siccitatem fiat distillatio.

AMMONIÆ HYDROSULPHURETUM.

R. Aquæ ammoniae fluiduncias quatuor.

In apparatu chemico, subjice rivo aerio qui oritur ex
Antimonii sulphureti uncis quatuor.
Acidi muriatici uncis octo, prius aquæ octantibus duobus cum semisse dilutis.

Quod exinde oritur, in vase vitreo, accurate obturato, servetur.
on a sand bath, to the beak of which is connected a large glass receiver, which is to be kept cold; add to the lime the muriate of ammonia, and the remainder of the water; and distil with a slow fire, until the liquid in the receiver amount to two pints.

---

**CARBONATE OF AMMONIA.**

Take of Muriate of ammonia, one pound.
Soft carbonate of lime, dried, one pound and a half.

Having triturated them separately, mix them thoroughly, and sublime from a retort into a receiver kept cold.

---

**WATER OF CARBONATE OF AMMONIA.**

Take of Muriate of ammonia;
Carbonate of potass, each sixteen ounces.
Water, two pints.

Having mixed the salts and put them into a glass retort, pour the water upon them, and distil to dryness in a sand bath, gradually increasing the heat.

---

**HYDROSULPHURET OF AMMONIA.**

Take of Water of ammonia, four fluid ounces;

Subject it in a chemical apparatus to a stream of the gas, which arises from

- Sulphuret of antimony, four ounces.
- Muriatic acid, eight ounces, previously diluted with two pints and a half of water.

Preserve the product in a close stopped glass vessel.
ANTIMONIUM.

PULVIS ANTIMONIALIS.

R. Antimonii sulphureti, in pulverem crassum triti, partem unam.
   Cornu cervi rasi, partes duas.

Misce, et in ollam ferream latam injice, igne rubentem, et assidue agita donec in materiam coloris cinerei usta fuerint, quam ab igne aufer, et in pulverem tere, et crucibulo loricato immitte; huic crucibulum aliud inversum, cui parvum sit in fundo foramen, luto conjunge, ignemque subministra, quem ad calorem cendantem sensim auge, et ita auctum serva per horas duas; denique materiam frigefactam in pulverem subtilissimum tere.

ANTIMONII MURIAS.

R. Antimonii oxidi;
   Acidi sulphurici, utriusque libram unam.
   Sodae muriatis exsiccatis libras duas.

Acidum sulphuricum retortae infunde, paulatim addens sodae muriatem et antimonii oxidum, prius commista; dein super arenam calidam fiat distillatio. Materia distillata per aliquot dies aeri pateat, ut liquescat; tum effundatur e faecibus pars liquida.
ANTIMONY.

ANTIMONIAL POWDER.

CALLED JAMES' POWDER.

Take of Sulphuret of antimony, in coarse powder, one part. Hartshorn, in shavings, two parts.

Mix and put them in a wide, red hot iron pot, and stir the mixture constantly, until it be burnt into a matter of an ash grey colour, which is to be then removed from the fire, ground into powder, and put into a coated crucible; lute to this crucible another inverted over it, and perforated in the bottom with a small hole, and apply the fire, which is to be raised gradually to a white heat, and kept in that increased state for two hours; lastly, grind the matter, when cold, into a very fine powder.

MURIATE OF ANTIMONY.

Take of Oxide of antimony;
   Sulphuric acid, of each, one pound.
   Dried muriate of soda, two pounds.

Pour the sulphuric acid into a retort, gradually adding the muriate of soda, and oxide of antimony, previously mixed. Then perform the distillation in a sand bath. Expose the distilled matter for several days to the air, that it may deliquesce, and then pour the liquor from the feces.
ANTIMONII OXIDUM.

R. Antimonii sulphureti;

Potassae nitratis, utriusque pondera paria.

Separatim trita, et bene commista injiciantur in crucibulum candens. Peracta deflagratione, materia rubescens a crusta albicante separetur, et teratur in pulverem, qui sápius lavetur aqua calidá, donec hác insipida maneat.

ANTIMONII OXIDUM VITRIFICATUM.

R. Antimonii sulphureti, quantumvis, in pulverem crassum, arenœ instar, contriti.

Insterne super vas fictile, non vitreatum, parum profundum, ignemique supponite lenem ut antimonii sulphuretum lente calétiat; pulverem interea assidue agitans, ne in grumos coéat. Vapores albi, sulphur olentes, ex eo orientur. Cúm hi, eodem calore deficiant, ignem auge aliquantum, ut iterum vapores exhalet; et sic perge, donec pulvis ignie tandem rubescens vapores non amplius exhalet. Pulvis ille crucibulo inditus liquecat igne violento, donec vitri liquefacti speciem induat; dein effundatur super laminam ãeneam caléfactam.

ANTIMONII OXIDUM VITRIFICATUM CUM CERA.

R Cerae flavæ, partem unam.

Antimonii oxidi vitrificati, partes octo.
OXIDE OF ANTIMONY.
FORMERLY CROCUS OF ANTIMONY.

Take of Sulphuret of antimony;
Nitrate of potass, of each equal weights.

After they are separately powdered and well mixed, let them be thrown into a red hot crucible. When the deflagration is over, separate the reddish matter from the whitish crust, and reduce it to a powder, which is to be repeatedly washed with hot water, till the water remains insipid.

VITRIFIED OXIDE OF ANTIMONY.
FORMERLY GLASS OF ANTIMONY.

Take of Sulphuret of antimony, any quantity, beat into coarse powder like sand.

Strew it upon an unglazed shallow earthen vessel, and place it over a gentle fire, that the sulphuret of antimony may be slowly heated, at the same time stirring the powder constantly, to prevent it from running into lumps. White vapours, having the odour of sulphur, will arise from it. When these cease with the degree of heat first applied, raise the heat a little, so that the vapours may arise again; go on in this manner, till the powder, brought to a red heat, exhales no more vapours. Melt this powder in a crucible, with an intense heat, till it assumes the appearance of melted glass; then pour it upon a heated brass plate.

VITRIFIED OXIDE OF ANTIMONY WITH WAX.
FORMERLY CERATED GLASS OF ANTIMONY.

Take of Yellow wax, one part.
Vitrified oxide of antimony, eight parts.
ANTIMONIUM.

Ceræ in vase ferreo liquifactae injice oxidum in pulverem trium, et torre. igne leni, per horæ quadrantes, spathulæ assidue agitans; dein effunde materiam, quæ frigefacta teratur in pulverem.

ANTIMONII SULPHURETUM PRÆCIPITATUM.

R. Aquæ potassæ, libras quatuor.
   Aquæ octantes tres.
   Antimonii sulphureti præparati, libras duas.

Coque in olla ferrea operta, super ignem lenem, per horas tres, sæpe agitans spathulæ ferreæ, et addens aquam prout opus fuerit. Liquorem calidum cola per linteum duplex, et colato addens acidi sulphurici diluti quantum satis sit ad dejiciendum sulphuretum, aquâ calidâ diligentiter lavandum.

ANTIMONII SULPHURETUM PRÆPARATUM.

Antimonii sulphuretum præparatur eodem modo ac calcis carbonas.

ANTIMONIUM TARTARIZATUM.

R. Antimonii in pulverem redacti partem unam.
   Acidi sulphurici partes duas.
Melt the wax in an iron vessel, and throw into it the powdered oxide; roast the mixture over a gentle fire, for a quarter of an hour, continually stirring it with a spatula; then pour it out, and, when cold, grind it into powder.

---

**PRECIPITATED SULPHURET OF ANTIMONY.**

**FORMERLY GOLDEN SULPHUR OF ANTIMONY.**

Take of Solution of potass, four pounds.
Water, three pints.
Prepared sulphuret of antimony, two pounds.

Boil them in a covered iron pot, over a slow fire, for three hours, frequently stirring the mixture with an iron spatula, and adding water as it may be required. Strain the hot liquor through a double linen cloth, and add to it, when strained, as much diluted sulphuric acid as may be necessary to precipitate the sulphuret, which must be well washed with warm water.

---

**PREPARED SULPHURET OF ANTIMONY.**

Sulphuret of antimony is prepared in the same way as carbonate of lime.

---

**TARTARIZED ANTIMONY.**

**FORMERLY TARTAR EMETIC.**

Take of Antimony, (the metal) in powder, one part.
Sulphuric acid, two parts.
In vase ferreo, aperto, ad siccitatem, spathula ferrea sæpe mixturam agitans, coque. Acidum adhuc liberum aqua ablue; et residuum sicca; cui potassæ supertartratem pari pondere, in aqua solutum adde. Dein in vase ferreo coque, cola, et, dum fiant crystalli, sepone. Liquor, qui restat, si iterum vaporatus et colatus, crystallos iterum deponet; si autem hæ minus lucidæ sint, denuo solvantur et deponantur.

---

**AQUÆ MEDICATÆ.**

**AQUA ACIDI CARBONICI.**

R. Aquæ quantumvis.

Huic, antlià condensanti, tantum acidi carbonici ingere, quantum volumen suum decies circiter superat.

---

**AQUA MAGNESIÆ.**

R. Aquæ congium unum.

Magnesiaæ carbonatis drachmas tres.

Misce, et antlià condensanti, tantum acidi carbonici ingere, quantum volumen suum decies circiter superat.

Hoc modo parantur

**AQUA POTASSÆ,**

Ex potassæ subcarbonatis uncia una.

---

**AQUA SODÆ.**

Ex sodæ subcarbonatis uncis duabus.
MEDICATED WATERS.

Boil them to dryness in an open iron vessel, frequently stirring the mixture with an iron spatula. Wash out all the uncombined acid, with water, and dry the residuum; to which add an equal weight of supertartrate of potass, dissolved in water; then boil in an iron vessel, filter, and set by to crystallize. The evaporation, filtration, and crystallization may be repeated with the fluid which remains; but if the crystals are not perfectly clear, they must be dissolved in water and recrystallized.

MEDICATED WATERS.

CARBONIC ACID WATER.
COMMONLY CALLED SELTZER WATER.

Take of Water, any quantity.

Impregnate it with about ten times its volume of carbonic acid gas, by means of a forcing pump.

MAGNESIA WATER.
COMMONLY CALLED LIQUID MAGNESIA.

Take of Water, one gallon.

Carbonate of magnesia, three drachms.

Mix, and impregnate it with about ten times its volume of carbonic acid gas, by means of a forcing pump.

In like manner are prepared

POTASS WATER,
From one ounce of subcarbonate of potass.

SODA WATER,
From two ounces of subcarbonate of soda.
AQUÆ DISTILLATAE.

AQUA AURANTII CORTICIS.

R. Aurantii corticis recentis libras duas.

His effundatur aquæ satis ad evitandum empyreuma. Post macerationem debitam distillentur octantes decem.

Hoc modo parantur

AQUA CINNAMOMI,
Ex cinnamomi contusi librâ unâ.

AQUA MENTHÆ PIPERITÆ,
Ex menthæ piperitæ florentis libris tribus.

AQUA MENTHÆ VIRIDIS,
Ex menthæ viridis florentis libris tribus.

AQUA ROSARUM,
Ex rosarum recentium libris sex.

Singulis harum aquarum octantibus adde alcoholis diluti fluidium dimidiam.

Aqua distillatae in lagenis vitreis obturatis serventur.

AQUA DISTILLATA.

Aquæ distilletur vasis permundis, donec ejus duo circiter treantes stillaverint. Aquam distillatam in lagena vitrea servato.
DISTILLED WATERS.

WATER OF ORANGE PEEL.

Take of Fresh orange peel, two pounds.

Pour upon it water enough to prevent empyreuma, and after due maceration distil ten pints.

In the same manner are prepared

CINNAMON WATER, 
From a pound of bruised cinnamon.

PEPPERMINT WATER, 
From three pounds of peppermint in flower.

SPEARMINT WATER, 
From three pounds of spearmint in flower.

ROSE WATER, 
From six pounds of fresh roses.

To every pint of distilled water add half a fluidounce of diluted alcohol.

Distilled waters should be kept in well stopped glass bottles.

DISTILLED WATER.

Let water be distilled in very clean vessels until about two thirds have come over, which is to be kept in a glass bottle.
ARGENTUM.—ARSENICUM.

ARGENTUM.

ARGENTI NITRAS.

R. Argenti puri, in laminas complanati, et minutatim connecti, unciam unam.
Acidi nitrici fluidunciam unam.
Aquae distillatae fluidencias duas.

ARSENICUM.

Liquor Potassæ Arseniatis.

R. Acidi arseniosi, in pulverem subtilem redacti;
Potassæ subcarbonatis, utriusque grana sexaginta quattuor.
Aquæ distillatae octantem unum.

In vase vitreō concoque donec acidum arseniosum omne resolvatur. Liquorem frigefactum in mensuram octariam infunde; et adde

Alcoholis fluidrachmas quatuor,

Et aquæ distillatae quantum suffecerit ad mensuram complendam.
SILVER.—

NITRATE OF SILVER.
FORMERLY LUNAR CAUSTIC.

Take of Pure silver, flattened into plates, and cut into pieces, one ounce.
Nitric acid, one fluidounce.
Distilled water, two fluidounces.

Mix the nitric acid and water, and dissolve the silver therein on a sand bath; then increase the heat gradually that the nitrate of silver may be dried. Melt the salt in a crucible over a slow fire, until the water being evaporated, it ceases to boil, and the mass flows like oil; then pour it quickly into moulds of convenient shape. Lastly, keep it in a glass vessel very well stopped, and secured from light.

ARSENIC.

ARSENICAL SOLUTION.

Take of Arsenious acid, in fine powder;
Subcarbonate of potass, each sixty-four grains.
Distilled water, one pint.

Boil them together in a glass vessel until the arsenic is entirely dissolved. When the solution is cold, pour it into a pint measure, and add thereto

Alcohol, four fluidrachms,

And so much distilled water, as shall fill up the measure.

**AURUM.**

**AURI MURIAS.**

R. Auri quantumvis.

---

**BARYTA.**

**BARYTE MURIAS.**

R. Barytae sulphatis, libras duas.

Carbonis ligni, in pulverem triti, uncias quatuor.

Igne torreatur sulphas, quò facilius teratur in pulverem teuissimum, cui bene admiscendus est pulvis carbonatis ligni. Indatur materies crucibulo, et, adaptato operculo, urgeatur igne forti per horas sex. Materia bene trita immittatur in aque bullientis octantes sex in vase vitreo vel sigulino, et agitatione permisceatur, aëris aditu, quantum fieri possit, occluso.

Stet vas in balneo vaporis, donec subsederit pars non soluta; dein effundatur liquor. Illi affundantur denuo aque bullientis octantes quatuor; quæ post agitationem et subsidentiam priori
GOLD.—BARYTA.

GOLD.

MURIATE OF GOLD.

Take of Pure gold, any quantity.

Dissolve it by means of a moderate heat, in a mixture formed by uniting one part of nitric acid with two parts of muriatic acid; evaporate the solution to dryness by a gentle heat; add to the residuum an equal weight of muriate of soda, and mix them thoroughly together. Dissolve the mixture in distilled water, and evaporate slowly to dryness. Collect the mass and keep it in a glass-stopped phial, which should be accurately closed, and preserved from the action of light.

BARYTA.

MURIATE OF BARYTA.

Take of Sulphate of baryta, two pounds.
Charcoal in powder, four ounces.

Roast the sulphate, that it may be more easily reduced to a very fine powder, with which the powdered charcoal is to be intimately mixed. Put the mixture into a crucible, and having fitted it with a cover, heat it with a strong fire for six hours. Then triturate the matter well, and throw it into six pints of water in an earthen or glass vessel, and mix them by agitation, preventing as much as possible the action of the air.

Let the vessel stand in a vapour bath until the part not dissolved shall subside, then pour off the liquor. On the undisolved part pour four pints more of boiling water, which, after agitation, and deposition, are to be added to the former liquor.
liquori addantur. Liquori adhibuc calido, vel si friguerit iterum calefacto, instiletur acidum muriaticum, quandiu moverit effervescentiam. Dein coletur, et vaporet ut crystalli formentur.

LIQUOR BARYTÆ MURIATIS.

R. Barytæ muriatis unciem unam.
Aquæ distillatæ fluidunciam tres.

Solve.

BISMUTHUM.

BISMUTHI SUBNITRAS.

R. Bismuthi unciem unam.
Acidi nitrici;
Aquæ, utriusque fluiduncias tres.

Acidum nitricum aquæ agitando admisce; tum bismuthum, mortario ferreo in pulverem subactum acido diluto gradatim adde; et vas, donec solutum fuerit metallum, seponse. Liquorem purum in vas vitreum amplum transfunde, et congium dividium aquæ distillatæ liquoris fluiduncæ unicuique infunde. Cum præcipitatum album subsederit, liquidum supernatans effunde; et additionem et transfusionem, donec aqua insipida evadet, itera. Pulverem albidum collectum, calore nullo adhibito, sicca; et in vase vitreo, luce exclusâ, serva.
Into the liquor, when still warm, or if it shall have cooled, again heated, drop muriatic acid as long as it excites any effervescence. Then strain it, and evaporate it so as to crystallize.

SOLUTION OF MURIATE OF BARYTA.

Take of Muriate of baryta, one ounce.
Distilled water, three fluidounces.
Dissolve.

BISMUTH.

SUB-NITRATE OF BISMUTH.

FORMERLY WHITE OXIDE OF BISMUTH.

Take of Bismuth, one ounce.
Nitric acid;
Water, each three fluidounces.

Add the water and nitric acid together with agitation, then reduce the bismuth to powder in an iron mortar. Add it by small portions at a time to the diluted acid, and allow the vessel to remain at rest, until the metal is dissolved. Decant the clear solution into a large glass vessel, and for every fluidounce of the liquid, pour in half a gallon of distilled water. When the white precipitate has subsided, pour off the supernatant liquid, and repeat the addition and decantation until the water comes off tasteless; collect the white powder, dry it without the application of heat, and keep it in a glass vessel secluded from light.
CALX.

AQUA CALCIS.

R. Calcis selibram.
Aqua distillatae ferventis octantes duodecim.

Calci aquam affunde, et simul agita; tum protinus vas contege, et sepone per horas tres; dein liquorem cum calce superstite in vasis vitreis obturatis serva, et, quandocunque utendum est, ex limpido liquore surne.

CALCIS CARBONAS PRÆPARATUS.

R. Calcis carbonatis mollis libram unam.
Calcis carbonati adjice aquæ paululum, et tere, ut fiat pulvis subtilis. Hunc in vas amplum aquà plenum conjice; tum agita, et, brevi morâ interpositâ, in vas aliud aquam adhuc turbidam supernatantem transmitte, et sepone, dum subsidat pulvis; deinique, rejecta aqua, pulverem exsicca.

LIQUOR CALCIS MURIATIS.

R. Calcis carbonatis durioris, in frusta contusi, uncias novem.
Acidi muriatici uncias sexdecim.
Aqua octantem dimidium.

Acidum cum aqua, misce, et frusta calcis carbonatis paulatim adde. Effervescentiâ finitâ, digere per horam; liquorem effunde, et per vaporationem ad siccitatem redige. Residuum solve in sesquialtero pondere aquae; et demum cola.
LIME.

LIME WATER.

Take of Lime, half a pound.
Boiling water, twelve pints.

Pour the water upon the lime and stir them together; next cover the vessel immediately, and let it stand for three hours; then keep the solution upon the remaining lime in stopped glass bottles, and pour off the clear liquor when it is wanted for use.

PREPARED CARBONATE OF LIME.

Take of Soft carbonate of lime, one pound.

Add a small quantity of water to the carbonate of lime, and grind it into a fine powder; throw this powder into a large vessel full of water, then stir it, and after a short interval, pour the supernatant turbid solution into another vessel, and set it by, that the powder may subside; lastly, having poured away the water, dry the powder.

SOLUTION OF MURIATE OF LIME.

Take of Hard carbonate of lime, broken in pieces, nine ounces.
Muriatic acid, sixteen ounces.
Water, half a pint.

Mix the acid with the water, and gradually add the pieces of lime. When the effervescence has ceased, digest them for an hour, pour off the liquor, and evaporate to dryness. Dissolve the residuum in its weight and a half of water, and, lastly, filter the solution.
CERATA.

Cerata parantur ex oleo vel adipe cum cera et resinâ in unum corpus redacto, quibus medicamenta varia sæpe commiscentur. Crassitudinem talem habere debent, ut in linamentum vel lin-teolum facile obducantur; sed ut non diffluant cum corpori apponantur.

CERATUM ARSENICI.

R. Cerati simplicis unciam unam.
   Acidi arseniosi in pulverem triti scrupulum unum.

Cerato igne emollito adjice acidum et misce.

CERATUM CANTHARIDUM.

R. Cææ flævæ;
   Resinæ pini;
   Olei olivæ singulorum partes duæ.
   Cantharidum in pulverem tritarum partes tres.

Cææ, resinæ et oleo prius simul liquefactis cantharides adjice, et assidue move donec refrixerint.

CERATUM JUNIPERI VIRGINIANI.

R. Cerati resinosi partes sex.
   Juniperi Virginiani in pulverem triti partem unam.

Cerato igne lento emollito juniperum adjice et misce.
CERATES.

Cerates are composed of oil or lard united with wax and resin, to which various medicaments are frequently added. They should be of such consistence that they may be easily spread on lint or linen, yet not melt or run when applied to the body.

CERATE OF ARSENIC.

Take of Simple cerate, one ounce.
Arsenious acid in powder, one scruple.

Soften the cerate, and mix in the acid.

CERATE OF CANTHARIDES.

Take of Yellow wax;
Pine resin;
Olive oil, each, two parts.
Cantharides in powder, three parts.

To the wax, resin and oil, previously melted together, add the cantharides, carefully stirring the whole until cool.

CERATE OF RED CEDAR.

Take of Resin cerate, six parts.
Red cedar in powder, one part.

To the cerate previously softened, add the cedar and mix.
CERATUM PLUMBI SUBACETATIS LIQUIDI.

R. Plumbi subacetatis liquidi fluiduncias duas cum semisse.

Ceræ flavæ uncias quatuor.
Olei olivæ fluiduncias novem.
Camphoræ drachmam dimidiam.

Ceram liquefactam cum olei fluidunciis octo misce: tum ab igne remove, et ubi primum lentescant liquor em plumbi subacetatis paulatim adjice, et assidue move spatha lignea donec refixerint. Denique cum his camphoram in reliquo oleo liquatam misce.

CERATUM PLUMBI SUBCARBONATIS COMPOSITUM.

R. Emplastri plumbi subcarbonatis compositi partes quinque.
Olei olivæ partem unam.

Emplastro liquefacto adjice oleum, assidue movens donec refixerint.

CERATUM RESINOSUM.

R. Adipis partes octo.

Resinæ pini partes quinque.
Ceræ flavæ partes duas.

Liquefac simul et assidue move donec refixerint.
CERATE WITH SUBACETATE OF LEAD.

GOULARD'S CERATE.

Take of Liquid subacetate of lead two fluidounces and a half.
Yellow wax, four ounces.
Olive oil, nine fluidounces.
Camphor, half a drachm.

Mix the wax, previously melted, with eight ounces of oil: remove the mixture from the fire, and when it begins to thicken, gradually pour in the liquid subacetate of lead, stirring constantly with a wooden spatula until cool. Lastly, add the camphor dissolved in the remainder of the oil, and mix.

CERATE OF SUBCARBONATE OF LEAD.

Take of Compound plaster of subcarbonate of lead, five parts.
Olive oil, one part.

To the plaster, previously melted, add the oil, stirring the whole constantly together until cool.

RESIN CERATE.

Take of Lard, eight parts.
Pine resin, five parts.
Yellow wax, two parts.

Melt and stir them together until cool.
CERATUM RESINOSUM COMPOSITUM.

R. Sevi;
Ceræ flavæ utriusque libram unam.
Resinae pini libram unam.
Terebinthinæ libram dimidiam.
Lini olei octantem dimidiam.

Liquefac simul, et per linteum exprime.

---

CERATUM SABINÆ.

R. Cerati resinosi partes sex.
Sabinæ foliorum in pulverem tritorum partem unam.

Cerato emollito sabinam adjice, et misce.

---

CERATUM SAPONIS.

R. Saponis uncias octo.
Ceræ flavæ uncias decem.
Plumbi oxidi semivitrei in pulverem triti libram unam.
Olei olivæ octantem unam.
Aceti congium unum.

Coque acetum cum plumbi oxido, lento igne, assidue movens, donec in unum coæant; dein adjice saponem et iterum simili modo coque, donec humor penitus consumptus fuerit; denique ceram cum oleo prius liquefactam cæteris immisce.
COMPOUND RESIN CERATE.

Take of Suet;
   Yellow wax, each, one pound.
   Pine resin, one pound.
   Turpentine, half a pound.
   Flax seed oil half a pint.

Melt them together, and strain through linen.

SAVIN CERATE.

Take of Resin cerate, six parts.
   Savin leaves, in powder, one part.

To the cerate, previously softened, add the savin and mix.

SOAP CERATE.

Take of Castile soap, eight ounces.
   Yellow wax, ten ounces.
   Semivitreous oxide of lead, in powder, one pound.
   Olive oil, a pint.
   Vinegar, a gallon.

Boil the vinegar with the oxide of lead, over a slow fire, constantly stirring until the union is complete; then add the soap and boil it again in a similar manner, until the liquid part is evaporated; then mix in the wax, previously melted with the oil.
CERATUM SIMPLEX.

R. Olei olivæ partes sex.
Ceræ albae partes tres.
Spermatis ceti partem unam.

Spermatis et ceræ simul liquefactis oleum adjice, et move donec resfrixerint.

CERATUM ZINCI CARBONATIS IMPURI.

R. Adipis libram unam.
Ceræ flavæ uncias quinque cum semisse.
Zinci carbonatis impuri libram dimidiam.

Ceræ et adipi simul liquefactis zincum adjice et assidue move donec resfrixerint.

COLLYRIA.

COLLYRIUM PLUMBI ACETATIS.

R. Plumbi acetatis scrupulum unum.
Aqua distillata octantem dimidium.

Fiat solutio.

COLLYRIUM PLUMBI ACETATIS ET OPPI.

R. Plumbi acetatis scrupulum unum.
Aqua distillata octantem dimidium.
Tincturæ opii fluidrachmam unam.

Misce.
SIMPLE CERATE.

Take of Olive oil, six parts.
    White wax, three parts.
    Spermaceti, one part.

Melt the wax and spermaceti together, then add the oil, stirring until the whole is cool.

CERATE OF IMPURE CARBONATE OF ZINC.

Turner's Cerate.

Take of Lard, one pound.
    Yellow wax, five ounces and a half.
    Impure carbonate of zinc, half a pound.

To the lard and wax, previously melted together, add the zinc, carefully stirring the whole until cool.

COLLYRIA.

COLLYRIUM OF ACETATE OF LEAD.

Take of Acetate of lead, a scruple.
    Distilled water, half a pint.

Mix and dissolve.

COLLYRIUM OF OPIUM AND ACETATE OF LEAD.

Take of Acetate of lead, a scruple.
    Distilled water, half a pint.
    Tincture of opium, a fluidrachm.

Mix.
CONFECTIONES.

OLLYRIUM ZINCI ACETATIS.

R. Zinci sulphatis grana duodecim.
Plumbi acetatis grana sexdecim.
Aquæ distillatæ octantem dimidium.

Fiat solutio, et precipitatione facto, effundatur liquor purus.

OLLYRIUM ZINCI SULPHATIS.

R. Zinci sulphatis grana duodecim.
Aquæ distillatæ octantem dimidium.

Fiat solutio.

CONFECTIONES.

Confectio massa composita est ex medicamento quovis cum saccharino tali modo confecta, ut vel virtutes conservet, vel saporem obteget, vel facilius adhibendum reddat.

CONFECTIONIO AROMATICA.

R. Lauri cassiæ corticis;
Cardamomi;
Zingiberis, singulorum unciâm unam.

In pulverem subtilissimum subige, et adde

Syrupi aurantii corticis fluiduncias sex.

Misce, et diligenter contunde.
CONFECTIONS.

COLLYRIUM OF ACETATE OF ZINC.

Take of Sulphate of zinc twelve grains.
   Acetate of lead, sixteen grains.
   Distilled water, half a pint.

Mix and dissolve, and after precipitation pour off the clear liquid.

COLLYRIUM OF SULPHATE OF ZINC.

Take of Sulphate of zinc twelve grains.
   Distilled water, half a pint.

Mix and dissolve.

CONFECTIONS.

A confection is a compound mass, prepared by uniting a medicinal substance with saccharine matter, in such manner as to preserve the virtues of the medicament, to cover its taste, or to facilitate its administration.*

AROMATIC CONFECTION.

Take of Cassia bark;
   Cardamom;
   Ginger, of each, one ounce.

Reduce them to a very fine powder, and add
   Syrup of orange peel, six fluidounces.

Mix, and beat them well together.

* Under this head are included the Conserves, Electuaries, and Confections of former Pharmacopoeias.
CONFECTIONES.

CONFECTION AURANTII CORTICIS.

R. Aurantii corticalis recentis partem unam.
Sacchari partes tres.

Aurantii corticalis, adjuto paulatim saccharo, in pulpan contunde.

---

CONFECTION CASSIAE.

R. Cassiae fistulae pulpae partes quatuor.
Tamarindi pulpae;
Mannae, utriusque, partem unam.
Syrupi aurantii corticalis, partes quatuor.

Mannam prius in mortario contusam, calore leni, in syrupo solve: dein adde pulpae; et perstante calore, ad crassitudinem idoneam vaporent.

---

CONFECTION ROSEAE.

R. Roseae quantumvis.

In pulpam contunde, et sacchari, inter contundendum, pondus triplex adde.

---

CONFECTION SCAMMONIAE.

R. Scammoniae;
Zingiberis, utriusque in pulverem redacti, unciam unam.
Caryophyllorum olei minima viginti.
Syrupi aurantii corticalis quantum sit satis.
CONFECTION OF ORANGE PEEL.

Take of Fresh orange peel, one part.
Sugar, three parts.

Bruise the peel to a pulp, gradually adding the sugar during the beating.

CONFECTION OF CASSIA.

Take of Purging cassia, four parts.
Tamarind, the pulp;
Manna, of each, one part.
Syrup of orange peel, four parts.

Having beat the manna in a mortar, dissolve it with a gentle heat in the syrup; then add the pulps, and evaporate with a regularly continued heat to a proper consistence.

CONFECTION OF ROSES.

COMMONLY CALLED CONSERVE OF ROSES.

Take of Roses, any quantity.

Beat them to a pulp; and add, during the beating, three times their weight of sugar.

CONFECTION OF SCAMMONY.

Take of Scammony;
Ginger, of each in powder, one ounce.
Oil of cloves, one fluid scruple.
Syrup of orange peel, what is sufficient
In pulverem subtilissimum arida simul tere: dein inter syrumpum gradatim addendum, iterum contere: tum caryophyllorum oleum adde; et omnia commisce.

---

CONLECTIO SENNAE.

R. Senna; uncias octo.
Coriandro; uncias quatuor.
Glycyrrhiza; contusae uncias tres.
Ficuum; libram unam.
Prunorum; libram unam.
Tamarindi; libram dimidiam.
Sacchari; libras duas cum semisse.

Sennam cum coriandro tere, et per cribrum separa pulveris misti uncias decem. Residuum cum ficibus et glycyrrhiza in quatuor octantibus aquae decoque ad dimidiam; dein exprime et cola. Liquorem colatum per vaporationem assume ad octante circiter unam cum semisse. Postea adde saccharum ut fiat syrupus. Hunc syrupum adde gradatim pulpis; et postremo immisce pulverem.

---

CUPRUM.

---

CUPRI AMMONIARETUM.

R. Cupri sulphas partes duas.
Ammoniae carbonatis partes tres.

Diligenter subige in mortario vitreo, donec, finita omni effervescentia, placide coeant in massam violaceam; quae charta bibula obvoluta, primo super lapidem cretaceum, dein leni calore exsiccatam, in vase vitreo bene obturato servetur.
Rub the dry articles together into a very fine powder; next rub them again while the syrup is gradually added; then add the oil of cloves, and mix the whole well together.

**CONFECTION OF SENNA.**

*FORMERLY LENITIVE ELECTUARY.*

Take of Senna, eight ounces.
Coriander, three ounces.
Liquorice, bruised, four ounces.
Figs, one pound.
Prunes, (the pulp,) one pound.
Tamarind, half a pound.
Sugar, two pounds and a half.

Pulverize the senna with the coriander, and sift out ten ounces of the mixed powder; boil the remainder with the figs and liquorice, in four pints of water, to one half; express and strain the liquor, which is then to be evaporated to about a pint and a half; dissolve the sugar in it, add this syrup by degrees to the pulps, and lastly mix in the sifted powder.

**COPPER.**

**AMMONIARET OF COPPER.**

Take of Sulphate of copper, two parts.
Carbonate of ammonia, three parts.

Rub them diligently together in a glass mortar, until, after the effervescence has ceased, they unite into a violet coloured mass. This must be wrapped up in blotting paper, and first dried on a chalk stone, and afterwards by a gentle heat. The product must be kept in a glass phial well stopped.
CUPRI AMMONIARETI LIQUOR.

R. Aquæ calcis octantem dimidium.
Ammoniæ muriatis scrupulos duos.
Cupri subacetatis præparati grana quatuor.

Misce et digere ad horas viginti quatuor; deinde purum effunde liquorem.

CUPRI SUBACETAS PRÆPARATUM.

R. Cupri subacetatis quantumvis.

In pulverem subige, et particulas minutas, ut in calcis carbonate præparando, separa.

CUPRI SULPHATIS LIQUOR.

R. Cupri sulphatis grana tria.
Acidi sulphurici minima decem.
Aquæ distillatae fluiduncias duas.

Misce, et agitando fiat solutio.

DECOCTA.

Decoctis utimur ad partes vegetabilium extrahendas quæ aquâ bullienti facilius solvantur, neque inter ebuliendum volatiles evanescant. Paranda sunt in vasis coopertis, calore non mutato. Inter parandum et utendum brevi tantum mora intersit.
SOLUTION OF AMMONIARET OF COPPER

Take of Lime water, half a pint.
Muriate of ammonia, two scruples.
Subacetate of copper, prepared, four grains.

Mix, and digest them for twenty-four hours, then pour off the pure liquor.

PREPARED SUBACETATE OF COPPER.

Take of Subacetate of copper, any quantity.

Grind it to powder, and separate the minute particles in the manner directed for the preparation of carbonate of lime.

SOLUTION OF SULPHATE OF COPPER.

Take of Sulphate of copper, three grains.
Sulphuric acid, ten minims.
Distilled water, two fluidounces.

Mix the articles, and effect a solution by shaking them.

DECOCTIONS.

Decoctions are used to extract those parts of vegetables which are most soluble in boiling water, and are not so volatile as to escape during the process. Decoctions should be made in covered vessels, with a uniform heat, and prepared a short time before they are wanted for use.
DECOCTUM ARALIÆ NUDICAULIS.

R. Araliæ nudicaulis contusæ uncias sex.
Aquæ octantes octo.

Digere per horas quatuor, tum decoque ad octantes quatuor, exprime et cola decoctum.

DECOCTUM CINCHONÆ.

R. Cinchonaæ, in pulverem tritæ, unciæ unam.
Aquæ octantem unum cum semisse.

Coque per horæ partem sextam in vase operto, et liquorem adhuc calentem cola.

DECOCTUM COLOMBÆ COMPOSITUM.

R. Colombæ contusæ;
Quassiae in scobem rasæ, utriusque drachmas duas.
Aurantii corticis drachmam unam.
Rhei in pulverem tritæ scrupulum unum.
Potassæ carbonatis drachmam dimidiam.
Aquæ fluiduncias viginti.

Coque ad octantem, et tincturæ lavandulae adde fluidunciam dimidiam.

DECOCTUM DULCAMARÆ.

R. Dulcamarae unciæ unam.
Aquæ octantem cum semisse.

Decoque ad octantem, et cola.
DECOCTIONS.

DECOCTION OF FALSE SARSAPARILLA.

Take of False sarsaparilla, bruised, six ounces.
Water, eight pints.

Digest for four hours, and then boil down to four pints; press out and strain the decoction.

DECOCTION OF PERUVIAN BARK.

Take of Peruvian bark, in powder, one ounce.
Water, one pint and a half.

Boil for ten minutes, in a covered vessel, and strain the liquor while hot.

COMPOUND DECOCTION OF COLUMBO.

Take of Columbo, bruised;
Quassia, rasped, of each, two drachms.
Orange peel, one drachm.
Rhubarb, in powder, one scruple.
Carbonate of potass, half a drachm.
Water, twenty fluidounces.

Boil to a pint, and add half a fluidounce of tincture of lavender.

DECOCTION OF BITTER SWEET.

Take of Bitter sweet, one ounce.
Water, one pint and a half.

Boil down to a pint, and strain.
DECOCTA.

DECOCTUM GUIAIACI.

R. Guaiaci ligni in scobem rasi uncias tres.
Uvarum uncias duas.
Sassafras concisi;
Glycyrrhizae contusae, utriusque unciam unam.
Aquam octantes decem.

Decoquere leni igne lignum guaiaci et uvas in aqua ad octantes quinque, sub finem adjiciens radices; dein cola sine expressione.

DECOCTUM HORDEI.

R. Hordei uncias duas.

Hordeum prius in aqua frigida lotum, coque per breve tempus in aqua circiter octante dimidio. Aquam hac abjectam, hordeo octantes quinque aquæ ebullientis infunde. Coque exin donec aqua ad dimidium vaporet; et postea cola.

DECOCTUM HORDEI COMPOSITUM.

R. Decocti hordei octantes quatuor.
Uvarum, demptis acinis, uncias duas.
Ficuum discissarum uncias duas.
Glycyrrhizae contusæ unciam dimidiam.

Liquorem ad dimidium decoque additis prius uvis, tum ficibus, et, paulo ante finem coquendi, glycyrrhiza; denique cola.
DECOCTIONS.

DECOCTION OF GUAIACUM.

FORMERLY DECOCTION OF THE WOODS.

Take of Guaiacum wood, rasped, three ounces.
Raisins, two ounces.
Sassafras, sliced;
Liquorice, bruised, of each, one ounce.
Water, ten pints.

Boil the guaiacum and raisins in the water, over a gentle fire, down to five pints, adding the roots towards the end of the boiling; then strain the liquor without expression.

DECOCTION OF BARLEY.

Take of Barley, two ounces.

Having first washed the barley in cold water, boil it for a short time in about half a pint of water; throw away this water; then pour upon the barley five pints of boiling water; boil it next until half the quantity of the water be evaporated, and afterwards strain it.

COMPOUND DECOCTION OF BARLEY.

Take of Decoction of barley, four pints.
Raisins, stoned, two ounces.
Figs, sliced, two ounces.
Liquorice, bruised, half an ounce.

Boil to the consumption of one half of the liquor; first adding the raisins, then the figs, and, a short time before the process is finished, the liquorice; lastly strain.
DECOCTUM LICHENIS.

R. Lichenis unciam unam.
Aqua octantem cum semisse.

Decoque ad octantem, et exprimens cola.

---

DECOCTUM MEZEREI.

R. Mezerei drachmas duas.
Glycyrrhizae contusae unciam dimidiam.
Aqua octantes tres.

Decoque leni igne ad octantes duos, et cola.

---

DECOCTUM SARSAPARILLÆ.

R. Sarsaparillæ concisae uncias sex.
Aqua congium unum.

Digere per duas horas, calore circiter gradus cxcv; dein radicem exime et contunde; contusam liquori redde, et decoque, leni igne, ad quatuor octantes; tum exprime et cola.

---

DECOCTUM SARSAPARILLÆ COMPOSITUM.

R. Sarsaparillæ discissae et contusae unciam unam cum semisse.
Guaiaci in scobem rasi;
Sassafras;
Glycyrrhizae contusae; singulorum drachmas duas.
Mezerei drachmam unam.
Aqua bullientis octantes tres.
DECOCTIO

DECOCTION OF ICHELAND MOSS.

Take of Iceland moss, one ounce.
Water, one pint and a half.

Boil down to a pint, and strain with compression.

DECOCTION OF MEZEREON.

Take of Mezereon, two drachms.
Liquorice, bruised, half an ounce.
Water, three pints.

Boil with a gentle heat to two pints, and strain.

DECOCTION OF SARSAPARILLA.

Take of Sarsaparilla, sliced, six ounces.
Water, one gallon.

Digest for two hours, with a heat of about 195; then take out the sarsaparilla, and bruise it; when bruised, put it back into the same liquor, boil down to four pints, then press out and strain the decoction.

COMPOUND DECOCTION OF SARSAPARILLA.

FORMERLY LISBON DIET DRINK.

Take of Sarsaparilla, sliced and bruised, one ounce and a half.
Guaiacum wood, rasped;
Sassafras;
Liquorice, bruised; of each, two drachms.
Mezereon, one drachm.
Boiling water, three pints.
DECOCTA.

Digere in aqua, calore leni, per horas sex, sarsaparillam, guaiacum et sassafras; tum ad dimidium decoque, glycyrrhiza et mezereo, sub coquendi finem, additis; et cola liquorem.

---

DECOCTUM SCILLÆ.

R. Scillae drachmas tres.
    Juniperi uncas quatuor.
    Senegae uncas tres.
    Aquae octantes quatuor.

Coque ad consumendam liquoris dimidiam partem; tum cola, et adde

Spiritus ætheris nitrosi fluiduncias quatuor.

---

DECOCTUM SENEGÆ.

R. Senegæ uncial unam.
    Aquae octantes duos.

Decoque ad octantem, et cola.

---

DECOCTUM VERATRI.

R. Veratri contriti uncial unam.
    Aquae octantes duas.
    Alcoholis fluiduncias duas.

Decoque veratrum in aqua ad octantem, et cola; tum, postquam refrixerit, adjice alcohol.
Digest in the water, with a gentle heat, for six hours, the sars-
saparilla, guaiacum, and sassafras; then boil down to one half,
adding towards the end of the boiling, the liquorice and meze-
reom; and strain the liquor.

DECOCTION OF SQUILL.

Take of Squill, three drachms.
Juniper, four ounces.
Seneca snakeroot, three ounces.
Water, four pints.

Boil to the consumption of one half the liquor; then strain
and add,

Spirit of nitrous ether, four fluidounces.

DECOCTION OF SENECA SNAKEROOT.

Take of Seneca snakeroot, one ounce.
Water, two pints.

Boil down to a pint, and strain.

DECOCTION OF WHITE HELLEBORE.

Take of White hellebore, powdered, one ounce.
Water, two pints.
Alcohol, two fluidounces.

Boil the hellebore in the water down to a pint, and strain the
decoction; then after it has cooled, add the alcohol.
EMPLASTRA.

Emplastra plerumque ex oleis et unguinosis parantur, oxidis seu pulveribus admixtis ad crassitudinem ut in frigore dura sint et digitis non adhaerent; at in temperie corporis humani mollia et flexilia maneant, tamen ita glutinosa ut parti cui apponantur et materiae in quam obducentur facile adhaerant. Ut emplastra facile obducentur, prius lento igne liquanda vel emollienda sunt.

EMPLASTRUM AMMONIACI.

R. Ammoniaci uncias quinque.
Aceti octantem dimidium.

Liqua ammoniacum in aceto, et exprime; dein liquorem in vase ferreo, in balneo aquoso consume, assidue movens donec idonea fiat crassitudo.

EMPLASTRUM ASSAFOETIDÆ.

R. Emplastri plumbi;
Assafoetidæ utriusque partes duas.
Galbani;
Ceræ flavæ utriusque partem unam.

Liquesac simul in balneo aquoso, et assidue move donec refixerint.
PLASTERS.

Plasters are composed chiefly of oils and unctuous substances united with oxides or powders, into such consistence that the compound may remain firm in the cold without sticking to the fingers; that it may be soft and pliable in the heat of the human body; yet so tenacious as readily to adhere both to the parts on which it is applied, and to the substance on which it is spread. Plasters require to be melted, or rather softened, by a gentle heat, to admit of their being spread.

AMMONIACUM PLASTER.

Take of Ammoniacum, five ounces.

Vinegar, half a pint.

Dissolve the ammoniacum in the vinegar, and strain; then evaporate the liquor in an iron vessel, by means of a water bath, constantly stirring it until it acquires a proper consistence.

ASSAFOETIDA PLASTER.

Take of Lead plaster;

Assafoetida, each, two parts.

Galbanum;

Yellow wax, each, one part.

Melt them together by means of a water bath, then stir them constantly until cool.
EMPLASTRA.

EMPLASTRUM FERRI.

R. Emplastri plumbi partes viginti quatuor.
Resinæ pini partes sex.
Ceræ flavæ;
Olivæ olei utriusque partes tres.
Ferri oxidi rubri partes octo.

Teratur ferri oxidum rubrum cum oleo, dein cæteris, in balneo aquoso liquefactis, adjiciatur.

EMPLASTRUM HYDRARGYRI.

R. Olivæ olei;
Resinæ pini utriusque partem unam.
Hydrargyri partes tres.
Emplastri plumbi partes sex.

Cum oleo et resina liquefactis simul et dein refrigeratis, teratur hydrargyrum donec evanescant globuli; tum paulatim addatur emplastrum plumbi liquefactum et omnia accurate miscan-
tur.

EMPLASTRUM PLUMBI.

R. Plumbi oxidi semivitrei partem unam.
Olivæ olei partes duas.

Adjecta aqua coque, assidue agitans donec oleum et oxidum in emplastrum coëant.
PLASTERS.

PLASTER OF IRON.

STRENGTHENING PLASTER.

Take of Lead plaster, twenty-four parts.
  Pine resin, six parts.
  Yellow wax;
  Olive oil, each, three parts.
  Red oxide of iron, eight parts.

Rub the red oxide of iron with the oil; then add the other ingredients, previously melted in a water bath.

MERCURIAL PLASTER.

Take of Olive oil;
  Pine resin, each, one part.
  Mercury, three parts.
  Lead plaster, six parts.

Rub the mercury with the oil and resin melted together, until the globules disappear; then gradually add the lead plaster melted, and mix the whole intimately.

LEAD PLASTER.

Take of Semivitrified oxide of lead, one part.
  Olive oil, two parts.

Having added some water, boil them, constantly stirring until the oxide and oil unite into a plaster.

16
EMPLASTRUM PLUMBI SUBCARBONATIS COMPOSITUM.

R. Plumbi subcarbonatis libram unam.
   Olivae olei octantes duos.
   Cerae flavae uncias quatuor.
   Emplastri plumbi libram unam cum semisse.
   Iridis florentinæ in pulverem tritæ uncias novem.

Oleum et plumbum in balneo aquoso coque, assiduo agitans, donec unum corpus fiant: dein adjice ceram et emplastrum; his liquefactis iridem insperge totum diligenter agitans.

EMPLASTRUM RESINOSUM.

R. Emplastri plumbi partes quinque.
   Resinæ pini partem unam.

Liquefac simul in balneo aquoso, et assidue move donec refrixerint.

EMPLASTRUM RESINOSUM CANTHARIDUM.

R. Cerati cantharidum partem unam.
   Picis abietis partes septem.

Liquefac simul in balneo aquoso, et assidue move donec refrixerint.
COMPOUND PLASTER OF SUBCARBONATE OF LEAD.

Take of Subcarbonate of lead, one pound.
   Olive oil, two pints
   Yellow wax, four ounces.
   Lead plaster, one pound and a half.
   Orris, in powder, nine ounces.

Boil the oil and lead together in a water bath, continually stirring, until they are thoroughly incorporated; then add the wax and plaster; and when these are melted, sprinkle in the powdered orris, carefully stirring the whole.

---

RESIN PLASTER.

ADHESIVE PLASTER.

Take of Lead plaster, five parts.
   Pine resin, one part.

Melt them together in a water bath, and stir them well until cold.

---

RESIN PLASTER WITH CANTHARIDES.

WARM PLASTER.

Take of Cerate of cantharides, one part.
   Burgundy pitch, seven parts.

Melt them together in a water bath, and stir them well until cold.
EXTRACTA.

Extracta ex vegetabiliium succis et secretis, sive recentium, sive exsiccatorum parantur. Ad crassitudinem solidi, plus minusve mollis, rediguntur, recentia comprimendo et vaporando, arida autem in latice quovis solvendo, et postea solutum vaporando.

EXTRACTUM ACONITI.

R. Aconiti recentis quantumvis.

In mortario lapideo contunde, et sacco cannabino inclusum, addito aquae paululo, valide comprime, donec succum reddat. Hunc in vasis patulis, super balneo aquae ferventis sodae muriate prius saturatae, illico ad mellis crassioris spissitudinem redige, sub finem spathula lignea agitans.

Postquam massa refriexerit reponatur in vasis fictilibus vitreadis, et alcohole madefiant.

Eodem modo parantur

EXTRACTUM BELLADONNAE,

Ex belladonna recente.

EXTRACTUM CONII,

Ex conio recente.
EXTRACTS.

Extracts are prepared from the juices and secretions of vegetables both in their recent and dried state. They are made in the form of a soft solid, from recent vegetables by expression and evaporation, and from dry ones by solution in a menstruum and subsequent evaporation.

EXTRACT OF ACONITE.

Take of fresh aconite, any quantity.

Bruise it in a stone mortar, and having sprinkled on it a little water, press it strongly in a hempen bag till it yields its juice. This is to be evaporated immediately in flat vessels in a bath of boiling water saturated with muriate of soda, till it is brought to the consistence of thick honey. During the latter part of the process it should be stirred with a wooden spatula.

After the mass has become cold, it must be put up in glazed earthen vessels, and moistened with alcohol.

In like manner are prepared

EXTRACT OF DEADLY NIGHTSHADE,
From fresh deadly nightshade.

EXTRACT OF HEMLOCK,
From fresh hemlock.

* Under this head are included the Extracts and Inspissated Juices of former Pharmacopoeias.
EXTRACTA.

EXTRACTUM HYOSCYAMI,
Ex hyoscyamo recente.

EXTRACTUM STRAMONII,
Ex stramonio recente.

EXTRACTUM ANTHEMIDIS.
R. Anthemidis siccatae libram unam.
Aquae congium unum.

Anthemidi affunde aquam, exin decoque ad octantes quatuor,
et liquorem calentem exprimens cola. Decoctum illico per vapo-
rationem redige ad mellis crassioris spissitudinem in balneo
aquae ferventis sodae muriate saturatae.
Postquam refrixerit extractum, in vasis fictilibus vitreatis, al-
cohole madefactis, reponatur.

Eodem modo parantur
EXTRACTUM GENTIANAE,
Ex gentiana conscissa.

EXTRACTUM HÆMATOXYLI,
Ex hæmatoxylo in scobem raso.

EXTRACTUM HELLEBORI NIGRI.
Ex helleboro nigro conscisso.
EXTRACTS.

EXTRACT OF HENBANE.

From fresh henbane.

---

EXTRACT OF THORN APPLE.

From fresh thorn apple.

---

EXTRACT OF CHAMOMILE.

Take of Dried chamomile, one pound.
Water, one gallon.

Pour the water upon the chamomile, boil down to four pints, and strain the liquor while hot, with compression. Evaporate the decoction immediately to the consistence of thick honey in a bath of boiling water, saturated with muriate of soda.

When the extract is cold, put it up in glazed earthen vessels, and moisten it with alcohol.

---

In like manner are prepared

EXTRACT OF GENTIAN,

From gentian cut in slices.

---

EXTRACT OF LOGWOOD,

From logwood, rasped.

---

EXTRACT OF BLACK HELLEBORE,

From black hellebore, sliced.
EXTRACTA.

EXTRACTUM JUGLANDIS,

Ex juglande conscissa.

---

EXTRACTUM QUASSIAE,

Ex quassia in scobem rasa.

---

EXTRACTUM CINCHONAE.

R. Cinchonae in pulverem redactae libram unam.
Alcoholis octantes quatuor.

Digere ad quattuor et tincturam effunde.
Coque residue in aquae distillatae octantibus quinque, ad partem horae quartam; et decoctum adhuc fervens per lineum cola. Denuo decoque in aquae distillatae octantibus alteris quinque, et cola ut antea; dein, sedimento nullo ablato, liquorem vaporando, ad spissitudinem mellis tenuioris redige.

Alcohol a tinctura, donec haec etiam similiter spissescat, distillando abstrahet; dein liquores sic inspissatos miscet; et in aquae ferventis balneo sodae muriate saturatae, ad crassitudinem idoneam vaporent.

---

EXTRACTUM COLOCYNTHIDIS COMPOSITUM.

R. Colocynthidis conscissae drachmas sex.
Aloes socotrinae in pulverem redactae unciam unam cum semisse.
Scammoniae in pulverem redactae unciam dimidiam.
Cardamomi in pulverem redacti drachmam unam.
Alcoholis diluti octantem unum.

Digere colocynthidem in alcohole per quattuor caloribus lenis. Solutioni colatae aloen et scammoniam adde; dein vaporet massa
**EXTRACTS.**

**EXTRACT OF BUTTERNUT,**

From butternut sliced.

---

**EXTRACT OF QUASSIA,**

From quassia rasped.

---

**EXTRACT OF PERUVIAN BARK.**

Take of Peruvian bark, in powder, one pound.

Alcohol, four pints.

Digest for four days, and pour off the tincture.

Boil the residuum in five pints of distilled water, for fifteen minutes, and strain the decoction boiling hot, through linen. Repeat this decoction and filtration, with the same quantity of distilled water, and without any separation of sediment, reduce the liquor by evaporation to the consistence of thin honey.

Draw off the alcohol from the tincture by distillation, until this also becomes thick; then mix the liquors thus inspissated, and evaporate them in a bath of boiling water, saturated with muriate of soda, to a proper consistence.

---

**COMPOUND EXTRACT OF COLOCYNTH.**

Take of Colocynth sliced, six drachms.

Socotrino aloes powdered, one ounce and a half.

Scammony powdered, half an ounce.

Cardamom powdered, one drachm.

Diluted alcohol, one pint.

Digest the colocynth in the diluted alcohol, for four days in a gentle heat; strain the solution, and add to it the aloes and scam-
donec crassitudinis idoneae fuerit; et sub finem spissationis immisce cardamomum.

**EXTRACTUM JALAPÆ.**

R. Jalapæ contritæ libram unam.  
Alcoholis octantes quatuor.  
Aquæ octantes decem.

Servetur hoc extractum molle, quod ad pilulas fingendas aptum sit, et durum, quod in pulverem teri possit.

**Hoc modo paratur**

**EXTRACTUM PODOPHYLLI.**

**EXTRACTUM SAMBUCI.**

R. Sambuci baccas maturas, contunde, et succum exprime per succum cannabinum, sive linteum; succi hujus octantibus quinque sacchari libram unam adde; et ad crassitudinem mellis crassioris vaporet.
mony; then evaporate the alcohol until the mass has acquired a proper consistence, and about the end of the inspissation, mix in the cardamom.

---

**EXTRACT OF JALAP.**

Take of Jalap powdered, one pound.
Alcohol, four pints.
Water, ten pints.

Macerate the jalap in the alcohol for four days, and pour off the tincture; boil the remaining powder in the water until it be reduced to two pints; then strain the tincture and decoction separately, and let the former be distilled, and the latter evaporated until each begins to grow thick. Lastly, mix the two together, and reduce to a proper consistence by evaporation.

Let this extract be kept in a soft state fit for forming pills, and in a hard one so that it may be reduced to powder.

---

In the same way is prepared

**EXTRACT OF MAY APPLE.**

---

**EXTRACT OF ELDER.**

Take ripe elder berries, bruise them and press out the juice through a hempen or linen bag; to five pints of this juice, add one pound of sugar, and evaporate to the consistence of thick honey.
FERRUM.

FERRI ACETAS.

R. Ferri carbonatis præcipitati unciam dimidiam.
Aceti fluiduncias tres.

Digere per tres dies et cola.

FERRI CARBONAS PRÆCIPITATUS.

R. Ferri sulphatis uncias octo.
Sodæ subcarbonatis uncias sex.
Aquæ bullientis congium unum.

Ferri sulphatem et sodæ subcarbonatem separatim liqua in aquæ octantibus quatuor; tum liquores inter se misce, et sepone, ut pulvis subsidat; deinde, effuso liquore supernatante, ferri carbonatem aquæ calidâ ablue, et chartâ bibulâ involutam leni calore exsicca.

FERRI CARBONAS PRÆPARATUS.

R. Ferri limaturæ purificatæ, quantumvis.

Sæpius aquâ humectetur ut in rubiginem transeat, quæ in pollen teratur.
IRON.

ACETATE OF IRON.

Take of Precipitated carbonate of iron, half an ounce.
Vinegar, three fluidounces.

Digest for three days and strain.

PRECIPITATED CARBONATE OF IRON.

Take of Sulphate of iron, eight ounces.
Subcarbonate of soda, six ounces.
Boiling water, a gallon.

Dissolve the sulphate of iron, and subcarbonate of soda separately, each in four pints of water; next mix the solutions together, and set the mixture by, that the precipitated powder may subside; then having poured off the supernatant liquor, wash the carbonate of iron with hot water, and dry it upon bibulous paper in a gentle heat.

PREPARED CARBONATE OF IRON.

RUST OF IRON.

Take of Purified iron filings, any quantity.

Moisten them frequently with water, that they may be converted into rust, which is to be ground into an impalpable powder.
FERRUM. 

FERRI LIMATURA PURIFICATA.

R. Ferri limaturæ quantumvis.

Imposito limaturæ cribro, admoveatur magnes, ut trans cribro limatura sursum attrahatur.

---

AMMONIÆ ET FERRI MURIAS.

R. Ferri oxidi rubri loti et exsiccati;

Ammoniæ muriatis utriusque pondera paria.

Bene permista sublimentur.

---

FERRI OXIDUM RUBRUM.

R. Ferri sulphatis quantumvis.

In vase fictili, non vitreato, caelefiat igne modico, donec albescat et siccessimus fiat; dein igne vehementi urgeatur, donec in materiam ruberrimam transierit.

---

FERRI PHOSPHAS.

R. Ferri sulphatis uncias quatuor.

Aquae octantes decem.

Solve, et requiescat solutum, donec faeces subsederint; dein liquidum purum transfundere. In vase alio sodae phosphatis uncias quatuor in aquae octantibus tribus solve, et liquores miscere. Pulverem cæruleum, qui praecipitatur, collige; super column pone; dein aqua calente, donec haec insipida evadat, ablue, et residuum calore modico sicca.
PURIFIED FILINGS OF IRON.

Take of Iron, in filings, any quantity.

Place a sieve over them, and apply a magnet, so that the filings may be attracted upwards through the sieve.

MURIATE OF AMMONIA AND IRON.

Take of Red oxide of iron, washed and dried;
Muriate of ammonia, of each, equal weights.

Mix them thoroughly, and sublime.

RED OXIDE OF IRON.

Take of Sulphate of iron, any quantity.

Exposé it to the action of a moderate heat in an unglazed earthen vessel, until it becomes white and perfectly dry. Then expose it to an intense heat, until it is converted into a very red powder.

PHOSPHATE OF IRON.

Take of Sulphate of iron, four ounces.
Water, ten pints.

Dissolve, and allow the solution to remain at rest until the impurities have subsided; then decant the clear liquid. In a separate vessel dissolve four ounces of phosphate of soda, in three pints of water; and mingle the two solutions. Collect the blue powder which is precipitated, place it on a filter, wash it with warm water, until the latter comes off tasteless, and dry the residue with a moderate heat.
LIQUOR FERRI ALKALINI.

R. Ferri drachmas duas cum semisse.
Acidi nitrici fluiduncias duas.
Aqua di-tillatae fluiduncias sex.
Liquoris potassae subcarbonatis fluiduncias sex.

Ferro superinfunde acidum et aquam inter se mista; tum, ubi bullulæ exire cessaverint, liquorem adhuc acidum effunde. Hunc, paulatim et ex intervallis, liquori potassæ subcarbonatis adjice, subinde agitans, donec, facto jam colore fusco-rubicundo, bullulæ non amplius excitentur. Denique sepone per horas sex, et liquorem effunde.

FERRI TARTRAS.

R. Ferri carbonatis præcipitati unciam dimidiam.
Potassæ supertartratis in pulverem triti subtilissimum unciam unam.
Aqua distillatae octantem unum.

Coque simul in vase vitreo super lentum ignem per horam unam; et liquorem per chartam cola. Liquor refrigeratus, et iterum colatus, donec in superficie appareat pellicula, vaporet. Inter frigescendum salina fiet massa, quæ in pulverem redigenda est, et in vasis clausis servanda.
IRON.

SOLUTION OF ALKALINE IRON.

Take of Iron, two drachms and a half.
Nitric acid, two fluidounces.
Distilled water, six fluidounces.
Solution of subcarbonate of potass, six fluidounces.

Having mixed the acid and water, pour them upon the iron, and when the effervescence has ceased, pour off the clear acid solution; add this gradually, and at intervals, to the solution of subcarbonate of potass, occasionally shaking it, until it has assumed a deep brown red colour, and no further effervescence takes place. Lastly, set it by for six hours, and pour off the clear solution.

TARTRATE OF IRON.

Take of Precipitated carbonate of iron, half an ounce.
Supertartrate of potass, in very fine powder, one ounce.
Distilled water, one pint.

Boil them together in a glass vessel over a slow fire for an hour, and filter the liquor through paper. When cold, and filtered a second time, evaporate it until a pellicle appears on the surface. In cooling it will form a saline mass, which is to be powdered and kept in close vessels.
HYDRARGYRI OXIDUM CINEREUM.

R. Hydrargyri submuriatis unciam unam.
Aquae calcis congium unum.

Hydrargyri submuriatem in aqua calcis coque, assidue movens, donec oxidum hydrargyri cinereum subsidat. Hoc aqua distillatâ lava, deinde exsicca.

HYDRARGYRI NITRICO-OXIDUM.

R. Hydrargyri purificati libras tres.
Acidi nitrici libram unam cum semisse.
Aquae distillatae octantes duos.

HYDRARGYRI OXYMURIAS.

R. Hydrargyri purificati libras duas.
Acidi sulphurici uncias triginta.
Sodæ muriatis exsiccati libras quattuor.

Hydrargyrum cum acido sulphurico in vase vitreo coque, donec hydrargyri sulphas exsiccatus fuerit; hanc, ubi refrierit,
MERCURY.

GREY OXIDE OF MERCURY.

Take of Submuriate of mercury, one ounce.
Lime water, one gallon.

Boil the submuriate of mercury in the lime water, constantly stirring, until a grey oxide is precipitated. Wash this with distilled water, and then dry it.

NITRIC OXIDE OF MERCURY.

CALLED RED PRECIPITATE.

Take of Purified mercury, three pounds.
Nitric acid, one pound and a half.
Distilled water, two pints.

Mix in a glass vessel. Boil the mixture until the mercury is dissolved, and evaporate the solution with a gentle heat, to a dry white mass; which, after being ground into powder, is to be put into a glass cucurbit, and to have a thick glass plate laid upon its surface. Then, having adapted a capital, and placed the vessel in a sand bath, apply a gradually increased heat, until the matter be converted into very red scales.

OXYMURIATE OF MERCURY.

CALLED CORROSIVE SUBLIMATE.

Take of Purified mercury, two pounds.
Sulphuric acid, thirty ounces.
Dried muriate of soda, four pounds.

Boil the mercury with the sulphuric acid in a glass vessel, until the sulphate of mercury is left dry. Rub this, when it is
HYDRARGYRUM.

cum sodâ muriate in mortario fictili contere; tum ex cucurbitâ vitrea, calore sensim aucto, sublima.

LIQUOR HYDRARGYRI OXYMURIATIS.

R. Hydrargyri oxymuriatis grana octo.
Aquæ distillatæ fluiduncias quindecim.
Alcoholis fluidunciam unum.

Hydrargyri oxymuriatem in aquâ liqua, eique adjice alcohol.

HYDRARGYRUM PURIFICATUM.

R. Hydrargyri libras sex.
Ferri limaturæ libram unam.

Tere simul; tum, igne subjecto, ex retorta ferreâ distillet hydrargyrum.

HYDRARGYRI SUBMURIAS.

R. Hydrargyri oxymuriatis libram unam.
Hydrargyri purificati uncias novem.

Tere simul, donec globuli non amplius conspiciantur; tum sublima, deinde sublimatum exime, idque bis iterum et tere et sublima. Denique fiat pulvis subtilissimus, eodem modo quo calcis carbonatem præparari præceptum fuit.
cold, with the dried muriate of soda in an earthen ware mortar; then sublime it in a glass cucurbit, increasing the heat gradually.

---

SOLUTION OF OXYMURIATE OF MERCURY.

Take of Oxymuriate of mercury, eight grains.
Distilled water, fifteen fluidounces.
Alcohol, one fluidounce.

Dissolve the oxymuriate of mercury in the water, and add the alcohol.

---

PURIFIED MERCURY.

Take of Mercury, six pounds.
Iron, reduced to filings, one pound.

Rub them together and distil the mercury in an iron retort.

---

SUBMURIÁTE OF MERCURY.

CALLED CALOMEL.

Take of Oxymuriate of mercury, one pound.
Purified mercury, nine ounces.

Rub them together till the metallic globules disappear; then sublime, take out the sublimed mass, and reduce it to powder, and sublime it in the same manner twice more successively. Lastly, bring it into the state of a very fine powder, by the same process which has been directed for the preparation of carbonate of lime.
HYDRARGYRI SUBMURIAS AMMONIATUS.

R. Hydrargyri oxymuriatis libram dimidiam. 
   Ammoniæ muriatis uncias quatuor. 
   Liquoris potassæ subcarbonatis octantem dimidium. 
   Aquæ distillatæ octantes quatuor.

Primò ammoniæ muriatem, dein hydrargyri oxymuriatem, in aquâ distillatâ, liqua, et his adjice liquorem potassæ subcarbonatis. Pulverem demissum lava, donec saporis expers fuerit; et dein exsicca.

HYDRARGYRI SUBSULPHAS FLAVUS.

R. Hydrargyri purificati uncias quatuor. 
   Acidi sulphurici uncias sex.

Indantur cucurbitæ vitrearæ et coquantur ex arena ad siccitatem. Materia alba, in fundo relictâ, trita, conjiciatur in aquam bullientem. Inde nascetur illico pulvis flavus, quem aquâ calidâ sæpius lavare oportet.

HYDRARGYRI SULPHURETUM NIGRUM.

R. Hydrargyri purificati; 
   Sulphuris utriusque pondera æqualia.

Terantur simul in mortario vitreo, pistillo vitreo, donec globuli hydrargyri visum penitus effugerint.
AMMONIATED SUBMURIATE OF MERCURY.

FORMERLY WHITE PRECIPITATE.

Take of Oxymuriate of mercury, half a pound.
   Muriate of ammonia, four ounces.
   Solution of subcarbonate of potass, half a pint.
   Distilled water, four pints.

First dissolve the muriate of ammonia, then the oxymuriate of mercury, in the distilled water, and add thereto the subcarbonate of potass in solution. Wash the precipitated powder until it becomes tasteless; then dry it.

YELLOW SUBSULPHATE OF MERCURY.

FORMERLY TURPETH MINERAL.

Take of Purified mercury, four ounces.
   Sulphuric acid, six ounces.

Put them into a glass cucurbit, and boil them in a sand bath to dryness. Throw into boiling water the white matter, which is left in the bottom, after having reduced it to powder. A yellow powder will immediately be produced, which must be frequently washed with warm water.

BLACK SULPHURET OF MERCURY.

FORMERLY AETHIOP'S MINERAL.

Take of Purified mercury;
   Sulphur, of each, equal weights.

Grind them together in a glass mortar, with a glass pestle, till the globules entirely disappear.
HYDRARGYRI SULPHURETUM RUBRUM.

R. Hydrargyri purificati uncias quadraginta.
Sulphuris uncias octo.

Sulphuri ad ignem liquefacto hydrargyrum admisce, et, quam primum intumescat massa, vas ab igne remove, et arctius tege, ne fiat inflammatio; deinde in pulverem tere, et sublima.

INFUSA.

Infusa esse volumus, in quibus vegetabilium partes aquà vel calidà vel frigidà, sine bulliendo solvuntur. Si aquà calidà utendum est, tum vase cooperto in loco calido per tempus praescriptionem macerare oportet.

Breve tantum tempus inter parandum et utendum interesse liceat.

INFUSUM ANGUSTURÆ.

R. Angusturæ contusæ drachmas duas.
Aquæ bullientis octantem dimidium.

Macera per horas duas in vase levitèr clauso, et cola.

INFUSUM ANTHEMIDIS.

R. Anthemidis drachmas duas.
Aquæ frigidiæ octantem dimidium.

Macera per horas octo, in vase levitèr clauso, et cola.
RED SULPHURET OF MERCURY.

FORMERLY CINNABAR.

Take of Purified mercury, forty ounces.
Sulphur, eight ounces.

Having melted the sulphur over the fire, mix in the mercury, and as soon as the mass begins to swell, remove the vessel from the fire, and cover it with considerable force, to prevent combustion; then rub the mass into powder, and sublime.

INFUSIONS.

Infusions are solutions made from vegetables either with hot or cold water, without boiling. If hot water is employed the infusion must be carried on in covered vessels, and in a warm place.

Infusions should be prepared only a short time before they are used.

INFUSION OF ANGUSTURA.

Take of Angustura, bruised, two drachms.
Boiling water, half a pint.

Infuse for two hours in a covered vessel, and strain.

INFUSION OF CHAMOMILE.

Take of Chamomile, two drachms.
Cold water, half a pint.

Macerate for eight hours in a covered vessel, and strain.
INFUSUM ARMORACIÆ.

R. Armoracìæ concisæ;
   Sinapis contusæ, utriusque unciam unam.
   Aquæ bullientis octantem unum.

Macera per horas duas, in vase levitèr clauso, et cola.

INFUSUM CASCARILLÆ.

R. Cascarillæ contusæ unciam dimidiam.
   Aquæ bullientis octantem dimidium.

Macera per horas duas, in vase levitèr clauso, et cola.

INFUSUM CINCHONÆ.

R. Cinchonæ contusæ unciam dimidiam.
   Aquæ bullientis octantem dimidium.

Macera per horas duas, in vase levitèr clauso, et cola.

INFUSUM CINCHONÆ CUM AQUA CALCIS.

R. Cinchonæ in pulverem trita unciam unam.
   Aquæ calcis octantem unum.

Aquam calcis paulatim adde, et simul contere ad partem horæ quartam. Requiescat ad horam unam infusum, deinde coletur.
INFUSION OF HORSERADISH.

Take of Horseradish, sliced;
Mustard, bruised, of each, one ounce.
Boiling water, one pint.

Infuse for two hours in a covered vessel, and strain.

INFUSION OF CASCARILLA.

Take of Cascarilla, bruised, half an ounce.
Boiling water, half a pint.

Infuse for two hours in a covered vessel, and strain.

INFUSION OF PERUVIAN BARK.

Take of Peruvian bark, bruised, half an ounce.
Boiling water, half a pint.

Infuse for two hours in a covered vessel, and strain.

INFUSION OF PERUVIAN BARK WITH LIME WATER.

Take of Peruvian bark, in powder, one ounce.
Lime water, one pint.

Add the lime water gradually, and rub them well together for fifteen minutes. Let the infusion stand for one hour, then filter.
INFUSUM CINCHONÆ CUM MAGNESIA.

R. Cinchonæ in pulverem tritæ unciam unam.
Magnesia drachmam unam.
Aqua frigidæ octantem unum.

Aquam adde paulatim, et simul contere per horæ partem quartam. Requiescat ad horam unam infusum, deinde coletur.

INFUSUM CINCHONÆ CUM SUCCO LIMONUM.

R. Cinchonæ in pulverem tritæ unciam unam.
Succi limonum fluiduncias duas.
Tincturae camphoræ opiæ fluidrachmas tres.
Aqua frigidæ octantem unum.

Macera per horas duodecim in vase operto, et cola.

INFUSUM COLOMBÆ.

R. Colombæ concisæ drachmam unam.
Aqua bullientis octantem dimidium.

Macera per horas duas in vase leviter clauso, et cola.

INFUSUM DIGITALIS.

R. Digitalis siccatae drachmam unam.
Aqua bullientis octantem dimidium.
Tincturae cinnamomi fluidunciam unam.

Digitalem per horas quatuor in vase cooperto macera; cola, et cinnamomi tincturam adde.
INFUSION OF PERUVIAN BARK WITH MAGNESIA.

Take of Peruvian bark, in powder, one ounce.
Magnesia, one drachm.
Cold water, one pint

Add the water gradually, and rub them well together for fifteen minutes. Let the infusion stand for one hour, then filter.

INFUSION OF PERUVIAN BARK WITH LEMON JUICE.

Take of Peruvian bark, in powder, one ounce.
Juice of lemons, two fluidounces.
Opiated tincture of camphor, three fluidrachms.
Cold water, one pint.

Macerate for twelve hours in a covered vessel, and strain.

INFUSION OF COLUMBO.

Take of Columbo, sliced, one drachm.
Boiling water, half a pint.

Infuse for two hours in a covered vessel, and strain.

INFUSION OF FOXGLOVE.

Take of Foxglove, dried, one drachm.
Boiling water, half a pint.
Tincture of cinnamon, one fluidounce.

Infuse the foxglove for four hours in a covered vessel, strain, and add the tincture of cinnamon.
INFUSUM EUPATORII.

R. Eupatorii persoliati unciam unam.
Aqua bullientis octantem unum.

Macera per horas duas in vase levitēr clauso, et cola.

INFUSUM GENTIANÆ COMPOSITUM.

R. Gentianæ concise unciam dimidiam.
Aurantii corticalis contusi drachmam unam.
Coriandri contusi drachmam dimidiam.
Alcoholis diluti fluidencias quatuor.
Aqua frigidæ octantem unum.

Alcohol dilutum primo cæteris infunde; et post horas tres, aquam adde: deinde per horas duodecim macera, et cola.

INFUSUM LINI.

R. Lini seminum contritorum unciam unam.
Glycyrrhizæ contusæ unciam dimidiam.
Aqua bullientis octantes duos.

Macera per horas quatuor in vase levitēr clauso, et cola.

INFUSUM QUASSIÆ.

R. Quassiae rasæ drachmam unam.
Aqua frigidæ octantem dimidium.

Macera per horas duodecim, et cola.
INFUSIONS.

INFUSION OF THOROUGHWORT.

Take of Thoroughwort, one ounce.
Boiling water, one pint.
Infuse for two hours in a covered vessel, and strain.

COMPOUND INFUSION OF GENTIAN.

Take of Gentian, sliced, half an ounce.
Orange peel, bruised, one drachm.
Coriander, bruised, half a drachm.
Diluted alcohol, four fluidounces.
Cold water, one pint.

First, pour the diluted alcohol on the articles, and, three hours after add the water; then macerate for twelve hours, and strain.

INFUSION OF FLAXSEED.

Take of Flaxseed, in meal, one ounce.
Liquorice, bruised, half an ounce.
Boiling water, two pints.

Infuse for four hours in a covered vessel, and strain.

INFUSION OF QUASSIA.

Take of Quassia, rasped, one drachm.
Cold water, half a pint.

Macerate for twelve hours, and strain.
INFUSUM QUASSIÆ CUM SULPHATE ZINCI.

R. Quassiae rasæ drachmam unam.
   Zinci sulphatis grana octo.
   Aquæ frigidæ octantem dimidium.

Macera per horas duodecim, et cola.

INFUSUM ROSÆ COMPOSITUM.

R. Rosae siccatæ unciam dimidiam.
   Aquæ bullientis octantes duos cum semisse.
   Acidis sulphurici diluti fluidrachmas tres.
   Sacchari unciam unam cum semisse.

Aquam rosæ superinfunde in vase vitreo; dein acidum inmiscē, et macera per horam dimidiam. Denique liquorem cola, et saccharum adjice.

INFUSUM SENNAE COMPOSITUM.

R. Sennæ unciam unam cum semisse.
   Potassæ supertartratis drachmas duas.
   Zingiberis drachmam unam.
   Aquæ bullientis octantem unum.

Macera per horam unam in vase leviter clauso, et cola.

INFUSUM SENNAE ET TAMARINDI.

R. Sennæ drachmam unam.
   Tamarindi unciam unam.
   Coriandri contusi drachmam dimidiam.
   Sacchari unciam dimidiam.
   Aquæ bullientis octantem dimidium.
INFUSION OF QUASSIA WITH SULPHATE OF ZINC.

Take of Quassia, rasped, one drachm.
Sulphate of zinc, eight grains.
Cold water, half a pint.

Macerate for twelve hours, and strain.

COMPOUND INFUSION OF ROSES.

Take of Roses, dried, half an ounce.
Boiling water, two pints and a half.
Diluted sulphuric acid, three fluidrachms.
Sugar, one ounce and a half.

Pour the water upon the roses in a glass vessel; then mix in the acid, and infuse for half an hour. Lastly strain the infusion, and add the sugar to it.

COMPOUND INFUSION OF SENNA.

Take of Senna, one ounce and a half.
Supertartrate of potass, two drachms.
Ginger, one drachm.
Boiling water, one pint.

Infuse for an hour in a covered vessel, and strain.

INFUSION OF SENNA AND TAMARIND.

Take of Senna, one drachm.
Tamarind, one ounce.
Coriander, bruised, half a drachm.
Sugar, half an ounce.
Boiling water, half a pint.
INFUSA.

Macera per horas quatuor, nonnunquam agitans, in vase clauso fictili, non plumbo vitreato, et cola.

INFUSUM SERPENTARIIÆ.

R. Serpentariae unciam dimidiam.
Aquae bullientis octantem dimidium.

Macera per horas duas in vase leviter clauso, et cola.

INFUSUM SPIGELLIÆ.

R. Spigelii drachmas duas.
Aquae bullientis octantem dimidium.

Macera per horas quatuor in vase leviter clauso, et cola.

INFUSUM TABACI.

R. Tabaci drachmam unam.
Aquae bullientis octantem unum.

Macera per horam unam in vase leviter clauso, et cola.

INFUSUM ULMII.

R. Ulmi concisæ unciam unam.
Aquae bullientis octantem unum.

Macera per horas duodecim in vase clauso, saepe agitans, et cola.
Infuse for four hours, with occasional agitation, in a close earthen vessel not glazed with lead, and strain.

---

INFUSION OF VIRGINIA SNAKEROOT.

Take of Virginia snakeroot, half an ounce.  
Boiling water, half a pint.

Infuse for two hours in a covered vessel, and strain.

---

INFUSION OF CAROLINA PINK.

Take of Carolina pink, two drachms.  
Boiling water, half a pint.

Infuse for four hours in a covered vessel, and strain.

---

INFUSION OF TOBACCO.

Take of Tobacco, one drachm.  
Boiling water, one pint.

Infuse for one hour in a covered vessel, and strain.

---

INFUSION OF SLIPPERY ELM.

Take of Slippery elm, sliced, one ounce.  
Boiling water, one pint.

Infuse for twelve hours in a covered vessel, near the fire with frequent agitation, and strain.
LINIMENTA.

INFUSUM VALERIANÆ.

R. Valerianæ drachmas duas.
Aqua bullientis octantem dimidium.

Macera per horam unam in vase leviter clauso, et cola.

LINIMENTA.

Linimenta plerumque ex oleis parantur, et, ut cuti facile il-
linantur, penitus fluida esse debent.

LINIMENTUM AMMONIÆ.

R. Aquæ ammoniæ;
Olivæ olei utriusque partem æquam.

Misce.

LINIMENTUM AMMONIÆ ET ANTIMONII TAR-
TARIZATI.

R. Linimenti ammoniæ fluidunciam unam.
Ammonii tartarizati drachmam unam.

Misce.
INFUSION OF VALERIAN.

Take of Valerian, two drachms.
   Boiling water, half a pint.

Infuse for an hour in a covered vessel, and strain.

LINEMENTS.

Liniments are generally prepared from oily substances, and are in a fluid state, as they are to be rubbed on the body.

LINIMENT OF AMMONIA.

Take of Water of ammonia;
   Olive oil, equal parts.

Mix.

LINIMENT OF AMMONIA WITH TARTARIZED ANTIMONY.

Take of Liniment of ammonia, one fluidounce.
   Tartarized antimony, one drachm.

Mix.
LINIMENTUM AQUÆ CALCIS.

R. Lini olei;
Aquæ calcis, utriusque partem æquam.

Misce.

LINIMENTUM CAMPHORATUM.

R. Camphoræ per alcohol in pulverem redactæ unciam dimidiam.
Olivæ olei fluidencias quatuor.

Misce.

LINIMENTUM CANTHARIDUM.

R. Cantharidum in pulverem tritarum unciam unam.
Terebinthinae olei fluidencias octo.

Fervescant per horas tres, dein colantur.

LINIMENTUM SAPonis CAMPHORATUM.

R. Saponis albi rasi uncias duodecin.
Camphoræ uncias duas.
Olei volatilis rorismarini fluidrachmas duas.
Alcoholis congium unum.

Digere saponem in alcoholæ per triduum; dein liquori colato, adde camphoram et oleum, diligenter agitans.
LINIMENT OF LIME WATER.

Take of Flaxseed oil;
Lime water, each equal parts.

Mix.

CAMPHORATED LINIMENT.

Take of Camphor reduced to a powder by means of alcohol,
half an ounce.
Olive oil, four fluidounces.

Mix.

LINIMENT OF CANTHARIDES.

Take of Cantharides, in powder, one ounce.
Oil of turpentine, eight fluidounces.

Simmer for three hours, then set by to cool, and filter.

CAMPHORATED SOAP LINIMENT.

OPODELDOC.

Take of Castile soap uncoloured, in shavings, twelve ounces.
Camphor, two ounces.
Volatile oil of rosemary, two fluidrachms.
Alcohol, one gallon.

Digest the soap in the alcohol for three days, then filter, and add the camphor and oil, mixing them intimately.
LINIMENTUM SAPONIS ET OPII

Eodem modo, ut supra, paratur, adjecta opii uncia una, quae cum sapone et alcohole digerenda est.

LINIMENTUM TABACI.

R. Tabaci concisi unciam unam.
    Adipis libram unam.

Adipi incoque tabacum super ignem lenem donec friabile fiat; tum per luteum exprime.

LINIMENTUM TEREBINTHINÆ COMPOSITUM.

R. Cerati resinosi libram unam.
    Terebinthinae olei octantem dimidium.

Liquefacto cerato adjice oleum terbinthinae, et misc.

MAGNESIA.

MAGNESIA.

R. Magnesiae carbonatis quantumvis.

Crucibulo inditus, igne rubescat per horas duas; dein in vasis vitreis bene obturatis servetur.
LINIMENT OF SOAP AND OPIUM

Is prepared in the same way, by adding an ounce of opium, and digesting it with the soap and alcohol.

TOBACCO LINIMENT.

Take of Tobacco, cut fine, one ounce.
Hog's lard, one pound.

Simmer the tobacco in the lard over a gentle fire until it becomes crisp, and strain.

COMPOUND LINIMENT OF TURPENTINE.

Take of Resinous cerate, one pound.
Oil of turpentine, half a pint.

Melt the cerate, and add the oil of turpentine.

MAGNESIA.

Take of Carbonate of magnesia, any quantity.

Heat it to redness in a crucible, and keep it in this state for two hours. Then inclose it in well stopped glass bottles.
MELLITA.

MEL DESPUMATUM.

R. Mellis quantumvis.

In balneo aquoso liqua; tum spumam aufer.

MEL SCILLÆ ACETATUM.

R. Mellis despumati libras tres.
Aceti scillæ octantes duos.

Decoque in vase vitreo ad crassitudinem idoneam aquæ balneo, sodæ muriate saturato.

MEL SCILLÆ COMPOSITUM.

R. Scillæ siccatae et contusæ;
Senegæ contusæ, utriusque uncias quatuor.
Aquæ octantes quatuor.

Coque igne leni ad consumendam aquam dimidiam; cola, et adde mellis despumati, libras duas: deinde coque ad octantes tres, et in uncia quaque hujus liquoris solve antimonii tartarizati granum unum.
PREPARED HONEYS.

CLARIFIED HONEY.

Take of Honey, any quantity.

Melt it by means of a water bath, then take off the scum.

ACETATED HONEY OF SQUILL.

CALLED OXYMEL OF SQUILL.

Take of Clarified honey, three pounds.

Vinegar of squill, two pints.

Boil them down, in a glass vessel, to a proper consistence, on a water bath, saturated with muriate of soda.

COMPOUND HONEY OF SQUILL.

Take of Squill, dried and bruised;

Seneca snakeroot, bruised, of each four ounces.

Water, four pints.

Boil over a gentle fire, till the water is half consumed; strain, and add, of clarified honey, two pounds; boil to three pints, and dissolve in every ounce of this liquor one grain of tartarized antimony.
MISTURÆ.

MISTURA AMMONIACI.

R. Ammoniaci drachmas duas. 
Aquæ octantem dimidium.

Tere ammoniacum cum aqua paulatim instillata, donec quam optime misceantur.

MISTURA AMYGDALÆ.

R. Amygdalarum unciarn uniam. 
Sacchari purificati unciarn dimidiam. 
Aquæ octantes duos cum semisse.

Amygdalas decorticatas in mortario lapideo diligenter contunde, aquam simul paulatim affundens; dein cola.

MISTURA AMMONIACI ET ANTIMONII.

R. Misturse ammoniaci fluiduncias quatuor. 
Vini antimonii tartarizati fluidrachmas quatuor. 
Syropi Tolutani fluidunciam unam 
Tincturæ camphoræ opiatæ fluidrachmas quatuor. 

Misce.

MISTURA CALCIS CARBONATIS.

R. Calcis carbonatis præparati unciarn uniam cum semisse. 
Sacchari unciarn uniam. 
Acaciae gummi in pulverem triti unciarn dimidiam. 
Olei cinnamomi minima decem. 
Aquæ fluiduncias viginti.
MIXTURES.

AMMONIACUM MIXTURE.

Take of Ammoniacum, two drachms.
Water, half a pint.

Rub the ammoniacum with the water gradually poured upon it, until they are perfectly mixed.

ALMOND MIXTURE.

Take of Almonds, an ounce.
Refined sugar, half an ounce.
Water, two pints and a half.

Beat the almonds, when blanched, thoroughly in a stone mortar, gradually pouring on them the water; then strain.

MIXTURE OF AMMONIACUM AND ANTIMONY.

WHITE MIXTURE.

Take of Ammoniacum mixture, four fluidounces.
Wine of antimony, four fluidrachms.
Syrup of Tolu, one fluidounce
Opiated tincture of camphor, four fluidrachms.
Mix.

MIXTURE OF CARBONATE OF LIME.

Take of Prepared carbonate of lime, one ounce and a half.
Sugar, one ounce.
Acacia gum, in powder, half an ounce.
Oil of cinnamon, ten minims.
Water, twenty fluidounces.
Acaciae gummi subige cum aquae fluiduncius quatuor. Deinde tere oleum cum saccharo et omnia misce.

MISTURA CAMPHORÆ.

R. Camphorae drachmam dimidiam.
   Alcoholis minima decem.
   Sacchari unciam dimidiam.
   Aquæ octantem unum.

Camphoram primum cum alcohole tere, deinde cum aqua paulatim instillatæ, et cola.

MISTURA FERRI COMPOSITA.

R. Myrrhae in pulverem tritæ drachmam unam.
   Potassæ subcarbonatis grana viginti quinque.
   Aquæ rosæ octantem dimidium.
   Ferri sulphatis in pulverem tritæ scrupulum unum.
   Spiritus lavandulæ fluidunciam dimidiam.
   Sacchari drachmam unam.

Myrrham cum potassae subcarbonate et saccharo simul tere, hisque dum conteruntur, primum aquam rosæ et spiritum lavandulæ, postremo ferri sulphatem adjice. Misturam statim in vas vitreum immitte, idque obtura.

MISTURA MAGNESIÆ.

R. Magnesiae drachmam unam.
   Aquæ ammoniæ carbonatis fluidrachmam unam.
   Aquæ cinnamomi fluidrachmas tres.
   Aquæ distillatæ fluiduncias quinque cum semisse.

Misce.
MIXTURES.

Rub down the gum with four ounces of water. Then rub the oil with the sugar, and afterwards mix the whole together.

CAMPHOR MIXTURE.

Take of Camphor, half a drachm.
Alcohol, ten minims.
Sugar, half an ounce.
Water, one pint.

First rub the camphor with the alcohol, then with the water gradually added, and strain the liquor.

COMPOUND MIXTURE OF IRON.

CALLED MYRRH MIXTURE.

Take of Myrrh, in powder, one drachm.
Subcarbonate of potass, twenty-five grains.
Rose water, half a pint.
Sulphate of iron, in powder, one scruple.
Spirit of lavender, half a fluidounce.
Sugar, one drachm.

Rub together the myrrh, the subcarbonate of potass and sugar, and during the trituration, add gradually, first the rose water and spirit of lavender, and lastly the sulphate of iron. Pour the mixture immediately into a suitable glass bottle, and stop it close.

MAGNESIA MIXTURE.

Take of Magnesia, one drachm.
Water of carbonate of ammonia, one fluidrachm.
Cinnamon water, three fluidrachms
Distilled water five fluidounces and a half.
Mix.
OLEA DISTILLATA.

MISTURA MOSCHI.

R. Moschi;
Acaciae gummi in pulverem triti.
Sacchari purificati, singulorum drachmam unam.
Aquae rosae fluiduncias sex.

Tere moschum cum saccharo, deinde cum gummi, instillata paulatim aquâ rosae.

MISTURA ZINCI SULPHATIS.

R. Zinci sulphatis drachmas duas.
Spiritus lavandulae fluidrachmas duas.
Aquae fluiduncias sex.

Misce.

OLEA DISTILLATA.

In oleis volatilibus parandis introductur materia, ex qua oleum derivandum sit, in retortam, seu vas quodque ad distillandum idoneum; et aquae ad materiam tendam satis infundetur: deinde oleum in vas amplum refrigeratorium distillet.

Oleum cum aqua transvectum postea separandum est, prout aquâ levius, summâ supernatet seu gravius imum petat.

Hoc modo paranda sunt

OLEUM ANISI,

Ab aniso.

OLEUM CHENOPODII,

A chenopodio.
MUSK MIXTURE.

Take of Musk;

Acacia gum, in powder;
Refined sugar, each, one drachm.
Rose water, six fluidounces.

Rub the musk first with the sugar, then with the gum, and add the rose water by degrees.

SULPHATE OF ZINC MIXTURE.

Take of Sulphate of zinc, two drachms.
Spirit of lavender, two fluidrachms.
Water, six fluidounces.

Mix.

DISTILLED OILS.

In preparing such oils as are volatile, we introduce the substance from which the oil is to be obtained, into a retort or common still, and pour on as much water as will cover it; then distil into a large refrigeratory.

The oil comes over with the water, and is afterwards to be separated from it, according as it may be lighter than the water, and swim upon its surface, or heavier, and sink to the bottom.

According to the above method are prepared

OIL OF ANISE,

From anise.

OIL OF WORMSEED,

From wormseed.
OLEI DISTILLATA.

OLEUM CUNILÆ,
A cunila.

OLEUM FœNICULI,
A fœniculo.

OLEUM GAULTHERIÆ,
A gaultheria.

OLEUM JUNIPERI,
A junipero.

OLEUM LAVANDULÆ,
A lavandula.

OLEUM MENTHÆ PIPERITÆ,
A mentha piperita.

OLEUM MENTHÆ VIRIDIS,
A mentha viridi.

OLEUM MONARDÆ,
A monarda.

OLEUM ORIGANI,
Ab origano.

OLEUM PIMENTÆ,
A pimenta.

OLEUM RORISMARINI,
A roremarino.
OIL OF PENNYROYAL,
From pennyroyal.

OIL OF FENNEL,
From fennel.

OIL OF PARTRIDGE BERRY,
From partridge berry.

OIL OF JUNIPER,
From juniper.

OIL OF LAVENDER,
From lavender.

OIL OF PEPPERMINT,
From peppermint.

OIL OF SPEARMINT,
From spearmint.

OIL OF MONARDA,
From monarda.

OIL OF ORIGANUM,
From marjoram.

OIL OF PIMENTO,
From pimento.

OIL OF ROSEMARY,
From rosemary.
OLEA DISTILLATA.

OLEUM SASSAFRAS,

A sassafras.

OLEUM SUCCINI.

R. Succini quantumvis, in pulverem redacti subtilem cum arenæ puræ pari pondere.

In retortam vitream immitte et ex iis distillent in arenæ balneo, calore gradatim aucto, liquor acidus, oleum, et sal oleosum.

Deinde oleum cum acqua quantitatem suam sexies superante, iterum distillet, donec in excipulum aquæ bis triens transierit. Oleum ab aqua separa, et in vasis bene obturatis serva.

OLEUM SUCCINI OXIDATUM.

R. Olei succini fluidrachmam unam.

Acidi nitrici fluidrachmas tres cum semisse.

Oleum succini in vas vitreum mitte, et acidum guttatim instilla, misturam eodem tempore spathæ vitrea movens. Per horas triginta sex requiescat, dein ab acido fluido resinosum supernatus separa; et primo in aqua frigida, et denique in aqua calida ablue, donec sapor acidulus evanuerit.
DISTILLED OILS.

OIL OF SASSAFRAS.
From sassafras.

OIL OF AMBER.
Take of Amber, any quantity, reduced to a fine powder, with an equal weight of clean sand.

Put them into a glass retort, and distil from them in a sand bath, with a gradually increased heat, an acid liquor, oil, and salt impregnated with oil.

Re-distil the oil, with six times its quantity of water, till two thirds of the water have passed into the receiver; then separate the volatile oil from the water, and preserve it in well stopped phials.

OXIDATED OIL OF AMBER.
Take of Oil of amber, one fluidrachm.
Nitric acid, three and a half fluidrachms.

Put the oil of amber into a glass vessel, and gradually drop the acid into it, at the same time stirring the mixture with a glass rod. Let it stand for thirty-six hours, then separate the supernatant resinous matter from the acid fluid beneath, and wash it repeatedly, first with cold, and lastly with hot water, till the acid taste disappears.
PILULÆ.

PILULÆ ALOETICÆ.

R. Aloës socotrinaræ in pulverem tritæ;
Saponis, utriusque partem æqualem.

Subige cum aqua, ut fiat massa ad pilulas formandas idonea.

PILULÆ ALOES ET COLOCYNTHIDIS.

R. Aloës socotrinaræ;
Scammoniaræ utriusque uncias duas.
Potassæ sulphatis drachmas duas.
Colocynthidis unciam unam.
Caryophyllorum olei fluidrachmas duas.

Aloën et scammoniam cum potassae sulphate in pulverem contrere; tum colocynthidem in pulverem tenuissimum tritam, et oleum admisce, denique cum syrupo simplici subige in massam.

PILULÆ ALOES ET MYRRHÆ.

R. Aloës socotrinaræ uncias duas.
Myrrhæ unciam unam.
Croci unciam dimidiam.

Cum syrupo subige in massam.
PILLS.

ALOETIC PILLS.

Take of Socotrine aloes in powder.
Castile Soap each an equal part.

With water form a mass fit for making pills.

PILLS OF ALOES AND COLOCYNTH.

FORMERLY "PILULÆ COCHIÆ."

Take of Socotrine aloes;
Scammony, each two ounces.
Sulphate of potass, two drachms.
Colocynth, an ounce.
Oil of cloves, two fluidrachms.

Reduce the aloes and scammony into a powder with the sulphate of potass, then add the colocynth in fine powder, and the oil of cloves, and with simple syrup form a mass.

PILLS OF ALOES AND MYRRH.

FORMERLY "PILULÆ RUFÆ."

Take of Socotrine aloes, two ounces,
Myrrh, one ounce.
Saffron, half an ounce.

Beat them into a mass with syrup.
PILULÆ ALOES CUM MYRRHA ET GUAIAÇO.

R. Aloes socotrinaræ in pulverem tritæ unciæ dimidiam.  
Croci in pulverem triti;  
Myrrhæ in pulverem tritæ, utriusque drachmas duas.  
Guaiaci resineæ in pulverem tritæ unciæ dimidiam.  
Oxidi antimonii unciæ dimidiam.

Cum copaibâ subige in massam.

------------

PILULÆ ANTIMONIALES COMPOSITÆ.

R. Hydrargyri submuriatis drachmas duas.  
Opii in pulverem triti drachmam unam.  
Antimonii tartarizati scrupulum unum.

Cum syrupo subige in massam, et in pilulas sexaginta divide.

------------

PILULÆ ARSENICI.

R. Acidi arseniosi grana duo.  
Opii in pulverem triti grana octo.  
Saponis grana viginti duo.

Subige in massam, et divide in pilulas triginta duas.

------------

PILULÆ ASSAFŒTIDÆ.

R. Assafcetidæ partes tres.  
Saponis partem unam.

Cum aqua subigantur in massam.
PILLS OF ALOES MYRRH AND GUAIACUM.

Take of Socotrine aloes in powder, half an ounce.
   Saffron in powder;
   Myrrh in powder, each two drachms.
   Resin of guaiacum in powder, half an ounce.
   Oxide of antimony, half an ounce.

With copaiba form a mass.

COMPOUND ANTIMONIAL PILLS.

Take of Submuriate of mercury, two drachms.
   Opium in powder, one drachm.
   Tartarized antimony, one scruple.

With syrup form a mass to be divided into sixty pills.

PILLS OF ARSENIC.

Take of Arsenious acid, two grains.
   Opium in powder, eight grains.
   Castile soap, twenty-two grains.

Form a mass and divide into thirty-two pills.

ASSAFÆTIDA PILLS.

Take of Assafætida, three parts.
   Castile soap, one part.

With water beat into a mass.
PILULÆ ASSAFœTIDÆ COMPOSITÆ.

R. Assafoetidae;
   Aloes socotrinae;
   Saponis; singulorum partem æqualem.

Cum aquâ subigantur in massam.

PILULÆ AURI MURIATIS.

R. Auri muriatis grana decem.
   Glycyrrhizae in pulverem tritæ drachmas tres.

Cum syrupo simplici subige in massam et divide in pilulas centum et quinquaginta.

PILULÆ COLOCYNTHIDIS EXTRACTI COMPOSITI.

R. Colocynthidis extracti compositi drachmam cum semisse.
   Antimonii oxidi drachmam dimidiam.

Fiat massa, in pilulas triginta dividenda.

PILULÆ FERRI SULPHATIS.

R. Ferri sulphatis drachmam unam.

Cum extracto gentianæ subige in massam et divide in pilulas triginta æquales.
COMPOUND ASSAFÖETIDA PILLS.

Take of Assafœtida;
   Socotrine aloes;
   Castile soap, each equal parts.

With water beat into a mass.

PILLS OF MURIATE OF GOLD.

Take of Muriate of gold, ten grains.
   Liquorice in powder, three drachms.

With simple syrup form a mass and divide into a hundred and fifty pills.

PILLS OF COMPOUND EXTRACT OF COLOCYNTH.

Take of Compound extract of colocynth, a drachm and a half.
   Oxide of antimony, half a drachm.

Form a mass, and divide into thirty pills.

PILLS OF SULPHATE OF IRON.

Take of Sulphate of iron, one drachm.

With the extract of gentian form a mass, and divide into thirty pills.
PILULÆ FERRI SULPHATIS COMPOSITÆ.

R. Rhei in pulverem triti drachmanum cum semisse.
   Ferri sulphatis scrupulos duos.
   Saponis drachmanum dimidiam.

Cum aqua subige in massam et divide in pilulas quadraginta æquales.

PILULÆ GAMBOGIAE ET SCAMMONIAE.

R. Gambogiae in pulverem tritae unciam unam.
   Scammonii in pulverem triti unciam dimidiam.
   Potassae nitratis drachmanum unam.
   Saponis drachmas duas.

Cum aqua subige in massam et divide in pilulas quadringentas.

PILULÆ HYDRARGYRI.

R. Hydrargyri purificati;
   Confectionis roseæ, utriusque unciam unam.
   Glycyrrhizae in pulverem tritae unciam dimidiam.

Tere hydrargyrum cum confectione in mortario vitreo donec illius globuli visum penitus effugerint; dein glycyrrhizam adjice et subige in massam statim dividendam in pilulas quadringentas octoginta æquales.

PILULÆ HYDRARGYRI OXYMURIATIS.

R. Hydrargyri oxymuriatis grana decem.
   Marantæ scrupulum unum.

Cum ammoniae muriate in aqua soluto subige in massam.
COMPOUND PILLS OF SULPHATE OF IRON.

Take of Rhubarb in powder, one drachm and a half.
Sulphate of iron, two scruples.
Castile soap, half a drachm.

With water form a mass and divide into forty pills.

PILLS OF GAMBOGE AND SCAMMONY.

Take of Gamboge in powder, one ounce.
Scammony in powder, half an ounce.
Nitrate of potass, one drachm.
Castile soap, two drachms.

With water form a mass and divide into four hundred pills.

MERCURIAl PILLS.

BLUE PILLS.

Take of Purified mercury;
Confection of roses, each one ounce.
Liquorice in powder, half an ounce.

Rub the mercury with the confection in a glass mortar till the globules disappear; then add the liquorice and form a mass to be immediately divided into four hundred and eighty pills.

PILLS OF OXYMURIATE OF MERCURY.

Take of Oxymuriate of mercury, ten grains.
Arrow root, one scruple.

With muriate of ammonia dissolved in water form a mass.
PILULÆ HYDRARGYRI SUBMURIATIS.

R. Hydrargyri submuriatis drachmam dimidiam.
Saponis scrupulum unum.

Cum aquâ subige in massam, et divide in pilulas trigiuta æquales.

PILULÆ JALAPÆ COMPOSITÆ.

R. Jalapæ in pulverem tritæ;
Rhei in pulverem triti;
Saponis, singulorum unciam unam.
Hydrargyri submuriatis drachmas sex cum scrupulis duobus.
Antimonii tartarizati grana viginti octo.

Cum aquâ subige in massam et divide in pilulas quadringentas æquales.

PILULÆ MYRRHÆ ET FERRI.

R. Ferri limaturæ purificatae unciam unam.
Myrrhæ in pulverem tritæ;
Saponis, utriusque drachmas duas.

Cum syrupo subige in massam et divide in pilulas singulæ grana sex pendentes.

PILULÆ OPII.

R. Opii in pulverem triti drachmam unam.
Saponis grana duodecim.

Cum aquâ subige in massam et divide in pilulas sexaginta æquales.
PILLS OF SUBMURIATE OF MERCURY.

Take of Submuriate of mercury, half a drachm.
    Castile soap, one scruple.

With water form a mass and divide into thirty pills.

COMPOUND PILLS OF JALAP.

Take of Jalap in powder;
    Rhubarb in powder;
    Castile soap, each one ounce.
    Submuriate of mercury six drachms and two scruples.
    Tartarized antimony, twenty eight grains.

With water form a mass and divide into four hundred pills.

PILLS OF MYRRH AND IRON.

Take of Purified iron filings, one ounce.
    Myrrh in powder;
    Castile soap, each two drachms.

With syrup form a mass and divide into pills, each weighing six grains.

PILLS OF OPIUM.

Take of Opium in powder, one drachm.
    Castile soap, twelve grains.

With water form a mass and divide into sixty pills.
PILULÆ PICIS.

R. Picis liquidae drachmam unam.
Inulæ in pulverem tritæ quantum sufficit ad formam... dam massam in pilulas sexaginta dividendum.

---

PILULÆ RHEI COMPOSITÆ.

R. Rhei in pulverem triti unciam unam.
Aloës socotrinæ in pulverem tritæ drachmas sex.
Myrrhae in pulverem tritæ unciam dimidiam.
Olei menthae piperitæ fluidrachnam dimidiam.

Cum syrupo aurantii corticis subige in massam.

---

PILULÆ SCILLÆ.

R. Scillæ siccatæ in pulverem tritæ drachmam unam.
Saponis grana viginti quatuor.

Cum aquâ subige in massam et divide in pilulas quadraginta æquales.

---

PILULÆ SODÆ SUBCARBONATIS.

R. Sodæ subcarbonatis exsiccatæ drachmas duas.
Saponis drachmam dimidiam.
Subige in massam et divide in pilulas quadraginta æquales.
TAR PILLS.

Take of Tar one drachm.
Elecampane in powder, a sufficient quantity to form a mass to be divided into sixty pills.

COMPOUND PILLS OF RHUBARB.

Take of Rhubarb in powder, one ounce.
Socotrine aloes in powder, six drachms.
Myrrh in powder, half an ounce.
Oil of peppermint, half a fluidrachm.

With syrup of orange peel, form a mass.

PILLS OF SQUILL.

Take of Dried squills in powder, one drachm.
Castile soap, twenty-four grains.

With water form a mass, and divide into forty pills.

PILLS OF SUBCARBONATE OF SODA.

Take of Subcarbonate of soda, dried, two drachms.
Castile soap, half a drachm.

Form a mass, and divide into forty pills.
PLUMBUM.

PLUMBI ACETAS.

R. Plumbi subcarbonatis quantumvis.
Aceti purificati pondus decuplum.

Digere in vase vitreo, donec dulcescat acetum. Tun hoc effuso, aceti perge addens donec non amplius dulcescat. Cola, et alternatim lente vaporando et refrigerando, in crystallos redige sub umbra exsiccandas.

PLUMBI SUBACETAS LIQUIDUS.

R. Plumbi oxidi semivitrei libras duas.
Aceti purificati congium unum.

Misce, et decoque ad octantes sex, assiduè movens; dein sepone, ut subsidant faèces, et cola.

POTASSA.

POTASSA.

R. Aquæ potassæ quantumvis.

In vase ferreo mundissimo operto vaporet, donec, ebullitione finitâ, materies salina tranquillè fluat instar olei, quod fit ante-
LEAD.

ACETATE OF LEAD.

SUGAR OF LEAD.

Take of Subcarbonate of lead, any quantity.

Purified vinegar, ten times its weight.

Digest in a glass vessel until the vinegar becomes sweet. Having poured this off, add more vinegar, until it ceases to become sweet. Filter the liquor and crystallize by alternate slow evaporation and refrigeration. The crystals are to be dried in the shade.

LIQUID SUBACETATE OF LEAD.

GOULARD'S EXTRACT.

Take of Semivitrified oxide of lead, two pounds.

Purified vinegar, one gallon.

Mix, and boil down to six pints, constantly stirring; then set it by, that the seculencies may subside, and strain.

POTASS.

POTASS.

Take of Solution of potass, any quantity.

Evaporate it in a covered very clean iron vessel, till, on the ebullition ceasing, the saline matter flows gently like oil, which
quam vas igne rubescat. Dein effundatur super laminam fer-
ream nitidam; in massulas secetur antequam durescat, et illico
in phiala bene obturanda reponatur.

POTASSÆ ACETAS.

R. Potassæ carbonatis libram unam.

Coquatur, lenissimo igne, in aceti purificati quadruplo vel
quintuplo; et denuo acetum subinde adjiciatur, donec prio-
ris parte aquosà fere vaporando dissipatà, acetum nuper addi-
tum nullam moveat effervescentiam, quod siet consumptis aceti
octantibus circiter viginti; postea lentè exsiccatur. Sal impurus
residuus, leni igne aliquantisper, nec justo diutius, liquefiat;
dein aquà solvatur, et per chartam coletur. Si liquefactio rite
peracta fuerit, liquor colatus limpidus erit, sin minus, coloris
fusci. Postea, lenissimo igne vaporet hic liquor ex vase vitreo
minime profundo, sale, dum arescit, subinde moto, quo citius ad
siccitatem perducatur. Acetas potassæ dein in vase optime
clauso asservari debet, ne aëre liquescat.

AQUA POTASSÆ.

R. Calcis recentis uncias octo.

Potassæ carbonatis uncias sex.

Injiciatur calx in vas ferreum vel figulinum, cum aquæ calidæ
fluidunicis viginti octo. Ebullitione peractâ, statim addatur sal;
omniaque bene permistis, vas operiatur donec frigescant.
Frigefacta materia, et dein bene agitata, effundatur in infundibu-
lum vitreum, cujus guttur linteolo puro obstructum sit. Infundi-
happens before the vessel becomes red. Then pour it out on a smooth iron plate; let it be divided into small pieces before it hardens, and immediately deposited in a well-stopped phial.

**ACETATE OF POTASS.**

**FORMERLY DIURETIC SALT.**

Take of Carbonate of potass, one pound.

Boil it with a very gentle heat in four or five times its weight of purified vinegar, and add more vinegar at different times, till on the watery part of the preceding quantity being nearly dissipated by evaporation, the new addition of vinegar ceases to raise any effervescence, which will happen when about twenty pints of vinegar have been consumed. It is then to be slowly dried. The impure salt remaining is to be melted with a gentle heat, for a short time, but no longer than necessary, and afterwards dissolved in water, and filtered through paper. If the liquefaction has been properly performed, the filtered liquor will be limpid; but if otherwise, of a brown colour. Afterwards evaporate this liquor with a very gentle heat, in a very shallow glass vessel, occasionally stirring the salt as it becomes dry, that its moisture may be sooner dissipated. Lastly, the acetate of potass ought to be kept in a vessel very closely stopped, to prevent it from deliquescing.

**SOLUTION OF POTASS.**

Take of Fresh burnt lime, eight ounces.

Carbonate of potass, six ounces.

Put the lime into an iron or earthen vessel, with twenty-eight fluidounces of warm water. After the ebullition is finished, instantly add the salt; and having thoroughly mixed them, cover the vessel till they cool. When the mixture has cooled, agitate it well, and pour it into a glass funnel, the throat of which is stopped with a piece of clean linen. Cover the upper ori-
POTASSÆ.

bullis superiis operiatur dum tubus ejus alii vasi vitreo inseratur, ut aqua potassae per linteolum in vas suppositum sensim stillet. Cum primum stillare desiérít, affundatur in infundibulum aquæ fluidunciae aliquot, sed caute, ut ea materiam supernatet. Incipiet iterum stillare aqua potassæ. Sic autem iteranda est aquæ affusio, donec stillaverint octantes tres, quod bidui vel tridui spatii sit; dein liquoris partes superiores cum inferioribus agitatione miscantur; ipseque in vase bene obturato servetur.

POTASSÆ CARBONAS.

R. Potassæ supertartratis quantumvis.

Charta bibulâ madefactâ involutus, vel crucibulo inditus, circumjectis prunis, in massam nigram comburat; quæ dein contrita in crucibulo aperto, igni mediocri subjiciatur usque donec alba vel saltem cinerea sit; cura adhibita ne liquescat. Tum in aqua calida solvatur; per linteum coletur liquor, et in vase ferreo mundo vaporet, sub finem assidue agitatus cochleari ferreo ne materia fundo vasis adhæreat. Sal albissimus restabit, qui paulo diutius super ignem relinquendus est, donec vasis fundus fere rubescat. Postremo refrigeratus in vasis vitreis bene obturatis servetur.

POTASSA CUM CALCE.

R. Aquæ potassæ quantumvis.

Vaporet ad tertiam partem in vase ferreo operto; dein admiscetur calcis recens extinctæ quantum sufficiat ad pultiis solidioris crassitudinem dandam, quæ in vase obturato servetur.
lice of the funnel, and insert its tube into another glass vessel, so that the solution of potass may gradually drop through the rag into the lower vessel. As soon as it ceases to drop, pour into the funnel some ounces of water, but cautiously, so that it may swim above the matter in the funnel. The solution of potass will again begin to drop, and the effusion of water is to be repeated in the same manner, until three pints have dropped, which will happen in the space of two or three days; then mix the superior and inferior parts of the liquor together by agitation, and keep it in a well-stopped phial.

---

CARBONATE OF POTASS.

Take of Impure supertartrate of potass, any quantity.

Wrap it up in moist bibulous paper, or put it into a crucible, and burn it into a black mass, by placing it among live coals. Having reduced this mass to powder, expose it in an open crucible to the action of a moderate fire, till it become white, or at least of an ash-grey colour, taking care that it do not melt. Then dissolve it in warm water; strain the liquor through a linen cloth, and evaporate it in a clean iron vessel, diligently stirring it towards the end of the process, with an iron spatula, to prevent it from sticking to the bottom of the vessel. A very white salt will remain, which is to be left a little longer on the fire, till the bottom of the vessel becomes almost red. Lastly, when the salt is grown cold, keep it in glass vessels well stopped.

---

POTASS WITH LIME.

Take of Solution of potass, any quantity.

Evaporate it in a covered iron vessel till one third remains; then mix it with as much new slacked lime as will bring it to the consistence of pretty solid pap, which is to be kept in a vessel closely stopped.
POTASSÆ SUBCARBONAS.

R. Potassæ subcarbonatis impuri quantumvis.

In crucibulo igne rubescat, dein cum aquâ pari pondere contere et postquam subsederint facies, liquorem in ollam ferream mundissimam infunde; denique ad siccitatem decoque sub finem, assidue, ne vasi adhaereat, agitans.

LIQUOR POTASSÆ SUBCARBONATIS.

R. Potassæ subcarbonatis libram unam.
Aquæ distillatæ fluiduncias duodecim.

Liqua potassæ subcarbonatem in aquâ, et per chartam cola.

POTASSÆ SULPHAS.

R. Salis qui restat post distillationem acidi nitrici, libras duas.
Aquæ bullientis congios duos.

Misce, ut liquetur sal; tum adjice potassæ subcarbonatis quod satis sit ad acidum saturandum. Dein coque, donec pellicula supernatet, et, postquam colaveris, sepone, ut fiant crystalli. Has, effusâ aquâ, super chartam bibulam exsicca.
SUBCARBONATE OF POTASS.
FORMERLY SALT OF TARTAR.

Take of Impure subcarbonate of potass, any quantity.

Heat it red hot in a crucible. Then triturate it with an equal weight of water, and after the faces have subsided, pour the liquor into a very clean iron pot; lastly, boil to dryness, stirring constantly towards the end of the process, to prevent it from sticking to the vessel.

SOLUTION OF SUBCARBONATE OF POTASS.

Take of Subcarbonate of potass, one pound.
Distilled water, twelve fluidounces.

Dissolve the subcarbonate of potass in the water, and then strain the solution through paper.

SULPHATE OF POTASS.
FORMERLY VITRIOLATED TARTAR.

Take of Salt which remains after the distillation of nitric acid, two pounds.
Boiling water, two gallons.

Mix them together that the salt may be dissolved; next add as much subcarbonate of potass as may be requisite for the saturation of the acid. Then boil the solution until a pellicle appears upon the surface, and, after straining it, set it by that crystals may form. Having poured away the water, dry the crystals upon bibulous paper.
POTASSÆ SUPERCARBONAS.

R. Potassæ carbonatis partem unam.

Aquæ partes tres.

Solve in aqua potassæ carbonatem. Liquorem in vas Noothni apparatus medium pone; et per idem, acodem carbonicum a calcis carbonate et acido sulphurico diluto elicitum, donec crystallos deponere cessaverit, transire facias; dein crystallos collige, et super charta bibula exsicca.

POTASSÆ TARTRAS.

R. Potassæ subcarbonatis libram unam.

Potassæ supertartratis libras tres, vel quantum sit.

Aquæ bullientis octantes quindecim.

Potassæ subcarbonati in aqua soluto potassæ superatartratem in pulverem tenuem tritum adice, quamdiu effervescentiam excitet, quæ sere desinit antequam triplum subcarbonatis potassæ pondus injectum fuerit; dein liquorem refrigeratum per chartam cola, et post idoneam exhalationem sepone ut crystalli formentur.

TARTRAS POTASSÆ ET SODÆ.

R. Sodæ subcarbonatis uncias viginti.

Potassæ superatartratis contritæ libras duas.

Aquæ bullientis octantes decem.

Sodæ subcarbonatæm in aquâ liqua, et adijc paulatim potassæ superatartratem. Liquorem per chartam cola; tum coque, donec pellicula supernatet, et sepone, ut sint crystalli. Has, effusa aquâ, super chartam bibulam exsicca.
SUPER-CARBONATE OF POTASS.

Take of Carbonate of potass, one part.
Water, three parts.

Dissolve the carbonate of potass in the water; put the solution in the middle vessel of Nooth's apparatus, and pass through it a stream of carbonic acid gas, obtained from carbonate of lime and diluted sulphuric acid, until the deposition of crystals ceases; then collect the crystals, and dry them on bibulous paper.

---

TARTRATE OF POTASS.
FORMERLY SOLUBLE TARTR.

Take of Subcarbonate of potass, one pound.
Supertartrate of potass, three pounds, or as much as may be sufficient.
Boiling water, fifteen pints.

To the subcarbonate of potass, dissolved in the water, gradually add the supertartrate of potass in fine powder, as long as it raises any effervescence, which generally ceases before three times the weight of the subcarbonate of potass has been added; then strain the cooled liquor through paper; and, after due evaporation, set it aside to crystallize.

---

TARTRATE OF POTASS AND SODA.
CALLED ROCHELLE SALT.

Take of Subcarbonate of soda, twenty ounces.
Supertartrate of potass in powder, two pounds.
Boiling water, ten pints.

Dissolve the carbonate of soda in the water, and gradually add the supertartrate of potass. Filter the solution through paper; evaporate until a pellicle be formed, and set it aside to crystallize. Pour off the liquor, and dry the crystals on blotting paper.
PULVERES.

PULVIS ALOES CUM CANELLA.

R. Aloës socotrīnæ libram unam.
Canellae uncias tres.
Separatim in pulverem tenuissimum tere; dein misce.

PULVIS AROMATICUS.

R. Cinnamomi;
Cardamomi;
Zingiberis; singulorum partem æqualem.
Tere in pulverem tenuissimum, qui in vase vitreo bene obturato servandus est.

PULVIS CALCIS CARBONATIS COMPOSITUS.

R. Calcis carbonatis præparati uncias quattuor.
Cinnamomi drachmam unam cum semisse.
Myristicæ drachmam dimidiam.
Tere simul in pulverem.

PULVIS IPECACUANHÆ ET CUPRI SULPHATIS.

R. Ipecacuanhæ in pulverem tritæ scrupulum unum.
Cupri sulphatis grana quinque.
Tere simul in pulverem.
POWDER OF ALOES WITH CANELLA.

FORMERLY "HIERA PICRA."

Take of Socotrine aloes, one pound.
Canella, three ounces.
Pulverize them separately; then mix them.

AROMATIC POWDER.

Take of Cinnamon;
Cardamon;
Ginger, each equal parts.

Rub them together to a fine powder, which is to be kept in a well stopped glass bottle.

COMPOUND POWDER OF CARBONATE OF LIME.

Take of Prepared carbonate of lime, four ounces.
Cinnamon, a drachm and a half.
Nutmeg, half a drachm.

Powder them together.

POWDER OF IPECACUANHA AND SULPHATE OF COPPER.

Take of Ipecacuanha in powder, one scruple.
Sulphate of copper, five grains.

Rub them together.
PULVIS IPECACUANHÆ ET OPII.

R. Ipecacuanhæ in pulverem tritæ.
   Opii, utriusque partem unam.
   Potassæ sulphatis partes octo.

Tere simul in pulverem tenuem.

---

PULVIS JALAPÆ COMPOSITUS.

R. Jalapæ in pulverem tritæ partem unam.
   Potassæ supertartratis partes duas.

Tere simul in pulverem tenuissimum.

---

PULVIS SCAMMONII COMPOSITUS.

R. Scammonii;
   Potassæ supertartratis, utriusque partem aequalem.

Tere simul in pulverem tenuissimum.

---

SODÆ CARBONAS.

R. Sodæ subcarbonatis libram unam.
   Ammoniæ subcarbonatis uncias tres.
   Aquæ distillatæ octantem unum.

Sodæ subcarbonati in aquâ liquato ammoniam adjice; tum balneo arenæ caloris gradum clxxx, adhíbe per horas tres, vel
POWDER OF IPECACUANHA AND OPIUM.

FORMERLY DOVER'S POWDER.

Take of Ipecacuanha, in powder;
Opium, each one part.
Sulphate of potass, eight parts.

Reduce them to a fine powder.

COMPOUND POWDER OF JALAP.

Take of Jalap in powder, one part.
Supertartrate of potass, two parts.

Rub them together to a fine powder.

COMPOUND POWDER OF SCAMMONY.

Take of Scammony;
Supertartrate of potass, each equal parts.

Rub them together to a fine powder.

SODA.

CARBONATE OF SODA.

Take of Subcarbonate of soda, one pound.
Carbonate of ammonia, three ounces.
Water, one pint.

Having previously dissolved the subcarbonate of soda in the water, add the carbonate of ammonia, then by means of a sand

SODÆ PHOSPHAS.

Phosphatem calcis in vase figulino cum acido sulphurico permisce; dein adde aquam et iterum permisce; tunc vas in aquæ bullientis vapore sove per tres dies, quibus elapsis, materiam aliis aquæ bullientis octantibus novem additis dilue, et per pannum linteum fortrem cola, aquam bullientem paulatim superinfundens, donec acidum omne eluat. Liqueorem colatum sepone, ut faces subsidant, a quibus effunde; dein vaporatione minue ad octantes novem. Huic liquori a facibus effuso, et calefacto in vase figulino, adde subcarbonatem sodæ ex aqua calida solutum, donec cesset effervescencia. Tum cola, et sepone, ut crystalli formentur. His exemptis, liquori, si opus sit, adde paululum subcarbonatis sodæ, ut acidum phosphoricum accurate saturetur, et vaporatione ad crystallos iterum formandos dispone, quamdiu hi prodierint. Crystalli demum in vase bene obturando reponantur.

SODÆ MURIAS EXSICCATUS.

R. Sodæ muriatis quantumvis.

Super ignem torre in vase ferreo, minus arcte cooperto, subinde agitans, donec crepitare cessaverit.
bath apply a heat of 180° for three hours, or until the ammonia be driven off. Lastly, set the solution by to crystallize. The remaining solution may in the same manner be evaporated and set by, that crystals may again form.

PHOSPHATE OF SODA.

Take of Phosphate of lime in coarse powder, ten pounds.
Sulphuric acid, six pounds.
Water, nine pints.
Subcarbonate of soda, a sufficient quantity.

Mix the phosphate of lime with the sulphuric acid in an earthen vessel; then add the water, and mix again; then place the vessel in a vapour bath, and digest for three days; after which, dilute the mass with nine pints more of boiling water, and strain the liquor through a strong linen cloth, pouring over it boiling water in small quantities at a time, until the whole acid be washed out. Set by the strained liquor, that the impurities may subside; decant the clear solution, and evaporate it to nine pints. To this liquor poured from the impurities, and heated in an earthen vessel, add carbonate of soda, dissolved in warm water, until the effervescence ceases. Filter the neutralized liquor, and set it aside to crystallize. To the liquor that remains after the crystals are taken out add a little carbonate of soda, if necessary, so as to saturate exactly the phosphoric acid; and dispose the liquor, by evaporation, to form crystals as long as it will furnish any. Lastly, the crystals are to be kept in a well-closed vessel.

DRIED MURIATE OF SODA.

Take of Muriate of soda, any quantity.

Roast it over the fire in an iron vessel, loosely covered, until it ceases to decrepitate, agitating it from time to time.
SODÆ SUBCARBOÑAS EXSICCATUS.

R. Sodæ subcarbonatis quantumvis.

In vase ferreo nitido, calorem ferventem adhibe, donec penitus exsiccatur; simul spathâ ferreâ assiduè movens. Denique in pulverem tere.

SPIRITUS.

SPIRITUS JUNIPERI COMPOSITUS.

R. Juniperi contusæ libram unam.
   Carui contusi;
   Fæniculi contusi, utriusque unciam unam cum semisse.
   Alcoholis diluti octantes novem.

Macera per biduum; et addito aquæ quantum satis sit ad arcedum empyreuma, distillatione elice octantes novem.

SPIRITUS LAVANDULÆ.

R. Lavandulae recentis libras duas.
   Alcoholis congium unum.

Macera per horas viginti quatuor; et addito aquæ quantum satis sit ad arcedum empyreuma, distillatione elice congium.

SPIRITUS RORISMARINI.

R. Rorismarini recentis libras duas.
   Alcoholis congium unum.

Macera per biduum; et addito aquæ quantum satis sit ad arcedum empyreuma distillatione elice congium.
SPIRITS.

DRIED SUBCARBONATE OF SODA.

Take of Subcarbonate of soda, any quantity.

Apply to it a boiling heat in a clean iron vessel until it becomes perfectly dry, and at the same time constantly stir it with an iron rod. Lastly, reduce it to powder.

SPIRITS.

COMPOUND SPIRIT OF JUNIPER.

Take of Juniper bruised, one pound.
Caraway bruised;
Fennel bruised, each one ounce and a half.
Diluted alcohol, nine pints.

Macerate for two days; and having added enough water to prevent empyreuma, distil off nine pints.

SPIRIT OF LAVENDER.

Take of Fresh lavender, two pounds.
Alcohol, one gallon.

Macerate for twenty hours; and having added enough water to prevent empyreuma, distil off a gallon.

SPIRIT OF ROSEMARY.

Take of Fresh rosemary, two pounds.
Alcohol, one gallon.

Macerate for twenty-four hours, and having added enough water to prevent empyreuma, distil off a gallon.
SPONGIA.—STANNUM.

**SPONGIA.**

**SPONGIA USTA.**

R. Spongiae quantumvis.

In frustula concide, et contunde, ut a rebus alienis adhaerentibus separetur; tum in vase ferreo clauso ure, donec nigra et friabilis hat; denique in pulverem subtilissimum tere.

**STANNUM.**

**PULVIS STANNI.**

R. Stanni quantumvis.

Liqua in vase ferreo super ignem, et agita donec in pulverem redactum fuerit; quem refrigeratum per cribrum transmitte.

**PULVIS STANNI AMALGAMATIS.**

R. Stanni partes quinque.

Hydrargyri purificati partes duas.
Calcis carbonatis praeparati partem unam.

Stanno liquefacto hydrargyrum adde, et simul contere; tum carbonate calcis adjecto, misturam adhuc liquentem, donec particulae metallicae evanuerint, tere. Inter frigescendum misturam in pollen redige.
**Sponge.**

**Burnt Sponge.**

Take of Sponge, any quantity.

Cut it into pieces, and beat it, that any extraneous adherent matters may be separated; then burn it in a close iron vessel until it becomes black and friable; lastly rub it to a very fine powder.

**Tin.**

**Powder of Tin.**

Take of Tin, any quantity.

Having melted it over the fire in an iron vessel, agitate it until it be reduced to powder, which is to be passed, when cold, through a sieve.

**Powder of the Amalgam of Tin.**

Take of Tin, five parts.

- Purified mercury, two parts.
- Prepared carbonate of lime, one part.

Melt the tin, add to it the mercury, and rub them together; then add the carbonate of lime, and while the mixture is liquid, rub till the metallic particles disappear; lastly, while the mixture cools, reduce it to an impalpable powder.
SULPHUREA.—SYRUPI.

SULPHUREA.

SULPHURETUM POTASSÆ.

R. Sulphuris unciam unam.

Potassæ subcarbonatis uncias duas.

Simul contere, et in crucibulo clauso, super ignem lenem donec fusa sit mistura, retine. Ex crucibulo adhuc calentem funde; et frigefactam in vase bene obturato serva.

SULPHURETUM SODÆ.

R. Sulphuris;

Sodæ subcarbonatis exsiccati, utriusque unciam unam.

Modo eodem, quo potassæ sulphuretum, para.

SYRUPI.

SYRUPUS ACETI.

R. Aceti purificati octantes duos cum semisse.

Sacchari libras tres cum semisse.

Coque ut fiat syrupus.

SYRUPUS ALLII.

R. Allii concisi libram unam.

Aquæ bullientis octantes duos.
PREPARATIONS OF SULPHUR.

SULPHURET OF POTASS.

Take of Sulphur, one ounce.
Subcarbonate of potass, two ounces.

Rub them together, and heat the mixture in a covered crucible, over a gentle fire, until it is fused. Pour it from the crucible while hot, and after it has cooled, put it into a close stopped bottle.

SULPHURET OF SODA.

Take of Sulphur;
Dried subcarbonate of soda, of each, one ounce.

Prepare it in the same manner as sulphuret of potass.

SYRUPS.

SYRUP OF VINEGAR.

Take of Purified vinegar, two pints and a half.
Sugar, three pounds and a half.

Boil them to form a syrup.

SYRUP OF GARLIC.

Take of Garlic sliced, one pound.
Boiling water, two pints.
Macera allium in aqua, vaece operto, per horas duodecim, dein
liquoris colati parti uni adjice sacchari partes duas, et fiat sy-
rupus.

SYRUPUS AURANTII CORTICIS.

R. Aurantii corticis exterioris recentis uncias tres.
Aqua bullientis octantem unum cum semisse.
Sacchari libras tres.

Digere corticem in aqua per horas duodecim vaece operto, ve-
siculas radula discerpens; dein liquori colato adde saccharum
contritum, leni calore adhibito, ut fiat syrupus.

SYRUPUS COLCHICI.

R. Colchici recentis in frustra tenuia secti unciam unam.
Aceti purificati octantem unum.
Sacchari uncias viginti sex.

Macera colchicum in aceto per biduum, vas subinde agitans,
dein leniter exprimens cola. Liquori colato adde saccharum
contritum, et coque paululum ut fiat syrupus.

SYRUPUS RHAMNI.

R. Succi desæcati baccarum maturarum rhamni partes
duas.
Sacchari partem unam.

Coque ut fiat syrupus.
Macerate the garlic in the water, in a covered vessel, for twelve hours; then add two parts of sugar, to one part of the strained liquor, and form a syrup.

SYRUP OF ORANGE PEEL.

Take of Fresh orange peel, three ounces.
   Boiling water, one pint and a half.
   Sugar, three pounds.

Digest for twelve hours in a covered vessel, during which time, lacerate the oil vesicles under water by rubbing a grater upon the outside of the peel; then add to the strained liquor the sugar in powder, and with a very gentle heat form a syrup.

SYRUP OF MEADOW SAFFRON.

Take of Fresh meadow saffron cut in slices, one ounce.
   Purified vinegar, one pint.
   Sugar, twenty-six ounces.

Macerate the meadow saffron in the vinegar for two days, occasionally shaking the vessel; then strain the infusion with gentle expression. To the strained infusion add the sugar; and boil a little so as to form a syrup.

SYRUP OF BUCKTHORN.

Take of Defecated juice of ripe buckthorn, two parts.
   Sugar, one part.

Boil to form a syrup.
SYRUPUS RHEI.

**R.** Rhei contusi uncas duas.

Aquaë bullientis octantem unum.

Macera per horas viginti quatuor, cola, et adde liquoris parti uni sacchari partes duas; dein ut fiat syrupus, coque.

SYRUPUS RHEI AROMATICUS.

**R.** Rhei contusi drachmas quinque.

Caryophyllorum;

Cinnamomi, utriusque unciam dimidiam.

Myristicae nucleos duos.

Aquaë octantem unum.

Digere et vapore, donec liquor ad octantem dimidium sit redactus; cola, et libram sacchari unam, et octantem dimidium alcoholis diluti adde. Dein coque paulisper, ut fiat syrupus.

SYRUPUS RHEI CUM SENNA.

**R.** Rhei contusi;

Sennæ, utriusque unciam unam cum semisse.

Cardamomi drachmas tres.

Aquaë ferventis octantem unum.

Digere per horas viginti quatuor; tum calore leni, donec ad octantem dimidium redactus sit liquor, vapore; dein cola, et adde sacchari libram unam; denique, ut fiat syrupus, coque.
SYRUPS.

SYRUP OF RHUBARB.

Take of Rhubarb bruised, two ounces.
   Boiling water, one pint.

Macerate for twenty-four hours; strain, and add two parts of sugar to one of the liquor; then boil to form a syrup.

AROMATIC SYRUP OF RHUBARB.

Take of Rhubarb bruised, five drachms.
   Cloves;
   Cinnamon, each half an ounce.
   Nutmegs, two in number.
   Water, one pint.

Digest and evaporate till the liquor is reduced to half a pint; strain, and add one pound of sugar, and half a pint of diluted alcohol; then boil a little to form a syrup.

SYRUP OF RHUBARB WITH SENNA.

Take of Rhubarb, bruised;
   Senna, each one ounce and a half.
   Cardamom, three drachms.
   Boiling water, one pint.

Digest for twenty-four hours, and evaporate with a gentle heat till the liquor is reduced to half a pint; then strain and add one pound of sugar; lastly boil to form a syrup.
SYRUPUS SARSAPARILLÆ.

R. Sarsaparillae concisae libras duas.
   Glycyrrhizae concisae;
   Rosae;
   Sennae;
   Anisi singulorum uncias duas.
   Aquae tepidae octantes duodecim.

Macera sarsaparillam per horas viginti quatuor in aqua, dein coque per horae quadrantem; et valide exprimens cola. Bulliat denuo sarsaparilla cum aquae decem octantibus, vaporet-que ad dimidium; tum cola, et liquores mistos additis cæteris: coque iterum ad dimidium consumendum. Cola, et adde

   Mellis despumati;
   Sacchari, utriusque libras duas.

Coque in syrupum densiorem.

SYRUPUS SARSAPARILLÆ ET GUAIAICI.

R. Sarsaparillae concisæ;
   Guaiaci rasi, utriusque libram unam.
   Rosae;
   Acaciæ gummi;
   Senae, uniuscujusque unciam unam.
   Zingiberis unciam dimidiam.
   Aquæ octantes decem.

Coque sarsaparillam et guaiacum in aqua, horam unam; cola, et residuo aquæ octantes alteros decem, adde; coque denuo per horas duas, et sub finem bulliendi, rosam, acaciam, sennam et zingiber adde; cola, et decoctis adde mellis purificati, et sacchari, utriusque libras tres; et, ut fiat syrupus, coque.
SYRUP OF SARSAPARILLA.

Take of Sarsaparilla sliced, two pounds.
   Liquorice sliced;
   Roses;
   Senna;
   Anise, each two ounces.
   Warm water, twelve pints.

Infuse the sarsaparilla in the water for twenty-four hours; then boil for a quarter of an hour; and strain by strong compression; boil the sarsaparilla again in ten pints of water to the consumption of one half of the liquor; strain, mix the two liquors, and add the other ingredients. Boil again to the consumption of one half of the liquor; strain, and add of

   Honey;
   Sugar, each two pounds.

Boil to form a thick syrup.

SYRUP OF SARSAPARILLA AND GUAIACUM.

Take of Sarsaparilla, sliced;
   Guaiacum, rasped, of each one pound.
   Roses;
   Acacia gum;
   Senna, each one ounce.
   Ginger, half an ounce.
   Water, ten pints.

Boil the two first ingredients in the water for one hour, strain, and to the residuum add ten pints more of water; boil for two hours, and, towards the end of the boiling, add the other ingredients; strain, and to the decoctions, add of clarified honey and sugar, each three pounds; and boil to form a syrup.
SYRUPUS SCILLÆ.

R. Aceti scillæ octantes duos.
   Sacchari contriti libras tres cum semisse.

Solvatur leni calore saccharum, ut fiat syrupus.

SYRUPUS SENEGÆ.

R. Senegæ contusæ uncias quatuor.
   Aquæ octantem unum.
   Sacchari libram unam.

Coque senegam in aqua ad consumendam dimidiam. Laticem
   purum transfunde; saccharum adde; et, donec fiat syrupus,
   coque.

SYRUPUS SIMPLEX.

R. Sacchari triti uncias quindecim.
   Aquæ octantem dimidium.

Leni calore solvatur saccharum in aqua, et coquatur paululum,
   ut, spuma ablata, fiat syrupus.

SYRUPUS TOLUTANI.

R. Syrupi simplicis octantes duos.
   Tincturæ tolutani fluidunciam unam.

Syrupo recèns parato, et ab igne remoto, cum penè refixerit,
   immisce paulatim tincturam, assiduè agitans.
SYRUP OF SQUILL.

Take of Vinegar of squill, two pints.
Sugar in powder, three pounds and a half.

Dissolve the sugar with a gentle heat so as to form a syrup.

SYRUP OF SENECA SNAKEROOT.

Take of Seneca snakeroot bruised, four ounces.
Water, one pint.
Sugar, one pound.

Boil the snakeroot in the water, to the consumption of the one half, decant the clear liquid, add the sugar, and boil to form a syrup.

SIMPLE SYRUP.

Take of Sugar in powder, fifteen ounces.
Water, half a pint.

Let the sugar be dissolved by a gentle heat in the water, and boiled a little, so as to form a syrup, the scum being removed.

SYRUP OF BALSAM OF TOLU.

Take of Simple syrup, two pints.
Tincture of tolu, one fluidounce.

With the syrup just prepared, and when it has almost grown cold, after having been removed from the fire, gradually mix the tincture with constant agitation.
SYRUPUS ZINGIBERIS.

R. Zingiberis in pulverem triti uncias tres.
   Aquæ bullientis octantes quatuor.
   Sacchari libras septicm cum semisse.

Macera zingiber in aqua, vase clauso, per horas viginti quatuor; dein liquori colato adde saccharum contritum, ut fiat syrupus.

---

TROCHISCI.

---

TROCHISCI GLYCYRHRHIZÆ CUM OPIO.

R. Opii drachmas duas.
   Tincturæ tolutani fluidunciam dimidiam.
   Syrupi simplicis fluiduncias octo.
   Glycyrrhizæ extracti aqua calida molliti.
   Acaciae gummi in pulverem triti, utriusque uncias quinque.

Primum tere opium diligenter cum tinctura; dein paulatim admisce syrupum et extractum; postea paulatim insperge pulverem acaciae gummi, et tandem exsicca, ut fiat massa in trochisicos formanda, singulos grana decem pendentes.

TROCHISCI CALCIS CARBONATIS.

R. Calcis carbonatis praeparati uncias quatuor.
   Acaciae gummi unciam unam.
   Myristicae drachmam unam.
   Sacchari uncias sex.

Haec in pulverem terantur et cum aqua fiat massa in trochiscos formanda.
SYRUP OF GINGER.

Take of Ginger in powder, three ounces.
Boiling water, four pints.
Sugar, seven pounds and a half.

Macerate the ginger in the water, in a close vessel, for twenty-four hours; strain the infusion, add the sugar powdered, and form a syrup.

TROCHES.

TROCHES OF LIQUORICE AND OPIUM.

Take of Opium, two drachms.
Tincture of tolu, half a fluidounce.
Simple syrup, eight fluidounces.
Extract of liquorice softened in hot water;
Acacia gum in powder, each five ounces.

First rub the opium thoroughly with the tincture, then by degrees add the syrup and extract; after which, gradually sprinkle in the powdered gum, finally dry the mass, and form into troches, each weighing ten grains.

TROCHES OF CARBONATE OF LIME.

Take of Prepared carbonate of lime, four ounces.
Acacia gum, one ounce.
Nutmeg, one drachm.
Sugar, six ounces.

Rub them into a powder, and form them by means of water, into a mass fit for making troches.
TINCTURÆ.

TROCHISCI MAGNESIÆ.

R. Magnesiae uncias quatuor.
Sacchari uncias duas.
Zingiberis in pulverem triti scrupulum unum.

Simul terantur, et cum syrupo simplici fiat massa in trochiscos formanda.

---

TINCTURÆ.

Digerantur tincturæ in vasis vitreis obturatis, calore circa gradum octogesimum, nisi aliter jussum fuerit. Inter parandum, sæpius agitari oportet.

TINCTURA ALOES.

R. Aloes socotrinae in pulverem tritæ unciam dimidiam.
Glycyrrhizæ extracti unciam unam cum semisse.
Alcoholis, fluiduncias quatuor.
Aquæ octantem unum.

Digere per dies decem, et tincturam defæcatam effunde.

---

TINCTURA ALOES ET MYRRHÆ.

R. Myrrhae in pulverem tritæ, uncias duas.
Alcoholis octantem unum cum semisse.
Aquæ octantem dimidium.
TINCTURES.

TROCHES OF MAGNESIA.

Take of Magnesia, four ounces.
Sugar, two ounces.
Ginger in powder, one scruple.

Rub them together, and, with simple syrup form them into a mass fit for making troches.

TINCTURES.

Tinctures should be digested in stopped glass bottles, and in a temperature of about 80°, unless otherwise directed. They should be frequently shaken during the preparation.

TINCTURE OF ALOES.

Take of Socotrine aloes in powder, half an ounce.
Extract of liquorice, one ounce and a half.
Alcohol, four fluidounces.
Water, one pint.

Digest for ten days, and pour off the depurated tincture.

TINCTURE OF ALOES AND MYRRH.

FORMERLY "ELIXIR PROPRIETATIS."

Take of Myrrh in powder, two ounces.
Alcohol, one pint and a half.
Water, half a pint.
TINCTURÆ.

Misce alcohol cum aqua; tum adde myrrham, digere per dies quinque, et demum adde

Aloes socotrinae in pulverem tritæ unciam unam cum semisse.
Croci unciam unam.

Digere rursus per dies quinque, et tincturam defæcatum effunde.

TINCTURA AMMONIATA AROMATICA.

R. Alcoholis ammoniati octantem dimidium.
Olei rorismarini fluidrachmam unam cum semisse.
Olei sassafras fluidrachmam unam.

Misce ut solvantur olea.

TINCTURA ANGUSTURÆ.

R. Angusturæ contusæ uncias duas.
Alcoholis diluti, octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA ASSAFOETIDÆ.

R. Assafoetidæ uncias quatuor.
Alcoholis octantes duos.

Digere per dies decem, et cola.

TINCTURA CAMPHORÆ.

R. Alcoholis diluti octantem unum.
Camphoræ unciam unam.

Misce ad camphoram solvendam.
Mix the alcohol with the water, then add the myrrh; digest for five days; and lastly, add of socotrine aloes in powder, an ounce and a half. Saffron, one ounce.

Digest again for five days, and pour off the tincture from the sediment.

**AMMONIATED AROMATIC TINCTURE.**

Take of Ammoniated alcohol, half a pint.
Oil of rosemary, one fluidrachm and a half.
Oil of sassafras, one fluidrachm.

Mix them that the oils may be dissolved.

**TINCTURE OF ANGUSTURA.**

Take of Angustura in coarse powder, two ounces.
Diluted alcohol, two pints.

Digest for ten days, and filter.

**TINCTURE OF ASSAFOETIDA.**

Take of Assafoetida, four ounces.
Alcohol, two pints.

Digest for ten days, and strain.

**TINCTURE OF CAMPHOR.**

Take of Alcohol, one pint.
Camphor, one ounce.

Mix, that the camphor may be dissolved.
TINCTURÆ.

TINCTURA CAMPHORÆ OPIATA.

R. Opii;
Acidi benzoici;
Olei anisi; utriusque drachmam unam.
Glycyrrhizae extracti, unciam dimidiam.
Mellis despumati uncias duas.
Camphoræ scrupulos duos.
Alcoholis diluti octantes duos.

Digere per dies decem, et cola.

TINCTURA CANTHARIDUM.

R. Cantharidum contusarum drachmas tres.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA CAPSICI.

R. Capsici unciam unam.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA CAPSICI ET CANTHARIDUM.

R. Cantharidum contusarum drachmas decem.
Capsici drachmam unam.
Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.
OPIATED TINCTURE OF CAMPHOR.

FORMERLY PAREGORIC ELIXIR.

Take of Opium;
    Benzoic acid;
    Oil of anise, each one drachm.
    Liquorice, half an ounce.
    Clarified honey, two ounces.
    Camphor, two scruples.
    Diluted alcohol, two pints.

Digest for ten days, and filter.

---

TINCTURE OF CANTHARIDES.

Take of Cantharides bruised, three drachms.
    Diluted alcohol, two pints.

Digest for ten days, and strain.

---

TINCTURE OF CAYENNE PEPPER.

Take of Cayenne pepper, one ounce.
    Diluted alcohol, two pints.

Digest for ten days, and filter.

---

TINCTURE OF CAYENNE PEPPER AND CANTHARIDES.

Take of Cantharides bruised, ten drachms.
    Cayenne pepper, one drachm.
    Diluted alcohol, one pint.

Digest for ten days, and filter.
TINCTURÆ.

TINCTURA CARDAMOMI.

R. Cardamomi contusi uncias quatuor.
Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA CASTOREI.

R. Castorei in pulverem tritæ uncias duas.
Alcoholis octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA CATECHU.

R. Catechu uncias tres.
Cinnamomi contusi uncias duas.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA CINCHONÆ.

R. Cinchonæ in pulverem tritæ uncias sex.
Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.
TINCTURES.

TINCTURE OF CARDAMOM.
Take of Cardamom bruised, four ounces.
Diluted alcohol, two pints and a half.
Digest for ten days, and filter.

TINCTURE OF CASTOR.
Take of Castor powdered, two ounces.
Alcohol, two pints.
Digest for ten days, and filter.

TINCTURE OF CATECHU.
Take of Catechu, three ounces.
Cinnamon bruised, two ounces.
Diluted alcohol, two pints.
Digest for ten days, and filter.

TINCTURE OF PERUVIAN BARK.
Take of Peruvian bark in coarse powder, six ounces.
Diluted alcohol, two pints and a half.
Digest for ten days, and filter.
TINCTURA CINCHONÆ COMPOSITA.

R. Cinchonæ in pulverem tritæ uncias duæ.
   Aurantii corticis exsiccati unciam unam cum semisse.
   Serpentariae contusæ drachmas tres.
   Croci;
   Santalini; utriusque drachmam unam.
   Alcoholis diluti octantem unum cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA CINNAMOMI.

R. Cinnamomi contusi uncias tres.
   Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA COLOMBÆ.

R. Colombæ concisæ uncias duæ cum semisse.
   Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA DIGITALIS.

R. Digitalis siccatæ uncias duæ.
   Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.
TINCTURES.

COMPOUND TINCTURE OF PERUVIAN BARK.

Take of Peruvian bark powdered, two ounces.
Orange peel dried, one ounce and a half.
Virginia snakeroot bruised, three drachms.
Saffron;
Red sanders, each one drachm.
Diluted alcohol, one pint and a half.

Digest for ten days, and filter.

TINCTURE OF CINNAMON.

Take of Cinnamon bruised, three ounces.
Diluted alcohol, two pints and a half.

Digest for ten days, and filter.

TINCTURE OF COLUMBO.

Take of Columbo sliced, two ounces and a half.
Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF FOXGLOVE.

Take of Foxglove dried, two ounces.
Diluted alcohol, one pint.

Digest for ten days, and filter.
TINCTURA ACETATIS FERRI.

R. Potassae acetatis;
   Ferri sulphatis, utriusque unciam unam.
   Alchoholis octantem unum.

Contere potassae acetatem et ferri sulphatem, mortario fictili, donec in massam coeant; hanc calore mediocri exsicca. et siccatam cum alchohle contere. Misturam in vaso vitreo, bene obturato, per horas viginti quatuor digere, subinde agitans. Denique, quum faeces subsederint, liquorem limpidum effunde.

TINCTURA MURIATIS FERRI.

R. Ferri carbonatis praecipitati libram dimidiam.
   Acidi muriatici libras tres.
   Alchoholis octantes tres.

Infunde ferri carbonati, in vaso vitreo, acidum muriaticum; misturam subinde per triduum agita; deinde sepone, ut faeces, si quae, subsidente, et liquorem effunde. Ad octantem unum lente vaporet hic: et frigefacto addetur alchohol.

TINCTURA GENTIANÆ.

R. Gentianæ concisæ uncias duas.
   Aurantii corticis exsiccati unciam unam.
   Cardamomi contusi unciam dimidiam.
   Alchoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.
TINCTURES.

TINCTURE OF ACETATE OF IRON.

Take of Acetate of potass; Sulphate of iron, each one ounce. Alcohol, one pint.

Rub the acetate of potass and sulphate of iron in an earthen mortar until they unite into a soft mass, dry this with a moderate heat, and triturate it when dried, with the alcohol. Digest the mixture in a well-corked phial for twenty-four hours, shaking it occasionally. Lastly, after the faeces have subsided, pour off the limpid liquor.

TINCTURE OF MURIATE OF IRON.

Take of Precipitated carbonate of iron, half a pound. Muriatic acid, three pounds. Alcohol, three pints.

Pour the muriatic acid on the carbonate of iron in a glass vessel; and shake the mixture occasionally during three days. Then set it by, that the faeces, if any, may subside, and pour off the liquor; evaporate this slowly, to one pint, and when cold, add the alcohol.

TINCTURE OF GENTIAN.

Take of Gentian sliced, two ounces. Orange peel dried, one ounce. Cardamom bruised, half an ounce. Diluted alcohol, two pints.

Digest for ten days, and filter.
TINCTURÆ.

TINCTURA GUAIAICI.

R. Guaiaci resine in pulverem tritae libram unam.
Alcoholis octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA GUAIAICI AMMONIATA.

R. Guaiaci resine in pulverem tritae uncias quatuor.
Alcoholis ammoniati octantem unum cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA HELLEBORI NIGRI.

R. Hellebori nigri concisi uncias quatuor.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA HUMULI.

R. Humuli uncias quatuor.
Alcoholis octantem unum.

Ex humulo pulverem luteolum omnem excute, quem digere per dies decem, et postea per chartam cola.
TINCTURES.

TINCTURE OF GUAIACUM.
Take of Resin of guaiacum in powder, one pound.
   Alcohol, two pints and a half.
Digest for ten days, and filter.

AMMONIATED TINCTURE OF GUAIACUM.
Take of Resin of guaiacum in powder, four ounces.
   Ammoniated alcohol, one pint and a half.
Digest for ten days, and filter.

TINCTURE OF BLACK HELLEBORE.
Take of Black hellebore sliced, four ounces.
   Diluted alcohol, two pints.
Digest for ten days, and filter.

TINCTURE OF HOP.
Take of Hops, four ounces.
   Alcohol, one pint.
Beat out the yellow powder from the hops, and digest it ten days in the alcohol; then filter.
TINCTURÆ.

TINCTURA HYOSCIAMI.

R. Hyosciami siccati et in pulverem contusi uncias duas cum quadrante. Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.

TINCTURA JALAPÆ.

R. Jalapæ in pulverem tritae uncias octo. Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA KINO.

R. Kino in pulverem tritae uncias tres. Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA LAVANDULÆ.

Digere per dies decem, et per chartam cola.
TINCTURES.

TINCTURE OF HENBANE.

Take of Henbane dried, and coarsely powdered, two ounces and a quarter.
Diluted alcohol, one pint.

Digest for ten days, and filter.

TINCTURE OF JALAP.

Take of Jalap powdered, eight ounces.
Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF KINO.

Take of Kino powdered, three ounces.
Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF LAVENDER.

Take of Spirit of lavender, three pints.
Spirit of rosemary, one pint.
Cinnamon bruised, one ounce.
Clove bruised, two drachms.
Nutmeg bruised, half an ounce.
Red sanders in shavings, three drachms.

Digest for ten days, and filter.
TINCTURA LOBELIÆ.

R. Lobelii uncias duas.
Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.

TINCTURA MENTHÆ PIPERITÆ.

R. Olei menthae piperitæ fluidrachmas duas.
Alcoholis octantem unum.

Digere donec oleum cum alcohole rite permistum sit.

TINCTURA MENTHÆ VIRIDIS.

R. Olei menthae viridis fluidrachmas duas.
Alcoholis octantem unum.

Digere donec oleum cum alcohole rite permistum sit.

TINCTURA MOSCHI.

R. Moschi drachmas duas.
Alcoholis octantem unum.

Digere per dies decem, et per chartam cola.

TINCTURA MYRRHÆ.

R. Myrrhæ in pulverem tritæ uncias tres.
Alcoholis fluiduncias viginti.
Aquæ fluiduncias decem.

Digere per dies decem, et per chartam cola.
TINCTURE OF INDIAN TOBACCO.

Take of Indian tobacco, two ounces.
Diluted alcohol, one pint.

Digest for ten days, and filter.

TINCTURE OF PEPPERMINT.

Take of Oil of peppermint, two fluidrachms.
Alcohol, one pint.

Digest till the oil is thoroughly blended with the alcohol.

TINCTURE OF SPEARMINT.

Take of Oil of spearmint, two fluidrachms.
Alcohol, one pint.

Digest till the oil is thoroughly blended with the alcohol.

TINCTURE OF MUSK.

Take of Musk, two drachms.
Alcohol, one pint.

Digest for ten days, and filter.

TINCTURE OF MYRRH.

Take of Myrrh in powder, three ounces.
Alcohol, twenty fluidounces.
Water, ten fluidounces.

Digest for ten days, and filter.
TINCTURÆ.

TINCTURA OPIII.

R. Opii in pulverem triti uncias duas.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA QUASSIÆ.

R. Quassiae rasæ unciam unam.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA RHEI.

R. Rhei contusi uncias tres.
Cardamomi contusi unciam dimidiam.
Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

TINCTURA RHEI ET ALOES.

R. Rhei contusi drachmas decem.
Aloes socotrinae tritae drachmas sex.
Cardamomi contusi unciam dimidiam.
Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.
TINCTURES.

TINCTURE OF OPIUM.

CALLED LAUDANUM.

Take of Opium powdered, two ounces.
Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF QUASSIA.

Take of Quassia rasped, one ounce.
Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF RHUBARB.

Take of Rhubarb bruised, three ounces.
Cardamom bruised, half an ounce.
Diluted alcohol, two pints and a half.

Digest for ten days, and filter.

TINCTURE OF RHUBARB AND ALOES.

FORMERLY "ELIXIR SACRUM."

Take of Rhubarb bruised, ten drachms.
Socotraine aloes in powder, six drachms.
Cardamom bruised, half an ounce.
Diluted alcohol, two pints and a half.

Digest for ten days, and filter.
TINCTURA RHEI ET GENTIANÆ.

R. Rhei contusi uncias duas.
   Gentianæ concisæ et contusæ unciam dimidiam.
   Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

---

TINCTURA RHEI DULCIS.

R. Rhei contusi uncias duas.
   Glycyrrhizae contusae;
   Anisi contusi, utriusque unciam unam.
   Sacchari uncias duas.
   Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.

---

TINCTURA SANGUINARIAE.

R. Sanguinariae contusae uncias duas.
   Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.

---

TINCTURA SAPONIS ET OPII.

R. Saponis concisi uncias quatuor.
   Camphoræ uncias duas.
   Opii in pulverem triti unciam unam.
   Olei rorismarini unciam dimidiam.
   Alcoholis octantes duos.

Digere saponem et opium in alcohole per dies tres, tum cola, et colato camphoram et oleum adjice, et solve.
TINCTURE OF RHUBARB AND GENTIAN.

Take of Rhubarb in coarse powder, two ounces.
Gentian sliced and bruised, half an ounce.
Diluted alcohol, two pints and a half.

Digest for ten days, and filter.

SWEET TINCTURE OF RHUBARB.

Take of Rhubarb bruised, two ounces.
Liquorice bruised;
Anise bruised, each one ounce.
Sugar, two ounces.
Diluted alcohol, two pints and a half.

Digest for ten days, and filter.

TINCTURE OF BLOODROOT.

Take of Bloodroot coarsely powdered, two ounces.
Diluted alcohol, one pint.

Digest for ten days, and filter.

TINCTURE OF SOAP AND OPIUM.

Take of Soap in shavings, four ounces.
Camphor, two ounces.
Opium in powder, one ounce.
Oil of rosemary, half an ounce.
Alcohol, two pints.

Digest the soap and opium in the alcohol three days, then filter and add the camphor and oil, and dissolve.
TINCTURÆ.

TINCTURA SENNAE AROMATICA.

R. Senæ drachmas duas.
   Coriandri;
   Fœniculi singulorum drachmam unam.
   Santali drachmas duas.
   Croci;
   Glycyrrhizæ utriusque drachmam dimidiam.
   Uvarum demptis acinis libram dimidiam.

Digere in octantibus duobus Alcoholis diluti per dies decem; dein cola, et octantem alterum alcoholis diluti iisdem adde; per dies quinque digere; cola, et liquores misce.

TINCTURA SENNAE COMPOSITA.

R. Senæ uncias tres.
   Jalapæ contusæ unciam unam.
   Coriandri;
   Cari utriusque contusi unciam dimidiam.
   Cardamomi contusi drachmas duas.
   Alcoholis diluti octantes tres cum semisse.

Digere per dies decem, et colato adjice
   Sacchari uncias quattuor.
AROMATIC TINCTURE OF SENNA.

WARNER'S GOUT CORDIAL.

Take of Senna, two drachms.
Coriander;
Fennel, each one drachm.
Red sanders, two drachms.
Saffron;
Liquorice, each half a drachm.
Raisins stoned, half a pound.

Digest in two pints of diluted alcohol for ten days; then strain, and add one other pint of diluted alcohol to the same ingredients; digest for five days; strain, and mix the liquor of both digestions.

COMPOUND TINCTURE OF SENNA.

FORMERLY "ELIXIR SALUTIS."

Take of Senna, three ounces.
Jalap bruised, one ounce.
Coriander;
Caraway, each bruised, half an ounce.
Cardamom bruised, two drachms.
Diluted alcohol, three pints and a half.

Digest for ten days, then filter, and add of
Sugar, four ounces.
TINCTURÆ.

TINCTURA SERPENTARIAE.

R. Serpentariae contusae uncias duas.
Santali drachmam unam.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

---

TINCTURA STRAMONII.

R. Stramonii seminum contusorum uncias duas.
Alcoholis diluti octantem unum.

Digere per dies decem, et per chartam cola.

---

TINCTURA ACIDI SULPHURICI.

R. Acidi sulphurici fluiduncias tres.
Alcoholis octantes duos.

Instilla acidum alcohali paulatim. Misturam digere calore lenissimo, in vase clauso, per triduum; dein adde

Zingiberis contusi unciam unam.
Cinnamomi contusi unciam unam cum semisse.

Digere rursus in vase clauso per septem dies; dein per chartam, infundibulo vitreo impositam, cola.
TINCTURES.

TINCTURE OF VIRGINIA SNAKEROOT.

Take of Virginia snakeroot bruised, two ounces.
    Red sanders, one drachm.
    Diluted alcohol, two pints.

Digest for ten days, and filter.

TINCTURE OF THORNAPPLE.

Take of Thorn apple seeds bruised, two ounces.
    Diluted alcohol, one pint.

Digest for ten days, and filter.

TINCTURE OF SULPHURIC ACID.

FORMERLY ELIXIR OF VITRIOL.

Take of Sulphuric acid, three fluidounces.
    Alcohol, two pints.

Drop the acid gradually into the alcohol. Digest the mixture
    with a very gentle heat in a close vessel for three days, and
then add of

    Ginger bruised, one ounce.
    Cinnamon bruised, one ounce and a half.

Digest again in a close vessel for seven days, and filter through
    paper placed in a glass funnel.
TINCTURA TOLUTANI.

R. Tolutani unciam unam cum semisse.
Alcoholis octantem unum.

Digere donec solvatur tolutatum, et per chartam cola.

TINCTURA VALERIANÆ.

R. Valerianæ uncias quatuor.
Alcoholis diluti octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA VALERIANÆ AMMONIATA.

R. Valerianæ uncias quatuor.
Alcoholis ammoniati octantes duos.

Digere per dies decem, et per chartam cola.

TINCTURA VERATRI VIRIDIS.

R. Veratri viridis contusi uncias octo.
Alcoholis diluti octantes duos cum semisse.

Digere per dies decem, et per chartam cola.
TINCTURES.

TINCTURE OF TOLU.
Take of Tolu, one ounce and a half.
Alcohol, one pint.
Digest till the tolu is dissolved, then filter.

TINCTURE OF VALERIAN.
Take of Valerian, four ounces.
Diluted alcohol, two pints.
Digest for ten days, and filter.

AMMONIATED TINCTURE OF VALERIAN.
Take of Valerian, four ounces.
Ammoniated alcohol, two pints.
Digest for ten days, and filter.

TINCTURE OF GREEN HELLEBORE.
Take of Green hellebore bruised, eight ounces.
Diluted alcohol, two pints and a half.
Digest for ten days, and filter.
UNGUENTA.

Unguenta parantur ex adipe vel oleo cum sevo vel cera, vel spermate ceti admixto. Crassitudinem butyri habere oportet, ut pulveres et medicamenta ponderosiora commixta non subsideant. Quoniam cuti illinenda sunt, mollia vel fluida in temperie corporis humani esse debent. Formulæ sequentes calori sexagesimum gradum non superanti adaptantur. Locis calidioribus cum cera vel sevi quantitate majore unguenta conficienda sint.

UNGUENTUM ACIDI NITROSI.

R. Adipis libram unam.
Acidi nitrosi fluidrachmas sex.

Acidum paulatim misce cum adipe liquefacto, et mixturam frigescentem diligenter subige.

UNGUENTUM AQUÆ ROSÆ.

R. Amygdalæ olii fluiduncias duas.
Spermatis ceti unciam dimidiam.
Ceræ albae drachmam unam.

Liquefac simul balneo aquoso, assidue movens, dein liquefactis adjice

Aquæ rosæ fluiduncias duas;
Et assidue move donec refrierint.
OINTMENTS.

Ointments are prepared from lard or oil rendered of the consistence of butter by the addition of suet, wax, or spermaceti, so as to suspend the dry powders and more ponderous articles, with which they are frequently incorporated. As they are to be applied to the skin, they should be soft or fluid at the temperature of the body. The following formulæ are calculated for a temperature not exceeding 60° Fahr. In a higher temperature more suet or wax may be added.

OINTMENT OF NITROUS ACID.

Take of Lard, one pound.
Nitrous acid, six fluidrachms.

Mix the acid gradually with the melted lard, and diligently beat the mixture as it cools.

OINTMENT OF ROSEWATER.

Take of Oil of almonds, two fluidounces.
Spermaceti, half an ounce.
White wax, one drachm.

Melt the whole in a water bath, stirring it frequently; when melted, add of
Rose water, two fluidounces;
And stir the mixture continually till it is cold.
UNGUENTUM CANTHARIDUM.

R. Cantharidum in pulverem tritarum unciás duas.
   Aquae distillatae fluiduncias octo.
   Cerati resinosi unciás octo.

   Aquam cum cantharidibus decoque ad dimidiam et cola; li-
   quori colato commisce ceratum, dein vaporet ad idoneam crassi-
   tudinem.

---

UNGUENTUM CUPRI SUBACETATIS.

R. Unguenti simplicis partes quindecim.
   Cupri subacetatis praeparati in pulverem triti partem
   unam.

   Unguento liquefacto adjice cuprum, et assidue move donec
   refixerent.

---

UNGUENTUM GALLARUM.

R. Gallarum in pulverem tritarum drachmam unam.
   Adipis drachmas septem.

   Adipi igne lento emollito pulverem adjice, et miscē.

---

UNGUENTUM HYDRARGYRI.

R. Hydrargyri purificati;
   Adipis, utriusque pondere partes tres.
   Sevi partem unam.

   Tere hydrargyrum diligenter in mortario cum pauxillo adi-
   pis donec evanescant globuli* dein adde reliquum adipis et
   sevi, bene interim omnia conterens.

* Globuli citius evanescant si hydrargyris cum pauxillo unguenti jam antea parati
   seu adipis rancidi, seu terebinthinae teretur.
OINTMENTS.

OINTMENT OF CANTHARIDES.

Take of Cantharides in powder, two ounces.
Distilled water, eight fluidounces.
Resin cerate, eight ounces.

Boil the water with the cantharides to half its quantity, and strain. Mix the cerate into the strained liquor, and evaporate to a proper consistence.

OINTMENT OF THE SUBACETATE OF COPPER.

Take of Simple ointment, fifteen parts. Prepared subacetate of copper in powder, one part.
Melt the ointment, then add the copper, and mix them together.

OINTMENT OF GALLS.

Take of Galls in powder, one drachm.
Lard, seven drachms.
Mix the powdered galls with the lard previously melted.

MERCURIAL OINTMENT.

Take of Purified mercury;
Lard, each three parts by weight.
Suet, one part.

Rub the quicksilver carefully in a mortar with a small portion of the lard,* until the globules disappear; then add the remainder of the lard and the suet, rubbing them well together.

* Employing a small portion of old ointment, of rancid lard, or of turpentine, greatly expedites the process.
UNGUENTUM HYDRARGYRI NITRATIS FORTIUS.

R. Hydrargyri purificati partem unam.
    Acidi nitrici partes duas.
    Olei olivae partes novem.
    Adipis partes tres.

Solve hydrargyrum in acido, dein liquorem cum adipe et oleo prius simul liquefactis et denuo frigescentibus strenue subige in mortario vitreo, ut fiat unguentum.

---

UNGUENTUM HYDRARGYRI NITRATIS MITIUS.

Paratur eodem modo ex adipe et oleo triplici.

---

UNGUENTUM HYDRARGYRI NITRICO-OXIDI.

R. Hydrargyri nitrico-oxidi partem unam.
    Adipis partes octo.

Adipi liquefacto adjice oxidum et move donec refrixerint.

---

UNGUENTUM HYDRARGYRI OXIDI CINEREI.

R. Hydrargyri oxidi cinerei partem unam.
    Adipis partes tres.

Adipi liquefacto adjice oxidum et misce.
OINTMENT OF NITRATE OF MERCURY.

Take of Purified mercury, by weight one part.
Nitric acid, two parts.
Olive oil, nine parts.
Lard, three parts.

Dissolve the mercury in the acid, then mix the liquor with the oil and lard previously melted together, and just beginning to grow stiff. Stir them briskly together in a glass mortar, so as to form an ointment.

MILDER OINTMENT OF NITRATE OF MERCURY.

This is prepared in the same way, with three times the quantity of lard and oil.

OINTMENT OF THE NITRIC OXIDE OF MERCURY.

Take of Nitric oxide of mercury, one part.
Lard, eight parts.

To the melted lard add the oxide, and mix them together until cool.

OINTMENT OF GREY OXIDE OF MERCURY.

Take of Grey oxide of mercury, one part.
Lard, three parts.

Mix the oxide with the lard, previously melted.
UNGUENTUM HYDRARGYRI SUBMURIATIS AMMONIATI.

R. Hydrargyri submuriatis ammoniati drachmam unam. Adipis unciam unam cum semisse.

Adipi lento igne liquefacto adjice submuriatam hydrargyri ammoniatum et misce.

UNGUENTUM PICIS LIQUIDÆ.

Liquefac simul et per linteum exprime.

UNGUENTUM PLUMBI SUBCARBONATIS.

R. Unguenti simplicis libram unam. Plumbi subcarbonatis uncias duas.

Unguento lento igne emollito adjice plumbum et misce donec refrixerint.

UNGUENTUM SIMPLEX.

R. Ceræ albae partes duas. Olivae olei partes quinque.

Liquefac simul lento igne, et assidue move donec refrixerint.
OINTMENTS.

OINTMENT OF AMMONIATED SUBMURIATE OF MERCURY.

Take of Ammoniated submuriate of mercury, one drachm.
Lard, one ounce and a half.

To the melted lard add the ammoniated submuriate of mercury, and mix.

TAR OINTMENT.

Take of Tar, five parts.
Yellow wax, two parts.

Mix them together, and strain through linen.

OINTMENT OF SUBCARBONATE OF LEAD.

Take of Simple ointment, one pound.
Subcarbonate of lead, two ounces.

To the ointment previously softened add the lead, and stir them until cool.

SIMPLE OINTMENT.

Take of White wax, two parts.
Olive oil, five parts.

Melt them together and keep stirring until cool.
UNGUENTUM STRAMONII.

R. Stramonii foliorum recentium concisorum libras quinque.
Adipis libras quatuordecim.

Coque lento igne donec folia friabilia fiant, tum per linteum adipem exprime, et singulis hujus libris; adjice,

Ceræ flavæ uncias duas.

Cera liquefacta, sinito gradatim concrescere ut facies subsidente, quas ab unguento remove.

UNGUENTUM SULPHURIS.

R. Adipis partes quatuor.
Sulphuris partem unam.

Adipi liquefacto adjice sulphurem et misce.

UNGUENTUM SULPHURIS COMPOSITUM.

R. Sulphuris unciam unam.
Submuriatis hydrargyri ammoniati.
Acidi benzoici, utriusque drachmam unam.
Limonis olei fluidrachmam unam.
Acidi sulphurici minima sexaginta.
Potassæ nitritis drachmas duas.
Adipis libram dimidiam.

Adipi liquefacto adjice cætera, et misce donec resfixerint.
OINTMENTS.

OINTMENT OF THORN APPLE.

Take of Thornapple leaves, fresh gathered and sliced, five pounds.
Lard, fourteen pounds.

Let them simmer together over a gentle fire till the leaves become crisp and dry, then press out the lard through a linen cloth, and add to every pound of the compound, of

Yellow wax, two ounces.

When the wax is melted, let the whole be allowed to cool gradually, that the impurities may subside, which must be separated from the ointment.

SULPHUR OINTMENT.

Take of Hogs lard, four parts.
Sulphur, one part.

Mix the sulphur with the melted lard.

COMPOUND SULPHUR OINTMENT.

Take of Sulphur, one ounce.
Ammoniated submuriate of mercury;
Benzoic acid, each one drachm.
Oil of lemons, one fluidrachm.
Sulphuric acid, sixty minims.
Nitrate of potass, two drachms.
Lard, half a pound.

Melt the lard, then add the other articles, continually stirring until the whole is cold.
UNGUENTUM VERATRI VIRIDIS.

R. Veratri viridis in pulverem triti uncias duos.
Adipis uncias octo.
Limonis olei minima viginti.

Adipi liquefacto adjice pulverem et oleum, et misce, assidue movens donec resfrixerint.
Eodem modo paratur unguentum veratri albi.

UNGUENTUM ZINCI OXIDI IMPURI.

R. Adipis partes quinque.
Zinci oxidi impuri praeparati partem unam.

Adipi liquefacto adjice oxidum et assidue move donec resfrixerint.

VINA MEDICATA.

VINUM ALOES.

R. Aloes socotrinæ in pulverem tritæ unciam unam.
Cardamoni contusi;
Zingiberis contusi, utriusque drachmam unam.
Vini octantes duos.

Macera per dies decem, subinde agitans, et cola.
OINTMENT OF AMERICAN HELLEBORE.

Take of American hellebore in powder, two ounces.
Lard, eight ounces.
Oil of lemons, twenty minims.

To the lard previously melted add the oil and powder, continually stirring until cool.
In the same manner the ointment may be prepared of the white hellebore.

OINTMENT OF IMPURE OXIDE OF ZINC.

Take of Lard, five parts.
Prepared impure oxide of zinc, one part.

To the melted lard add the zinc, and mix them together until cool.

MEDICATED WINES.

WINE OF ALOES.

Take of Socotrine aloes, in powder, one ounce.
Cardamom, bruised;
Ginger, each one drachm.
Wine, two pints.

Macerate for ten days, stirring occasionally, and afterwards strain.
VINUM ANTIMONII TARTARIZATI.

R. Antimonii tartarizati scrupulos duos.  
Aqua distillata bullientis fluidencias quatuor.  
Vini fluidencias sex.

Antimonium tartarizatum in aqua distillata bulliente liqua; tum vinum adjice.

VINUM COLCHICI.

R. Colchici recentis partem unam.  
Vini partes duas.

Macera per dies decem, et cola.

VINUM FERRI.

R. Ferri ductilis consecti uncias quatuor.  
Vini octantes quatuor.

Ferrum vini octantibus duobus sparsum, donec rubigine cooptatum fuerit, äeri expone; dein reliquum vini adde. Macera per dies decem, subinde agitans, et cola.

VINUM GENTIANÆ COMPOSITUM.

R. Gentianæ unciam dimidiam.  
Cinchonae unciam unam.  
Aurantii corticis drachmas duas.  
Canellae drachmam unam.  
Alcoholis diluti fluidencias quatuor.  
Vini octantes duos cum semisse.

Radici atque corticibus concisis et contusis affunde primum alcohol dilutum, et post horas viginti quatuor adde vinum; tum macera per dies decem, et cola.
WINE OF TARTARIZED ANTIMONY.

Take of Tartarized antimony, two scruples.
Boiling distilled water, four fluidounces.
Wine, six fluidounces.

Dissolve the tartarized antimony in the boiling distilled water; then add the wine.

WINE OF MEADOW SAFFRON.

Take of Fresh meadow saffron, one part.
Wine, two parts.
Macerate for ten days, and strain.

WINE OF IRON.

Take of Iron Wire cut in pieces, four ounces.
Wine, four pints.

Sprinkle the wire with two pints of the wine, and expose it to the air until it be covered with rust; then add the rest of the wine; macerate for ten days, with occasional agitation, and filter.

COMPOUND WINE OF GENTIAN.

Take of Gentian, half an ounce.
Peruvian bark, one ounce.
Orange peel, two drachms.
Canella, one drachm.
Diluted alcohol, four fluidounces.
Wine, two pints and a half.

First pour the diluted alcohol on the root and barks, sliced and bruised, and, after twenty-four hours, add the wine; then macerate for ten days, and strain.
VINUM IPECACUANHÆ.

R. Ipecacuanhæ contusæ uncias duas.
Vini octantes duos.

Macera per dies decem, et per chartam cola.

VINUM OPII.

R. Opii uncias duas.
Cinnamomi contusi;
Caryophylli contusi, utriusque drachmam unam.
Vini octantem unum.

Macera per dies decem, et cola.

VINUM RHEI.

R. Rhei concisi uncias duas.
Canellæ contusæ drachmam unam.
Alcoholis diluti fluiduncias duas.
Vini octantem unum.

Macera per dies decem, et per chartam cola.

VINUM TABACI.

R. Tabaci unciam unam.
Vini octantem unum.

Macera per dies decem, et per chartam cola.

VINUM VERATRI ALBI.

R. Veratri albi uncias quatuor.
Vini octantem unum.

Macera per dies decem, et per chartam cola.
MEDICATED WINES.

WINE OF IPECACUANHA.
Take of Ipecacuanha bruised, two ounces.
Wine, two pints.
Macerate for ten days, and strain.

WINE OF OPIUM.
*called Sydenham's Laudanum.*
Take of Opium, two ounces.
Cinnamon, bruised;
Cloves bruised, each one drachm.
Wine, one pint.
Macerate for ten days, and strain.

WINE OF RHUBARB.
Take of Rhubarb sliced, two ounces.
Canella bruised, one drachm.
Diluted alcohol, two fluidounces.
Wine, one pint.
Macerate for ten days, and filter through paper.

WINE OF TOBACCO.
Take of Tobacco, one ounce.
Wine, one pint.
Macerate for ten days, and filter.

WINE OF WHITE HELLEBORE.
Take of White hellebore, four ounces.
Wine, one pint.
Macerate for ten days, and filter.
ZINCI ACETAS.

R. Zinci sulphatis drachmam unam, in aquæ distillatæ fluidunciis decem soluti.
Plumbi acetatis scrupulos quatuor, in aquæ distillatæ fluidunciis decem soluti.

Misce liquores ut plumbi sulphas praecipitetur. Transfunde liquidum limpidum supernatans et vaporando crystallos elice.

ZINCI CARBONAS IMPURUS PRÆPARATUS.

R. Zinci carbonatis impuri quantumvis.

Ure; tum contere. Deinde fiat pulvis subtilissimus, eodem modo, quo calcis carbonatem præparari praecipimus.

ZINCI OXIDUM.

ZINC.

ACETATE OF ZINC.
Take of Sulphate of zinc, one drachm, dissolved in ten fluid-ounces of distilled water.
Acetate of lead, four scruples, dissolved in ten fluid-ounces of distilled water.
Mix the solutions and a sulphate of lead will be precipitated. Decant the clear supernatant liquid, evaporate and crystallize.

PREPARED IMPURE CARBONATE OF ZINC.
CALLED PREPARED CALAMINE.
Take of Impure carbonate of zinc, any quantity.
Burn and break it small; then let it be brought into the state of a very fine powder, in the same manner that carbonate of lime is prepared.

OXIDE OF ZINC.
FORMERLY FLOWERS OF ZINC.
Let a large crucible be placed in a furnace filled with live coals, so as to be somewhat inclined towards its mouth; and when the bottom of the crucible is moderately red, throw into it a small piece of zinc, about the weight of a drachm. The zinc soon inflames, and is, at the same time, converted into white flakes, which are to be from time to time removed from the surface of the metal with an iron spatula, that the combustion may be more complete; and at last, when the zinc ceases to flame, the oxide of zinc is to be taken out of the crucible. Having then put in another piece of zinc, the operation is to be repeated, and may be repeated as often as is necessary. Lastly the oxide of zinc is to be prepared in the same way as the carbonate of lime.

of antimony with wax - ib.
Vitriolated tartar - 193
the first ever compiled by the authority of the profession throughout a nation.

In an address before the New York State Medical Society, Dr. Stearns, the President, referring to the Pharmacopoeia, said, "It is with no ordinary satisfaction that I announce officially the completion of a work which constitutes an Era in our National Medical History. The benefit will extend to every physician and ultimately to every patient in the United States. We search the annals of the Medical World, in vain, for such a precedent."
